

# Electric Actuators

Rod Type

Guide Rod Type

**NEW**

- The LEY100 series (750 W specification, AC servo motor) has been added.
- The LECSN-T series (Network card type) has been added.
- The dust-tight/water-jet-proof LEY-X7 series has been added.

**RoHS**

Step Motor (Servo/24 VDC)

Servo Motor (24 VDC)

## Rod Type LEY Series

Size: 16, 25, 32, 40 ▶ p. 35

Long stroke:

Max. 500 mm (LEY32, 40)

Mounting variations

- Direct mounting: 3 directions, Bracket mounting: 3 types
- Either positioning or pushing control can be selected.
- It is possible to hold the actuator with the rod pushing a workpiece, etc.

Dust-tight/Water-jet-proof (IP65 Equivalent/IP67 Equivalent): -X7 ▶ p. 155

\* Size: 25, 32 \* The X7 is not UL compliant.

Dust-tight/Water-jet-proof (IP65 Equivalent): -X5 ▶ p. 160

\* Size: 25, 32 \* The X5 is not UL compliant.

Auto switch mountable Rod type

Rod type/  
In-line motor type

## Guide Rod Type LEYG Series

Size: 16, 25, 32, 40 ▶ p. 109

Lateral end load: 5 times more\*1

\*1 Compared with the rod type, size 25, and 100 mm stroke

Compatible with sliding bearings and ball bushing bearings  
Compatible with moment loads and stoppers (sliding bearings)

- Either positioning or pushing control can be selected.
- It is possible to hold the actuator with the rod pushing a workpiece, etc.

Guide rod type/  
In-line motor type

## AC Servo Motor

### Rod Type LEY Series

Size: 25, 32, 63, 100

Dust-tight/Water-jet-proof (IP65 Equivalent): -X5

▶ pp. 41, 49

- High-output motor (100/200/400/750 W)
- Improved high-speed transfer ability
- High acceleration/deceleration compatible (5000 mm/s<sup>2</sup>)
- Pulse input/CC-Link/SSCNET III types
- EtherCAT®/EtherNet/IP™/PROFINET/DeviceNet™/IO-Link/CC-Link direct input type
- With internal absolute encoder (For the LECSB/C/S)

Rod type/  
In-line motor type  
**New** Size 100 has been added.

\* Size: 25, 32  
\* The X5 is not UL compliant.

### Guide Rod Type LEYG Series

Size: 25, 32

▶ pp. 115, 120

Guide rod type

Guide rod type/  
In-line motor type

Step Motor (Servo/24 VDC)

Servo Motor (24 VDC)

Controllers/  
Drivers

▶ p. 210

- ▶ Step data input type  
JXC51/61, LECA6 Series (64 positioning points)
- ▶ EtherCAT®/EtherNet/IP™/  
PROFINET/DeviceNet™/IO-Link/  
CC-Link direct input type  
JXCE1/91/P1/D1/L1/M1 Series
- ▶ Programless type  
LECP1 Series (14 positioning points)
- ▶ Pulse input type  
LECPA Series

The LECSB-S, LECSC-S, and LECSS-S electric actuator drivers are to be discontinued. Please select one of the substitute drivers ending with a "-T" instead: the LECSB-T, LECSC-T, and LECSS-T.

AC Servo Motor Drivers ▶ p. 264

▶ For Absolute Encoders

- Pulse input type  
LECSB(-T) Series
- CC-Link direct input type  
LECS(-T) Series
- Network card type  
LECSN-T Series
- SSCNET III type  
LECS Series
- SSCNET III/H type  
LECS-T Series
- MECHATROLINK type  
LECY□ Series

▶ For Incremental Encoders

- Pulse input type/  
Positioning type  
LECSA Series

Only the LECSA and LECSC-T are compliant. The LECSN-T is only compliant if the "Without network card" option is selected.

# LEY Series

CAT.ES100-83F

Step Motor (Servo/24 VDC)

Servo Motor (24 VDC)

Rod Type **LEY Series**/Size: 16, 25, 32, 40 **p. 35**

# Control of intermediate positioning and pushing is possible.

## High precision with ball screws

(Positioning repeatability:  $\pm 0.02$  mm)

### Selectable motor mounting position

### Non-magnetizing lock mechanism (Option)

Prevents workpieces from dropping (Holding)

### Motor cover available (Option)

\* The cover has an opening.

### Select from 2 types of actuator cables.

- Standard cable
- Robotic cable (Flexible cable)

### Manual override screw

For manual piston rod operation  
Adjustment operation is possible when the power is OFF.

### Scraper

Prevents foreign matter from entering the device

Equipped with scrapers as standard

### Select from 2 types of motors.

- **Step motor (Servo/24 VDC)**  
Ideal for the low-speed transfer of heavy loads and pushing operations
- **Servo motor (24 VDC)**  
Stable at high speeds  
Silent operation

### Mounting groove for auto switches

For checking the limit and the intermediate signal  
Applicable to the D-M9□, D-M9□E, and D-M9□W (2-color indicator)

\* The auto switches should be ordered separately. Refer to pages 105 to 107 for details.

pp. 101, 102

### Rod end brackets

Single knuckle joint

Double knuckle joint

Simple joint

### 2-color indicator solid state auto switch

Accurate setting of the mounting position can be performed without mistakes.

A **green** light lights up when within the optimum operating range.

## AC Servo Motor

### Rod Type LEY Series/Size: 25, 32, 63, 100 pp. 41, 49

- High-output motor (100/200/400/750 W)
- Improved high-speed transfer ability
- High acceleration/deceleration compatible (5000 mm/s<sup>2</sup>)
- Pulse input/CC-Link direct input/SSCNET III types/ Network card type
- With internal absolute encoder
  - \* An incremental encoder can also be selected.
- Positioning repeatability: ±0.01 mm (High-precision type)

## Large bore size: 63, 100

- High-output motor: **400 w** (Size 63)/**750 w** (Size 100)
- Max. work load [kg]

Mounting position	Size 63		Size 100
	Parallel	In-line	In-line
<b>Horizontal</b>	200	80	1200
<b>Vertical</b>	115	72	200

- Max. force [N]

Motor mounting position	Size	
	63	100
Parallel	3343	12000
In-line	1910	12000

- Max. speed\*1

Size	Speed [mm/s]
63	1000*1
100	500*1

\*1 500 mm stroke or less

- The flange mounting pitch is based on ISO 15552. (Size 100)
- The ISO cylinder (C96 ø80) and flange mounting bracket are now standardized. (Size 100)

### Application Examples

Servo-driven press machine

Replenishment unit (spring extended piston control)

# Rod Type LEY Series/Guide Rod Type LEYG Series

Step Motor (Servo/24 VDC)

Servo Motor (24 VDC)

**Guide Rod Type LEYG Series/Size: 16, 25, 32, 40** p. 109

## Compact, integrated guide rods Lateral load resistance and high non-rotating accuracy

Compatible with sliding bearings and ball bushing bearings

- **Sliding bearings**  
Suitable for lateral load applications such as when using a stopper where impact is applied
- **Ball bushing bearings**  
Smooth operation suitable for pushers and lifters

**Improved rigidity**

Lateral end load: **5 times more**\*1

\*1 Compared with the rod type, size 25, and 100 mm stroke

Top side parallel motor type

In-line motor type

Non-rotating accuracy improved by using two guide rods

Bore size [mm]	16	25	32	40
Sliding bearings	±0.06°		±0.05°	
Ball bushing bearings	±0.05°		±0.04°	

When the cylinder is retracted (initial value), the non-rotating accuracy without a load and without deflection of the guide rods will be below the values shown in the table above.

AC Servo Motor

**Guide Rod Type LEYG Series/Size: 25, 32** pp. 115, 120

Guide rod type

Guide rod type/  
In-line motor type

When using auto switches for the guide rod type LEYG series, refer to page 206.

### Mounting Variations

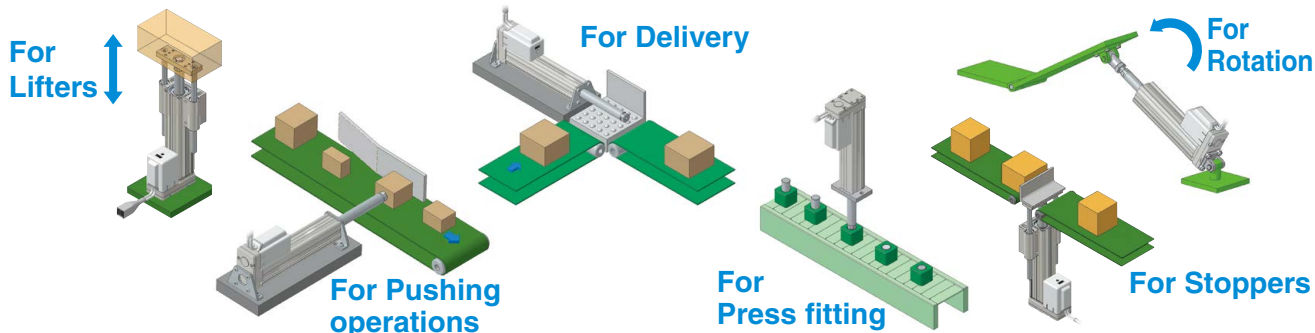

#### Direct Mounting

#### Bracket Mounting

### Application Examples

## Dust-tight/Water-jet-proof (IP65 Equivalent/IP67 Equivalent) LEY-X7 Series

\* Testing of IP65 equivalent has also been carried out.

● **Max. stroke: 500 mm**\*1

\*1 For sizes 32 and 40

### Application Examples

### Variations

Series	Enclosure	Size		Motor mounting position
		Step motor (Servo/24 VDC) Servo motor (24 VDC)	AC servo motor	
<b>LEY-X7</b> p. 155	IP65 equivalent/ IP67 equivalent	25 32 40	—	In-line
<b>LEY-X5</b> p. 160 <b>LEY63-□P</b> p. 79	IP65 equivalent	25 32	25 32 63	Top side parallel, Right side parallel*1, Left side parallel*1, In-line

\*1 Size 63 only

<When a PC is used>  
Controller setting software

- Step data setting, test drive, jogging, and move for the constant rate can be set and operated on one screen.

Setting of jog and speed of the constant rate

Jogging

Start testing

Step data setting

Move for the constant rate

<When a TB (teaching box) is used>

- The simple screen without scrolling promotes ease of setting and operation.
- Choose an icon from the first screen to select a function.
- Set the step data and check the monitor on the second screen.

Example of setting the step data

After entering the values, they can be registered by pressing “SET.”

Example of checking the operation status

The operation status can be checked.

Teaching box screen

- Data can be set by inputting only the position and speed. (Other conditions are preset.)

Step	Axis 1
Step No.	0
Posn	50.00 mm
Speed	200 mm/s

Step	Axis 1
Step No.	1
Posn	80.00 mm
Speed	100 mm/s

## ⊙ “Normal Mode” for detailed setting

Select “Normal Mode” when detailed setting is required.

- Step data can be set in detail.
- Parameters can be set.
- Signals and terminal status can be monitored.
- JOG and constant rate movement, return to origin, test drive, and testing of forced output can be performed.

### <When a PC is used> Controller setting software

- Step data setting, parameter setting, monitoring, teaching, etc., are displayed in different windows.

**Step data setting window**

## The actuator and controller are provided as a set. (They can be ordered separately as well.)

Confirm that the combination of the controller and actuator is correct.

<Check the following before use.>

- ① Check the actuator label for the model number. This number should match that of the controller.
- ② Check that the Parallel I/O configuration matches (NPN or PNP).

Actuator

Controller

## Fieldbus Network

# Fieldbus-compatible Gateway (GW) Unit

## LEC-G Series p.225

- Conversion unit for Fieldbus network and LEC serial communication

Applicable Fieldbus protocols: **CC-Link V2** **DeviceNet** **PROFIBUS** **EtherNet/IP**

- Two methods of operation

Step data input: Operate using preset step data in the controller.

Numerical data input: The actuator operates using values such as position and speed from the PLC.

- Values such as position and speed can be checked on the PLC.

**Programless Type *LECP1 Series*** p. 229

**No programming required!**

Allows for the setting up of electric actuator operation without using a PC or teaching box

Step motor (Servo/24 VDC) **LECP1**

**1 Setting the position number**

Set a registered number for the stop position. Max. 14 points

**2 Setting the stop position**

Move the actuator to the desired stop position using the FORWARD and REVERSE buttons.

**3 Registration**

Register the stop position using the SET button.

**Speed/Acceleration 16-level adjustment**

**Pulse Input Type *LECPA Series*** p. 235

- This driver uses pulse signals to allow positioning at any position. The actuator can be controlled from the customers' positioning unit.

- **Return-to-origin command signal**  
Enables automatic return-to-origin action
- **With force limit function (Pushing force/Gripping force operation available)**  
Pushing force/Positioning operation is possible by switching signals.

△: Can be set from TB Ver. 2.\*\* (The version information is displayed on the initial screen.)

\*1 The LECP1 programless type cannot be used with the teaching box and controller setting kit.

## Fieldbus Network

# EtherCAT®/EtherNet/IP™/PROFINET™/DeviceNet™/IO-Link/CC-Link Direct Input Type Step Motor Controller/JXC□ Series p. 241

### Two types of operation command

**Step no. defined operation:** Operate using the preset step data in the controller.  
**Numerical data defined operation:** The actuator operates using values such as position and speed from the PLC.

### Numerical monitoring available

Numerical information, such as the current speed, current position, and alarm codes, can be monitored on the PLC.

### Transition wiring of communication cables

Two communication ports are provided.  
 \* For the DeviceNet™ type, transition wiring is possible using a branch connector.  
 \* 1 to 1 in the case of IO-Link

## Application

Communication protocols  
 EtherCAT® EtherNet/IP™ PROFINET™ DeviceNet™ IO-Link CC-Link

Both air and electric systems can be established under the same protocol.

Can be additionally installed in an existing network

### <Applicable Electric Actuators>

# Multi-Axis Step Motor Controller

- Speed tuning control\*<sup>1</sup>  
(3 Axes: JXC92 4 Axes: JXC73/83/93)
- Linear/circular interpolation

- Positioning/pushing operation
- Step data input  
(Max. 2048 points)
- Space saving, reduced wiring
- Absolute/relative position coordinate instructions

\*1 This controls the speed of the following axis when the speed of the primary axis drops due to the effects of an external force and when a speed difference with the following axis occurs. This control is not for synchronizing the position of the primary axis and following axis.

## For 3 Axes **JXC92 Series** p. 247

- EtherNet/IP™ Type
- Width: Approx. **38%** reduction

## For 4 Axes **JXC73/83/93 Series** p. 249

- Parallel I/O/  
EtherNet/IP™ Type
- Width: Approx. **18%** reduction

\* For LEC□, size 25 or larger

**JXC92 Series**

**Step Data Input: Max. 2048 points**

**For 3 Axes** 3-axis operation can be set collectively in one step.

Step	Axis	Movement mode	Speed	Position	Acceleration	Deceleration	Pushing force	Trigger LV	Pushing speed	Moving force	Area 1	Area 2	In position	Comments
			mm/s	mm	mm/s <sup>2</sup>	mm/s <sup>2</sup>					mm	mm		
0	Axis 1	ABS	500	100.00	3000	3000	0	85.0	50	100.0	10.0	30.0	0.5	
	Axis 2	ABS	500	100.00	3000	3000	0	85.0	50	100.0	10.0	30.0	0.5	
	Axis 3	ABS	500	100.00	3000	3000	0	85.0	50	100.0	10.0	30.0	0.5	
1	Axis 1	INC	500	200.00	3000	3000	0	85.0	50	100.0	0	0	0.5	
	Axis 2	INC	500	200.00	3000	3000	0	85.0	50	100.0	0	0	0.5	
	Axis 3	INC	500	200.00	3000	3000	0	85.0	50	100.0	0	0	0.5	
⋮	⋮	⋮	⋮	⋮	⋮	⋮	⋮	⋮	⋮	⋮	⋮	⋮	⋮	⋮
2046	Axis 1	SYN-I	500	100.00	3000	3000	0	0	0	100.0	0	0	0.5	
	Axis 2	SYN-I	0	0.00	0	0	0	0	0	100.0	0	0	0.5	
	Axis 3	SYN-I	0	0.00	0	0	0	0	0	100.0	0	0	0.5	
2047	Axis 1	CIR-R	500	0.00	3000	3000	0	0	0	100.0	0	0	0.5	
	Axis 2	CIR-R	0	50.00	0	0	0	0	0	100.0	0	0	0.5	
	Axis 3*1		0	0.00	0	0	0	0	0	100.0	0	0	0.5	
	Axis 4*1		0	25.00	0	0	0	0	0	100.0	0	0	0.5	

\*1 When circular interpolation (CIR-R, CIR-L, CIR-3) is selected in the movement mode, input the X and Y coordinates in the rotation center position or input the X and Y coordinates in the passing position.

Movement mode	Pushing operation	Details
Blank	×	Invalid data (Invalid process)
ABS	○	Moves to the absolute coordinate position based on the origin of the actuator
INC	○	Moves to the relative coordinate position based on the current position
LIN-A	×	Moves to the absolute coordinate position based on the origin of the actuator by linear interpolation
LIN-I	×	Moves to the relative coordinate position based on the current position by linear interpolation
CIR-R*2	×	With Axis 1 assigned to the X-axis and Axis 2 to the Y-axis, it moves in the clockwise direction by circular interpolation. The target position and rotation center position are specified according to the relative coordinates from the current position. The position data is assigned as follows. Axis 1: Target position X Axis 2: Target position Y Axis 3*1: Rotation center position X Axis 4*1: Rotation center position Y
CIR-L*2	×	With Axis 1 assigned to the X-axis and Axis 2 to the Y-axis, it moves in the counter-clockwise direction by circular interpolation. The target position and rotation center position are specified according to the relative coordinates from the current position. The position data is assigned as follows. Axis 1: Target position X Axis 2: Target position Y Axis 3*1: Rotation center position X Axis 4*1: Rotation center position Y
SYN-I	×	Moves to the relative coordinate position based on the current position by speed tuning control*3
CIR-3*2	×	With Axis 1 assigned to the X-axis and Axis 2 to the Y-axis, it moves based on the three specified points by circular interpolation. The target position and passing position are specified according to the relative coordinates from the current position. The position data is assigned as follows. Axis 1: Target position X Axis 2: Target position Y Axis 3*1: Passing position X Axis 4*1: Passing position Y

\*2 Performs a circular operation on a plane using Axis 1 and Axis 2

\*3 This controls the speed of the following axis when the speed of the primary axis drops due to the effects of an external force and when a speed difference with the following axis occurs. This control is not for synchronizing the position of the primary axis and following axis.

## JXC73/83/93 Series

Step Data Input: Max. 2048 points

**For 4 Axes** 4-axis operation can be set collectively in one step.

Movement mode	Pushing operation	Details
Blank	×	Invalid data (Invalid process)
ABS	○	Moves to the absolute coordinate position based on the origin of the actuator
INC	○	Moves to the relative coordinate position based on the current position
LIN-A	×	Moves to the absolute coordinate position based on the origin of the actuator by linear interpolation
LIN-I	×	Moves to the relative coordinate position based on the current position by linear interpolation
CIR-R*1	×	With Axis 1 assigned to the X-axis and Axis 2 to the Y-axis, it moves in the clockwise direction by circular interpolation. The target position and rotation center position are specified according to the relative coordinates from the current position. The position data is assigned as follows. Axis 1: Target position X Axis 2: Target position Y Axis 3: Rotation center position X Axis 4: Rotation center position Y
CIR-L*1	×	With Axis 1 assigned to the X-axis and Axis 2 to the Y-axis, it moves in the counter-clockwise direction by circular interpolation. The target position and rotation center position are specified according to the relative coordinates from the current position. The position data is assigned as follows. Axis 1: Target position X Axis 2: Target position Y Axis 3: Rotation center position X Axis 4: Rotation center position Y
SYN-I	×	Moves to the relative coordinate position based on the current position by speed tuning control*2

\*1 Performs a circular operation on a plane using Axis 1 and Axis 2

\*2 This controls the speed of the following axis when the speed of the primary axis drops due to the effects of an external force and when a speed difference with the following axis occurs. This control is not for synchronizing the position of the primary axis and following axis.

## Controller Setting Software (Connection with a PC)

For 3 Axes JXC92 For 4 Axes JXC73/83/93

### Easy file management

Load	The step data is loaded from the file.
Save	The step data is saved in a file.
Upload	The step data is loaded from the controller.
Download	The step data is written in the controller.

### Abundant edit functions

Copy	The selected step data is copied to the clipboard.
Delete	The selected step data is deleted.
Cut	The selected step data is cut.
Paste (Insert)	The step data copied to the clipboard is inserted into the cursor's position.
Paste (Overwrite)	The step data copied to the clipboard overwrites the data at the cursor position.
Insert	A blank line is inserted in the selected step data line.

### Step data window

### Operation confirmation of entered step data

Enter step number	Enter the step number to be executed.
Execute	Executes the specified step number.
Stop	Displays whether the step number is being executed or stopped.
All axes return to origin	Performs a return to origin of all the valid axes.

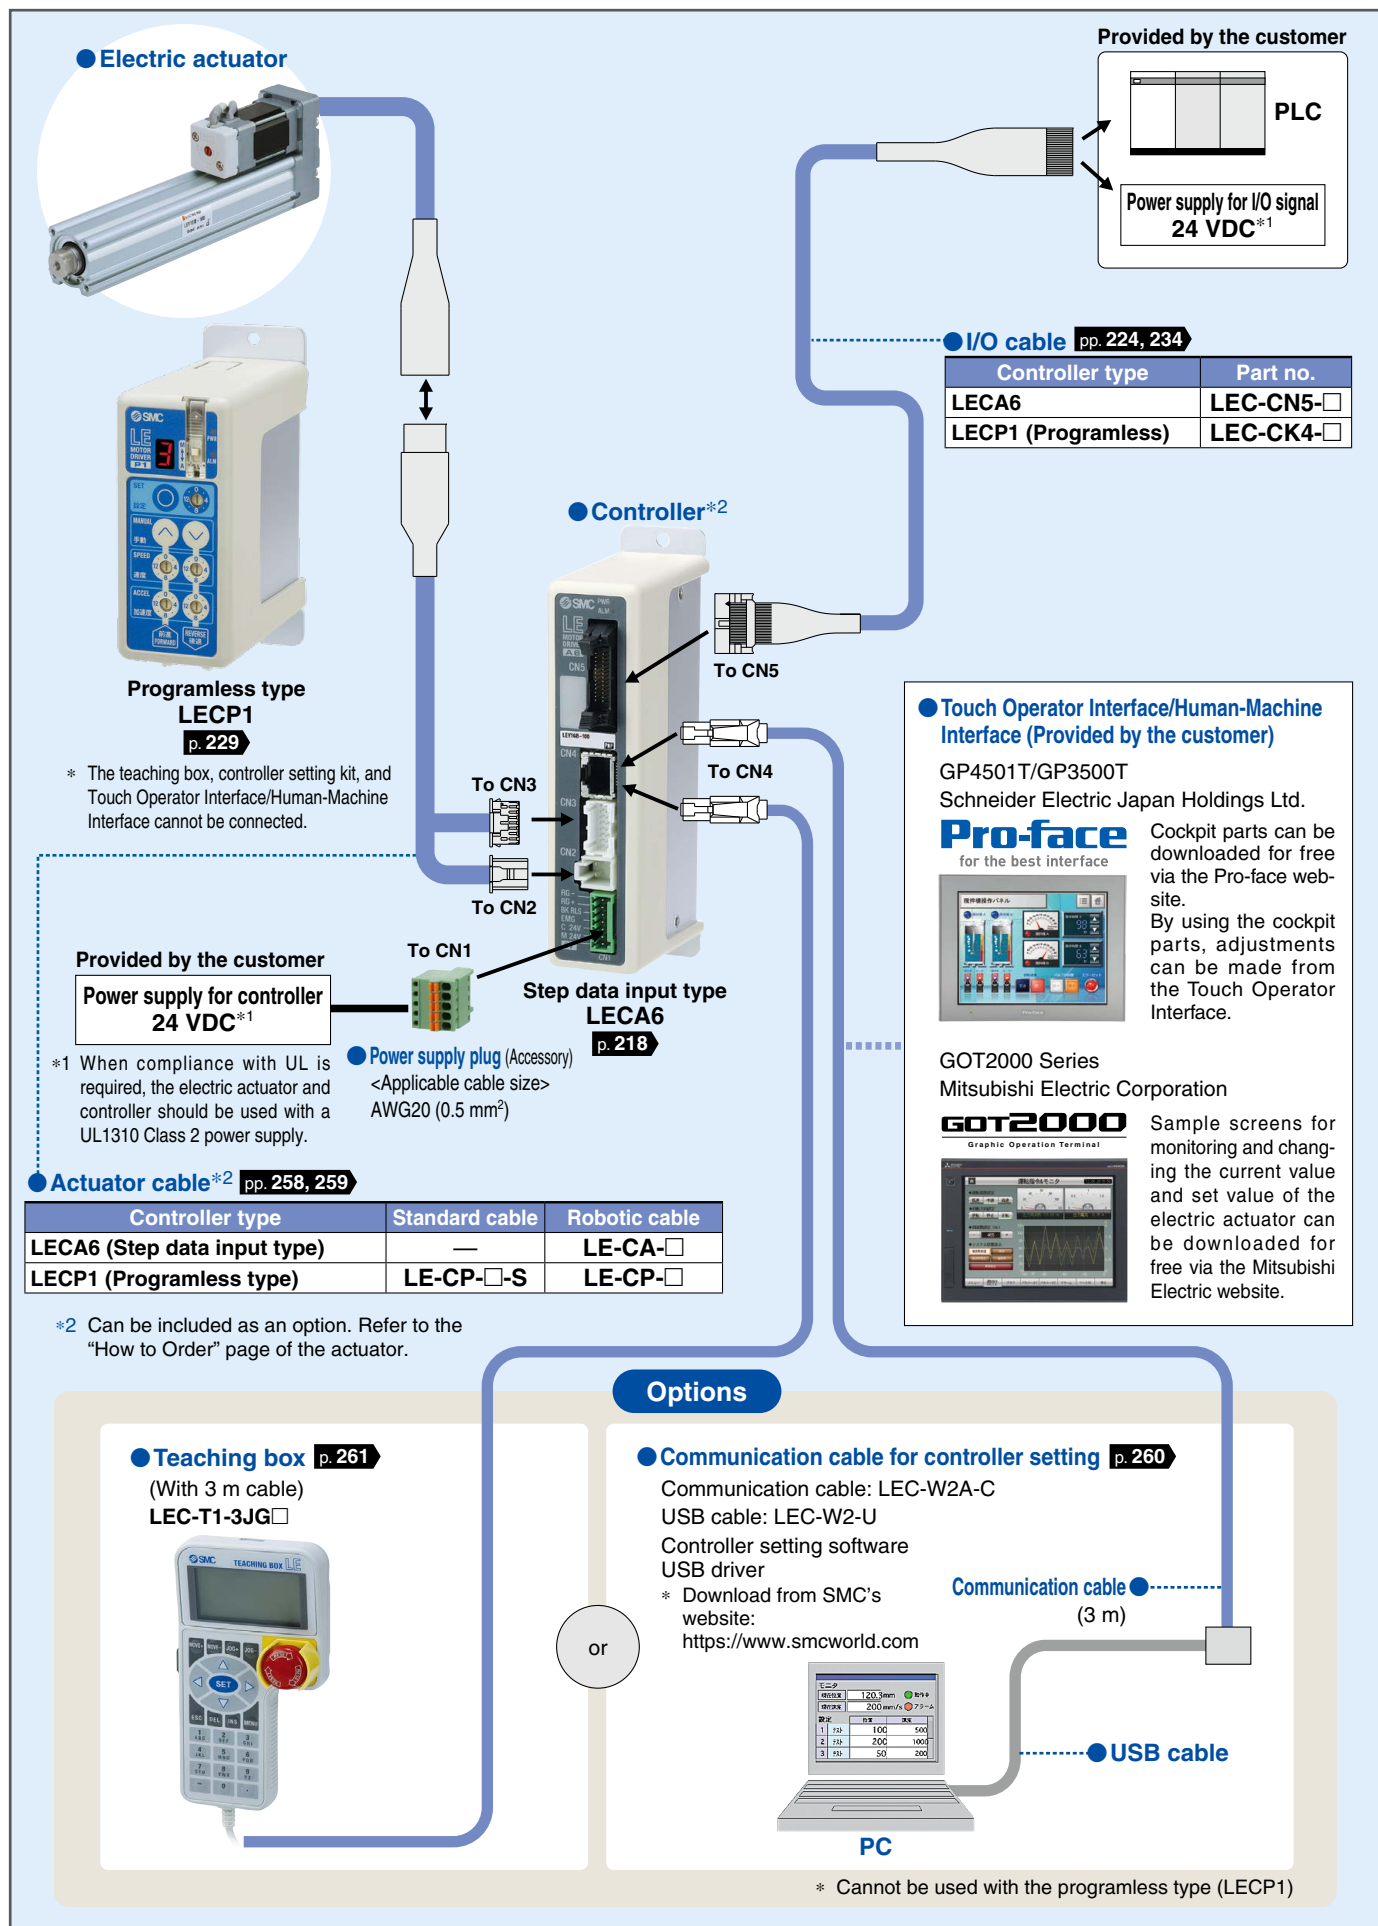

System Construction/General Purpose I/O

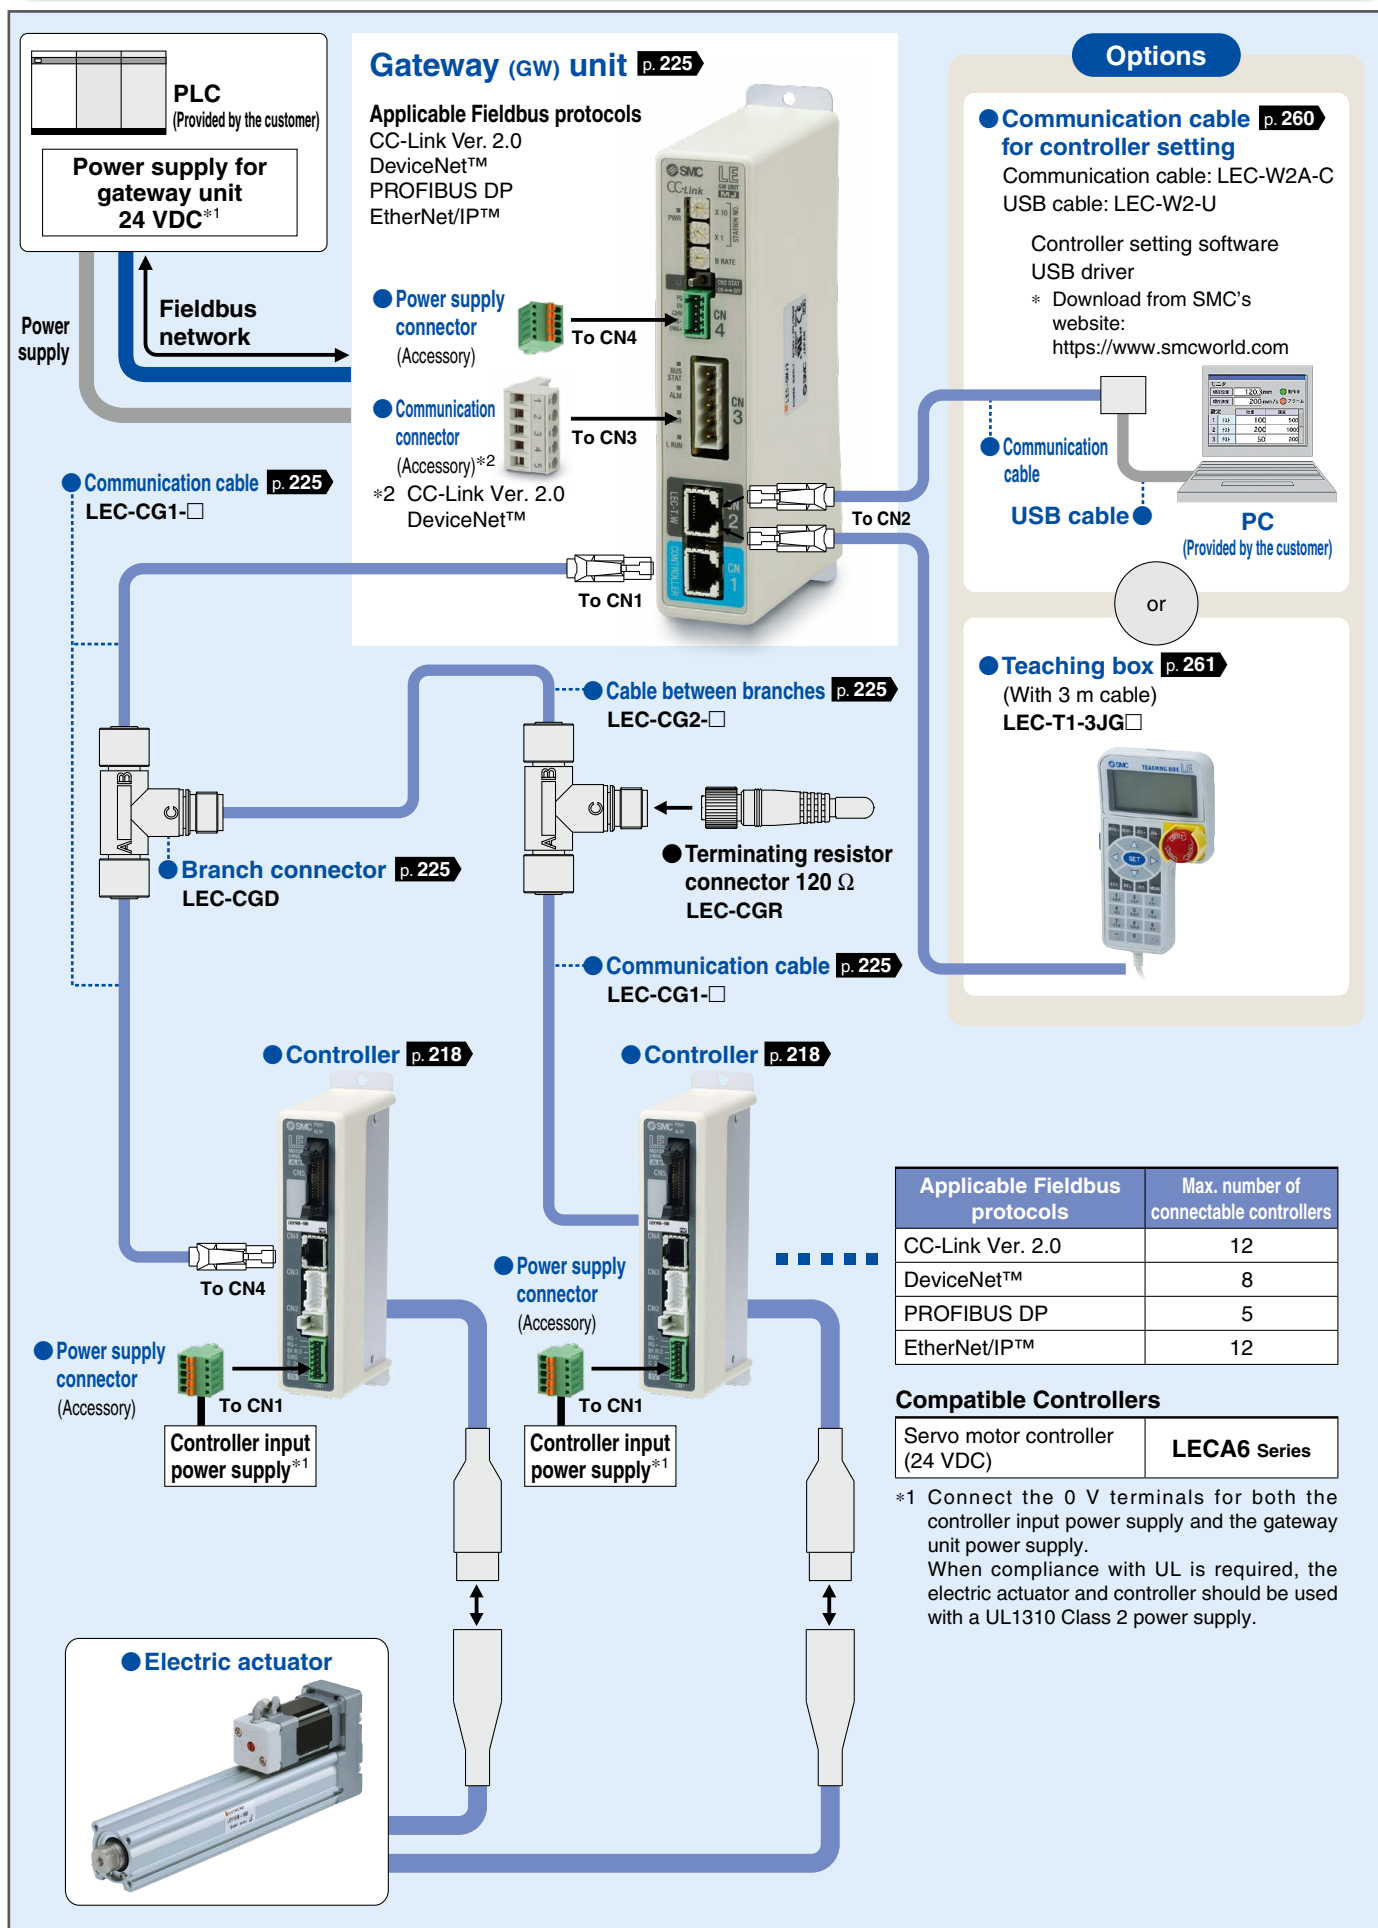

\*2 A conversion cable is also required to connect the JXC□ series controller and the LEC□ series communication cable (LEC-W2A-C). (A conversion cable is not required for the JXC-W2A-C.)

\*1 For positioning types, the settings need to be changed in order to use the max. set values. Setup software (MR Configurator2™) LEC-MRC2 is required.  
 \*2 Available when a Mitsubishi motion controller is used as upper level equipment  
 \*3 Available when a motion controller is used as upper level equipment  
 \*4 The LECSB2-T is only applicable when the control method is positioning. The point table is used to set the pushing operation settings.  
 To set the pushing operation settings, an additional dedicated file (pushing operation extension file) must be downloaded separately to be used with the setup software (MR Configurator2™: LEC-MRC2□). Please download this dedicated file from the SMC website: <https://www.smcworld.com>  
 When selecting the LECSS or LECSS2-T, combine it with upper level equipment (such as the Simple Motion module manufactured by Mitsubishi Electric Corporation) which has a pushing operation function.  
 \*\* For customer-provided PLC and motion controller setting and usage instructions, confirm with the retailer or manufacturer.  
 \*5 Only supports PROFINET and EtherCAT®

## Gain adjustment using auto tuning

### Auto-tuning function

- Controls the difference between the command value and the actual action

### Vibration suppression control function

- Automatically suppresses low-frequency machine vibrations (1 to 100 Hz)

## With display setting function

### One-touch adjustment button

One-touch servo adjustment

### Display

Display the monitor, parameters, and alarm.

### Settings

Set the parameters, monitor display, etc., with push buttons.

LECSA

### Display

Display the monitor, parameters, and alarm.

### Settings

Set the parameters, monitor display, etc., with push buttons.

(With the front cover opened)

LECSB

### Display

Display the communication status with the driver, the alarm, and the point table no.

### Settings

Control the Baud rate, station number, and the occupied station count.

(With the front cover opened)

LECSB

### Display

Display the communication status with the driver and the alarm.

### Settings

Switches for selecting the axis and switching to the test operation

(With the front cover opened)

LECSB

### Display

Display the monitor, parameters, and alarm.

### Settings

Set the parameters, monitor display, etc., with push buttons.

(With the front cover opened)

LECSB-T

### Display

Display the communication status with the driver, the alarm, and the point table no.

### Settings

Control the Baud rate, station number, and the occupied station count.

(With the front cover opened)

LECSB-T

### Display

Display the communication status with the driver and the alarm.

### Settings

Switches for axis setting, control axis deactivation, switching to the test operation, etc.

LECS2-T

### Display

Display the communication status with the driver and the alarm.

### Settings

Switches for axis setting, switching to the test operation, etc.

LECS-T

### Settings

Switches for station address, communication speed, number of transmission bytes, etc.

### Display

Display the driver status and alarm.

LECYM

### Settings

Switches for station address, number of transmission bytes, etc.

### Display

Display the driver status and alarm.

## Selection Procedure

### Positioning Control Selection Procedure

**Step 1** Check the work load–speed.  
(Vertical transfer)

**Step 2** Check the cycle time.

### Selection Example

#### Operating conditions

- Workpiece mass: 4 [kg]
- Speed: 100 [mm/s]
- Acceleration/Deceleration: 3000 [mm/s<sup>2</sup>]
- Stroke: 200 [mm]
- Workpiece mounting condition: Vertical upward downward transfer

<Speed-Vertical work load graph>  
(LEY16/Step motor)

**Step 1** Check the work load–speed. <Speed-Vertical work load graph>

Select a model based on the workpiece mass and speed while referencing the speed-vertival work load graph.

Selection example) The **LEY16B** can be temporarily selected as a possible candidate based on the graph shown on the right side.

\* It is necessary to mount a guide outside the actuator when used for horizontal transfer. When selecting the target model, refer to the horizontal work load in the specifications on pages 59 and 60 and the precautions.

**Step 2** Check the cycle time.

Calculate the cycle time using the following calculation method.

#### Cycle time:

T can be found from the following equation.

$$T = T1 + T2 + T3 + T4 \text{ [s]}$$

- T1: Acceleration time and T3: Deceleration time can be found by the following equation.

$$T1 = V/a1 \text{ [s]}$$

$$T3 = V/a2 \text{ [s]}$$

- T2: Constant speed time can be found from the following equation.

$$T2 = \frac{L - 0.5 \cdot V \cdot (T1 + T3)}{V} \text{ [s]}$$

- T4: Settling time varies depending on the conditions such as motor types, load and in position of the step data. Therefore, calculate the settling time while referencing the following value.

$$T4 = 0.2 \text{ [s]}$$

Calculation example)

T1 to T4 can be calculated as follows.

$$T1 = V/a1 = 100/3000 = 0.033 \text{ [s]}, T3 = V/a2 = 100/3000 = 0.033 \text{ [s]}$$

$$T2 = \frac{L - 0.5 \cdot V \cdot (T1 + T3)}{V} = \frac{200 - 0.5 \cdot 100 \cdot (0.033 + 0.033)}{100} = 1.97 \text{ [s]}$$

$$T4 = 0.2 \text{ [s]}$$

The cycle time can be found as follows.

$$T = T1 + T2 + T3 + T4 = 0.033 + 1.967 + 0.033 + 0.2 = 2.233 \text{ [s]}$$

- L : Stroke [mm] ... (Operating condition)
- V : Speed [mm/s] ... (Operating condition)
- a1: Acceleration [mm/s<sup>2</sup>] ... (Operating condition)
- a2: Deceleration [mm/s<sup>2</sup>] ... (Operating condition)

- T1: Acceleration time [s] ... Time until reaching the set speed
- T2: Constant speed time [s] ... Time while the actuator is operating at a constant speed
- T3: Deceleration time [s] ... Time from the beginning of the constant speed operation to stop
- T4: Settling time [s] ... Time until positioning is completed

Based on the above calculation result, the **LEY16B-200** should be selected.

## Selection Procedure

### Pushing Control Selection Procedure

\* The duty ratio is a ratio of the operation time in one cycle.

### Selection Example

#### Operating conditions

- Mounting condition: Horizontal (pushing)
- Attachment weight: 0.2 [kg]
- Pushing force: 60 [N]
- Duty ratio: 20 [%]
- Speed: 100 [mm/s]
- Stroke: 200 [mm]

#### Step 1 Check the duty ratio.

##### <Conversion table of pushing force–duty ratio>

Select the [Pushing force] from the duty ratio while referencing the conversion table of pushing force–duty ratio.

Selection example)

Based on the table below,

- Duty ratio: 20 [%]

The pushing force set value will be 70 [%].

##### <Conversion table of pushing force–duty ratio>

##### (LEY16/Step motor)

Pushing force set value [%]	Duty ratio [%]	Continuous pushing time [min]
40 or less	100	—
50	70	12 or less
70	20	1.3 or less
85	15	0.8 or less

\* [Pushing force set value] is one of the step data input to the controller.

\* [Continuous pushing time] is the time that the actuator can continuously keep pushing.

$$\text{Duty ratio} = A/B \times 100 [\%]$$

##### <Force conversion graph> (LEY16/Step motor)

\*1 Set values for the controller

#### Step 2 Check the pushing force.

##### <Force conversion graph>

Select a model based on the pushing force set value and force while referencing the force conversion graph.

Selection example)

Based on the graph shown on the right side,

- Pushing force set value: 70 [%]

- Pushing force: 60 [N]

The LEY16B can be temporarily selected as a possible candidate.

#### Step 3 Check the lateral load on the rod end.

##### <Graph of allowable lateral load on the rod end>

Confirm the allowable lateral load on the rod end of the actuator: LEY16□, which has been selected temporarily while referencing the graph of allowable lateral load on the rod end.

Selection example)

Based on the graph shown on the right side,

- Attachment weight: 0.2 [kg] ≈ 2 [N]

- Product stroke: 200 [mm]

The lateral load on the rod end is in the allowable range.

##### <Graph of allowable lateral load on the rod end>

Based on the above calculation result, the LEY16B-200 should be selected.

LEY25	A/B/C	21 to 35	50 to 65%	LEY25□A	A/B/C	21 to 35	80 to 95%
LEY32	A	24 to 30	60 to 85%	LEY40	A	24 to 30	50 to 65%
	B/C	21 to 30					
LEY40	A	24 to 30	50 to 65%		B/C	21 to 30	
	B/C	21 to 30					

There is a limit to the pushing force in relation to the pushing speed. If the product is operated outside of the range (low pushing force), the completion signal [INP] may be output before the pushing operation has been completed (during the moving operation). If operating with the pushing speed below the min. speed, please check for operating problems before using the product.

### <Set Values for Vertical Upward Transfer Pushing Operations>

For vertical loads (upward), set the pushing force to the max. value shown below and operate at the work load or less.

## Selection Procedure

### Positioning Control Selection Procedure

### Selection Example

#### Operating conditions

- Workpiece mass: 16 [kg]
- Speed: 300 [mm/s]
- Acceleration/Deceleration: 5000 [mm/s<sup>2</sup>]
- Stroke: 300 [mm]
- Workpiece mounting condition: Vertical upward downward transfer

<Speed-Vertical work load graph> (LEY25)

#### Step 1 Check the work load-speed. <Speed-Vertical work load graph>

Select a model based on the workpiece mass and speed while referencing the speed-vertical work load graph.

Selection example) The **LEY25B** can be temporarily selected as a possible candidate based on the graph shown on the right side.

\* It is necessary to mount a guide outside the actuator when used for horizontal transfer. When selecting the target model, refer to the horizontal work load in the specifications on pages 71, 72, 80, 87, and 183 and the precautions.

The regeneration option may be necessary. Refer to pages 43 and 44 for the "Required Conditions for the Regeneration Option."

#### Step 2 Check the cycle time.

Calculate the cycle time using the following calculation method.

##### Cycle time:

T can be found from the following equation.

$$T = T1 + T2 + T3 + T4 \text{ [s]}$$

- T1: Acceleration time and T3: Deceleration time can be found by the following equation.

$$T1 = V/a1 \text{ [s]} \quad T3 = V/a2 \text{ [s]}$$

- T2: Constant speed time can be found from the following equation.

$$T2 = \frac{L - 0.5 \cdot V \cdot (T1 + T3)}{V} \text{ [s]}$$

- T4: Settling time varies depending on the motor type and load. The value below is recommended.

$$T4 = 0.05 \text{ [s]}$$

- L : Stroke [mm] ... (Operating condition)
- V : Speed [mm/s] ... (Operating condition)
- a1 : Acceleration [mm/s<sup>2</sup>] ... (Operating condition)
- a2 : Deceleration [mm/s<sup>2</sup>] ... (Operating condition)

- T1: Acceleration time [s] ... Time until reaching the set speed
- T2: Constant speed time [s] ... Time while the actuator is operating at a constant speed
- T3: Deceleration time [s] ... Time from the beginning of the constant speed operation to stop
- T4: Settling time [s] ... Time until positioning is completed

Calculation example)

T1 to T4 can be calculated as follows.

$$T1 = V/a1 = 300/5000 = 0.06 \text{ [s]}, \quad T3 = V/a2 = 300/5000 = 0.06 \text{ [s]}$$

$$T2 = \frac{L - 0.5 \cdot V \cdot (T1 + T3)}{V} = \frac{300 - 0.5 \cdot 300 \cdot (0.06 + 0.06)}{300} = 0.94 \text{ [s]}$$

$$T4 = 0.05 \text{ [s]}$$

The cycle time can be found as follows.

$$T = T1 + T2 + T3 + T4 = 0.06 + 0.94 + 0.06 + 0.05 = 1.11 \text{ [s]}$$

Based on the above calculation result, the **LEY25S2B-300** should be selected.

## Selection Procedure

### Force Control Selection Procedure

\* The duty ratio is a ratio of the operation time in one cycle.

### Selection Example

#### Operating conditions

- Mounting condition: Horizontal (pushing)
- Attachment weight: 0.5 [kg]
- Force: 255 [N]
- Duty ratio: 60 [%]
- Speed: 100 [mm/s]
- Stroke: 300 [mm]

#### Step 1 Check the duty ratio.

##### <Conversion table of force–duty ratio>

Select the [Force] from the duty ratio while referencing the conversion table of force–duty ratio.

Selection example)

Based on the table below,

- Duty ratio: 60 [%]

Torque limit/Command value will be 30 [%].

##### <Conversion table of force–duty ratio>

(LEY25/AC Servo motor)

Torque limit/Command value [%]	Duty ratio [%]	Continuous pushing time [min]
25 or less	100	—
30	60	1.5 or less

\* [Torque limit/Command value [%]] is the set value for the driver.

\* [Continuous pushing time] is the time that the actuator can continuously keep pushing.

$$\text{Duty ratio} = \frac{A}{B} \times 100 [\%]$$

<Force conversion graph>  
(LEY25)

#### Step 2 Check the force.

##### <Force conversion graph>

Select a model based on the torque limit/command value and pushing force while referencing the force conversion graph.

Selection example)

Based on the graph shown on the right side,

- Torque limit/Command value: 30 [%]
- Force: 255 [N]

The **LEY25B** can be temporarily selected as a possible candidate.

#### Step 3 Check the lateral load on the rod end.

##### <Graph of allowable lateral load on the rod end>

Confirm the allowable lateral load on the rod end of the actuator: LEY25B, which has been selected temporarily while referencing the graph of allowable lateral load on the rod end.

Selection example)

Based on the graph shown on the right side,

- Attachment weight: 0.5 [kg]  $\approx$  5 [N]
- Product stroke: 300 [mm]

The lateral load on the rod end is in the allowable range.

<Graph of allowable lateral load on the rod end>

**Based on the above calculation result, the LEY25S2B-300 should be selected.**

\* For pushing operations, check the list of applicable drivers. (Refer to page 23.)

**LEY-X5 Series** ▶ p. 187   **25A-LEY Series** ▶ p. 201

## Selection Procedure

### Positioning Control Selection Procedure

### Selection Example

#### Operating conditions

- Workpiece mass: 16 [kg]
- Speed: 300 [mm/s]
- Acceleration/Deceleration: 5000 [mm/s<sup>2</sup>]
- Stroke: 300 [mm]
- Workpiece mounting condition: Vertical upward downward transfer

<Speed-Vertical work load graph> (LEY25)

#### Step 1 Check the work load-speed. <Speed-Vertical work load graph>

Select a model based on the workpiece mass and speed while referencing the speed-vertical work load graph.

Selection example) The **LEY25B** can be temporarily selected as a possible candidate based on the graph shown on the right side.

\* It is necessary to mount a guide outside the actuator when used for horizontal transfer. When selecting the target model, refer to the horizontal work load in the specifications on pages 93 and 94 and the precautions.

The regenerative resistor may be necessary. Refer to pages 51 and 52 for the "Required Conditions for the Regenerative Resistor (Guide)."

#### Step 2 Check the cycle time.

Calculate the cycle time using the following calculation method.

##### Cycle time:

T can be found from the following equation.

$$T = T1 + T2 + T3 + T4 \text{ [s]}$$

- T1: Acceleration time and T3: Deceleration time can be found by the following equation.

$$T1 = V/a1 \text{ [s]} \quad T3 = V/a2 \text{ [s]}$$

- T2: Constant speed time can be found from the following equation.

$$T2 = \frac{L - 0.5 \cdot V \cdot (T1 + T3)}{V} \text{ [s]}$$

- T4: Settling time varies depending on the motor type and load. The value below is recommended.

$$T4 = 0.05 \text{ [s]}$$

Calculation example)

T1 to T4 can be calculated as follows.

$$T1 = V/a1 = 300/5000 = 0.06 \text{ [s]}, \quad T3 = V/a2 = 300/5000 = 0.06 \text{ [s]}$$

$$T2 = \frac{L - 0.5 \cdot V \cdot (T1 + T3)}{V} = \frac{300 - 0.5 \cdot 300 \cdot (0.06 + 0.06)}{300} = 0.94 \text{ [s]}$$

$$T4 = 0.05 \text{ [s]}$$

The cycle time can be found as follows.

$$T = T1 + T2 + T3 + T4 = 0.06 + 0.94 + 0.06 + 0.05 = 1.11 \text{ [s]}$$

- L : Stroke [mm] ... (Operating condition)
- V : Speed [mm/s] ... (Operating condition)
- a1: Acceleration [mm/s<sup>2</sup>] ... (Operating condition)
- a2: Deceleration [mm/s<sup>2</sup>] ... (Operating condition)

- T1: Acceleration time [s] ... Time until reaching the set speed
- T2: Constant speed time [s] ... Time while the actuator is operating at a constant speed
- T3: Deceleration time [s] ... Time from the beginning of the constant speed operation to stop
- T4: Settling time [s] ... Time until positioning is completed

Based on the above calculation result, the **LEY25V6B-300** should be selected.

**Selection Procedure**

**Control Selection Procedure**

\* The duty ratio is a ratio of the operation time in one cycle.

**Selection Example**

**Operating conditions**

- Mounting condition: Horizontal (pushing)
- Attachment weight: 0.5 [kg]
- Force: 255 [N]
- Duty ratio: 60 [%]
- Pushing speed: 35 [mm/s]
- Stroke: 300 [mm]

**Step 1 Check the duty ratio.**

**<Conversion table of force–duty ratio>**

Select the [force] from the duty ratio while referencing the conversion table of force–duty ratio.

Selection example)

Based on the table below,

- Duty ratio: 60 [%]

Torque limit/command value will be 90 [%].

**<Conversion table of force–duty ratio>**

**(LEY25/AC Servo motor)**

Torque limit/Command value [%]	Duty ratio [%]	Continuous pushing time [min]
75 or less	100	—
90	60	1.5 or less

\* [Force set value] is one of the data input to the driver.

\* [Continuous pushing time] is the time that the actuator can continuously keep pushing.

**Step 2 Check the pushing force.**

**<Force conversion graph>**

Select a model based on the torque limit/command value and pushing force while referencing the force conversion graph.

Selection example)

Based on the graph shown on the right side,

- Torque limit/Command value: 90 [%]
- Force: 255 [N]

The **LEY25B** can be temporarily selected as a possible candidate.

**<Force conversion graph> (LEY25)**

**Step 3 Check the lateral load on the rod end.**

**<Graph of allowable lateral load on the rod end>**

Confirm the allowable lateral load on the rod end of the actuator: LEY25B, which has been selected temporarily while referencing the graph of allowable lateral load on the rod end.

Selection example)

Based on the graph shown on the right side,

- Attachment weight: 0.5 [kg] ≈ 5 [N]
- Product stroke: 300 [mm]

The lateral load on the rod end is in the allowable range.

**<Graph of allowable lateral load on the rod end>**

**Based on the above calculation result, the LEY25V6B-300 should be selected.**

## Graph of Allowable Lateral Load on the Rod End (Guide)

[Stroke] = [Product stroke] + [Distance from the rod end to the center of gravity of the workpiece]

## Rod Displacement: $\delta$ [mm]

Stroke \ Size	30	50	100	150	200	250	300	350	400	450	500	600	700	800
<b>25</b>	±0.3	±0.4	±0.7	±0.7	±0.9	±1.1	±1.3	±1.5	±1.7	—	—	—	—	—
<b>32</b>	±0.3	±0.4	±0.7	±0.6	±0.8	±1.0	±1.1	±1.3	±1.5	±1.7	±1.8	—	—	—
<b>63</b>	—	±0.5	±0.7	±0.9	±1.2	±1.1	±1.3	±1.5	±1.7	±1.9	±2.1	±1.7	±2.0	±2.2

\* The values without a load are shown.

## Non-rotating Accuracy of Rod

Size	Non-rotating accuracy $\theta$
<b>25</b>	±0.8°
<b>32</b>	±0.7°
<b>63</b>	±0.6°

\* Avoid using the electric actuator in such a way that rotational torque would be applied to the piston rod. Failure to do so may result in the deformation of the non-rotating guide, abnormal auto switch responses, play in the internal guide, or an increase in the sliding resistance.

# Electric Actuator Rod Type

- \*1 Please contact SMC for non-standard strokes as they are produced as special orders.
- \*2 When "With lock" or "With lock/motor cover" is selected for the top/right/left side parallel motor types, the motor body will stick out from the end of the body for size 16/40 with strokes of 30 mm or less. Check for interference with workpieces before selecting a model.
- \*3 The mounting bracket is shipped together with the product but does not come assembled.
- \*4 For the horizontal cantilever mounting of the rod flange, head flange, or ends tapped types, use the actuator within the following stroke range.  
·LEY25: 200 mm or less ·LEY32/40: 100 mm or less
- \*5 For the mounting of the double clevis type, use the actuator within the following stroke range.  
·LEY16: 100 mm or less ·LEY25: 200 mm or less ·LEY32/40: 200 mm or less
- \*6 The rod flange type is not available for the LEY16/40 with a 30 mm stroke and motor option "With lock," "With lock/motor cover."
- \*7 The head flange type is not available for the LEY32/40.
- \*8 Produced upon receipt of order (Robotic cable only)
- \*9 The standard cable should only be used on fixed parts.  
For use on moving parts, select the robotic cable.  
Refer to pages 258 and 259 if only the actuator cable is required.

- \*10 For details on controllers/drivers and compatible motors, refer to the compatible controllers/drivers on the next page.
- \*11 Only available for the motor type "Step motor"
- \*12 When pulse signals are open collector, order the current limiting resistor (LEC-PA-R-□) on page 240 separately.
- \*13 When "Without controller/driver" is selected for controller/driver types, I/O cable cannot be selected. Refer to page 224 (For LECA6), page 234 (For LECP1), or page 240 (For LECPA) if I/O cable is required.
- \*14 When "Pulse input type" is selected for controller/driver types, pulse input usable only with differential. Only 1.5 m cables usable with open collector
- \*15 The DIN rail is not included. It must be ordered separately.
- \*16 Select "Nil" for anything other than DeviceNet™, CC-Link, or parallel input.  
Select "Nil," "S," or "T" for DeviceNet™ or CC-Link.  
Select "Nil," "1," "3," or "5" for parallel input.

## ⚠ Caution

### [CE-compliant products]

- ① EMC compliance was tested by combining the electric actuator LEY series and the controller LEC/JXC series.  
The EMC depends on the configuration of the customer's control panel and the relationship with other electrical equipment and wiring. Therefore, compliance with the EMC directive cannot be certified for SMC components incorporated into the customer's equipment under actual operating conditions. As a result, it is necessary for the customer to verify compliance with the EMC directive for the machinery and equipment as a whole.
- ② For the servo motor (24 VDC) specification, EMC compliance was tested by installing a noise filter set (LEC-NFA). Refer to page 224 for the noise filter set. Refer to the LECA series Operation Manual for installation.

### [UL-compliant products (For the LEC series)]

When compliance with UL is required, the electric actuator and controller/driver should be used with a UL1310 Class 2 power supply.

## The actuator and controller/driver are sold as a package.

Confirm that the combination of the controller/driver and actuator is correct.

### <Check the following before use.>

- ① Check the actuator label for the model number. This number should match that of the controller/driver.
- ② Check that the Parallel I/O configuration matches (NPN or PNP).

\* Refer to the "Operation Manual" for using the products. Please download it via our website: <https://www.smcworld.com>

	Power [W] <sup>*10</sup>		2.9			5			5			5			
	Rated voltage [V]		24 VDC ±10%												

\*1 Horizontal: The max. value of the work load. An external guide is necessary to support the load (Friction coefficient of guide: 0.1 or less). The actual work load and transfer speed change according to the condition of the external guide. Also, speed changes according to the work load. Check the "Model Selection" on pages 37 and 38.

Vertical: Speed changes according to the work load. Check the "Model Selection" on pages 37 and 38.

The values shown in ( ) are the acceleration/deceleration.

Set these values to be 3000 [mm/s<sup>2</sup>] or less.

\*2 Pushing force accuracy is ±20% (F.S.).

\*3 The pushing force values for LEY16□ are 35% to 85%, for LEY25□ are 35% to 65%, for LEY32□ are 35% to 85%, and for LEY40□ are 35% to 65%.

The pushing force values change according to the duty ratio and pushing speed. Check the "Model Selection" on page 40.

\*4 The speed and force may change depending on the cable length, load, and mounting conditions. Furthermore, if the cable length exceeds 5 m, then it will decrease by up to 10% for each 5 m. (At 15 m: Reduced by up to 20%)

\*5 The allowable speed for pushing operation. When push conveying a workpiece, operate at the vertical work load or less.

\*6 A reference value for correcting errors in reciprocal operation

\*7 Impact resistance: No malfunction occurred when the actuator was tested with a drop tester in both an axial direction and a perpendicular direction to the lead screw. (The test was performed with the actuator in the initial state.)

Vibration resistance: No malfunction occurred in a test ranging between 45 to 2000 Hz. The test was performed in both an axial direction and a perpendicular direction to the lead screw. (The test was performed with the actuator in the initial state.)

\*8 Indicates the max. power during operation (including the controller). This value can be used for the selection of the power supply.

\*9 With lock only

\*10 For an actuator with lock, add the power for the lock.

Lock unit specifications	Power [W]*7 *9		Max. power 59				Max. power 96			
	Type*8		Non-magnetizing lock							
	Holding force [N]		20	39	78	78	157	294		
	Power [W]*9		2.9				5			
	Rated voltage [V]		24 VDC ±10%							

\*1 Horizontal: The max. value of the work load. An external guide is necessary to support the load (Friction coefficient of guide: 0.1 or less). The actual work load and transfer speed change according to the condition of the external guide.

Vertical: Check the "Model Selection" on page 39 for details. The values shown in ( ) are the acceleration/deceleration.

Set these values to be 3000 [mm/s²] or less.

\*2 Pushing force accuracy is ±20% (F.S.).

\*3 The thrust setting values for LEY16□ are 60% to 95% and for LEY25□ are 70% to 95%. The pushing force values change according to the duty ratio and pushing speed. Check the "Model Selection" on page 40.

\*4 The allowable speed for pushing operation. When push conveying a workpiece, operate at the vertical work load or less.

\*5 A reference value for correcting errors in reciprocal operation

\*6 Impact resistance: No malfunction occurred when the actuator was tested with a drop tester in both an axial direction and a perpendicular direction to the lead screw. (The test was performed with the actuator in the initial state.) Vibration resistance: No malfunction occurred in a test ranging between 45 to 2000 Hz. The test was performed in both an axial direction and a perpendicular direction to the lead screw. (The test was performed with the actuator in the initial state.)

\*7 Indicates the max. power during operation (including the controller). This value can be used for the selection of the power supply.

\*8 With lock only

\*9 For an actuator with lock, add the power for the lock.

In-line motor type: With lock/motor cover

### Component Parts

No.	Description	Material	Note
1	Body	Aluminum alloy	Anodized
2	Ball screw shaft	Alloy steel	
3	Ball screw nut	Synthetic resin/Alloy steel	
4	Piston	Aluminum alloy	
5	Piston rod	Stainless steel	Hard chrome plating
6	Rod cover	Aluminum alloy	
7	Bearing holder	Aluminum alloy	
8	Rotation stopper	Synthetic resin	
9	Socket	Free cutting carbon steel	Nickel plating
10	Connected shaft	Free cutting carbon steel	Nickel plating [Sizes 32 and 40 only]
11	Bushing	Bearing alloy	
12	Bearing	—	
13	Return box	Aluminum die-cast	Coating
14	Return plate	Aluminum die-cast	Coating
15	Magnet	—	
16	Wear ring holder	Stainless steel	Stroke 101 mm or more
17	Wear ring	Synthetic resin	Stroke 101 mm or more
18	Screw shaft pulley	Aluminum alloy	
19	Motor pulley	Aluminum alloy	
20	Belt	—	
21	Seal	NBR	
22	Retaining ring	Steel for spring	Phosphate coating
23	Motor	—	

No.	Description	Material	Note
24	Motor cover	Synthetic resin	Only "With motor cover"
25	Grommet	Synthetic resin	Only "With motor cover"
26	Motor block	Aluminum alloy	Anodized
27	Motor adapter	Aluminum alloy	Anodized/LEY16, 25 only
28	Hub	Aluminum alloy	
29	Spider	NBR	
30	Motor cover with lock	Aluminum alloy	Only "With lock/motor cover"
31	Cover support	Aluminum alloy	Only "With lock/motor cover"
32	Socket (Male thread)	Free cutting carbon steel	Nickel plating
33	Nut	Alloy steel	Zinc chromating

# Electric Actuator Rod Type

\* For details, refer to page 307 and onward.

## LEY Series LEY25, 32 Size 25, 32

**LEY** Series ▶ p. 91 **Dust-tight/Water-jet-proof** ▶ p. 181

**Secondary Battery Compatible** ▶ p. 199

The LECSB-S, LECS-C-S, and LECS-S electric actuator drivers are to be discontinued. The LECSB-T, LECS-C-T, and LECS-T drivers are available as substitutes. In the product number, select T6 instead of S6, or T7 instead of S7 for the **Motor type**, and select B2 instead of B1, C2 instead of C1, or S2 instead of S1 for the **Driver type**.

### How to Order

#### 1 Accuracy

Nil	Basic type
H	High-precision type

#### 2 Size

25
32

#### 3 Motor mounting position

Nil	Top side parallel
R	Right side parallel
L	Left side parallel
D	In-line

#### 4 Motor type

Symbol	Type	Output [W]	Actuator size	Compatible drivers*3
S2*1	AC servo motor (Incremental encoder)	100	25	LECSA□-S1
S3		200	32	LECSA□-S3
S6*1	AC servo motor (Absolute encoder)	100	25	LECSB□-S5 LECS-C□-S5 LECSS□-S5
S7		200	32	LECSB□-S7 LECS-C□-S7 LECSS□-S7
T6*2	AC servo motor (Absolute encoder)	100	25	LECSB2-T5 LECS-C2-T5 LECSN2-T5-□ LECSS2-T5
T7		200	32	LECSB2-T7 LECS-C2-T7 LECSN2-T7-□ LECSS2-T7

\*1 For motor type S2 and S6, the compatible driver part number suffixes are S1 and S5 respectively.

\*2 For motor type T6, the compatible driver part number is LECS□2-T5.

\*3 For details on the driver, refer to page 264.

#### 5 Lead [mm]

Symbol	LEY25	LEY32*1
A	12	16 (20)
B	6	8 (10)
C	3	4 (5)

\*1 The values shown in ( ) are the leads for the size 32 top/right/left side parallel motor types. (Equivalent leads which include the pulley ratio [1.25:1])

#### 6 Stroke [mm]

30	30
to	to
500	500

\* For details, refer to the applicable stroke table below.

#### 7 Motor option

Nil	Without option
B	With lock*1

\*1 When "With lock" is selected for the top/right/left side parallel motor types, the motor body will stick out from the end of the body for size 25 with strokes of 30 mm or less. Check for interference with workpieces before selecting a model.

#### 8 Rod end thread

Nil	Rod end female thread
M	Rod end male thread (1 rod end nut is included.)

#### 9 Mounting\*1

Symbol	Type	Motor mounting position	
		Parallel	In-line
Nil	Ends tapped/ Body bottom tapped *2	●	●
L	Foot bracket	●	—
F	Rod flange*2	●*4	●
G	Head flange*2	●*5	—
D	Double clevis*3	●	—

\*1 The mounting bracket is shipped together with the product but does not come assembled.

\*2 For the horizontal cantilever mounting of the rod flange, head flange, or ends tapped types, use the actuator within the following stroke range.  
• LEY25: 200 mm or less • LEY32: 100 mm or less

\*3 For the mounting of the double clevis type, use the actuator within the following stroke range.  
• LEY25: 200 mm or less • LEY32: 200 mm or less

\*4 The rod flange type is not available for the LEY25 with a 30 mm stroke and motor option "With lock."

\*5 The head flange type is not available for the LEY32.

#### Applicable Stroke Table

Model	Stroke [mm]	30	50	100	150	200	250	300	350	400	450	500	Manufacturable stroke range
		●	●	●	●	●	●	●	●	●	●	●	
LEY25		●	●	●	●	●	●	●	●	●	—	—	15 to 400
LEY32		●	●	●	●	●	●	●	●	●	●	●	20 to 500

\* Please contact SMC for non-standard strokes as they are produced as special orders.

For auto switches, refer to pages 104 to 107.

Motor mounting position: Parallel

Motor mounting position: In-line

### 10 Cable type\*1 \*2

Nil	Without cable
S	Standard cable
R	Robotic cable (Flexible cable)

\*1 A motor cable and encoder cable are included with the product. (A lock cable is also included if motor option "B: With lock" is selected.)

\*2 Standard cable entry direction is  
 • Parallel: (A) Axis side  
 • In-line: (B) Counter axis side  
 (Refer to page 290 for details.)

### 11 Cable length\*1 [m]

Nil	Without cable
2	2
5	5
A	10

\*1 The length of the motor, encoder, and lock cables are the same.

### 12 Driver type\*1

	Compatible drivers	Power supply voltage [V]
Nil	Without driver	—
A1	LECSA1-S□	100 to 120
A2	LECSA2-S□	200 to 230
B1	LECSB1-S□	100 to 120
B2	LECSB2-S□	200 to 230
	LECSB2-T□	200 to 240
C1	LECS1-S□	100 to 120
C2	LECS2-S□	200 to 230
	LECS2-T□	
S1	LECSS1-S□	100 to 120
S2	LECSS2-S□	200 to 230
	LECSS2-T□	200 to 240
N2	LECSN2-T□	200 to 240
E2	LECSN2-T□-E	200 to 240
92	LECSN2-T□-9	200 to 240
P2	LECSN2-T□-P	200 to 240

\*1 When a driver type is selected, a cable is included. Select the cable type and cable length.  
 Example)  
 S2S2: Standard cable (2 m) + Driver (LECSS2)  
 S2: Standard cable (2 m)  
 Nil: Without cable and driver

### 13 I/O cable length [m]\*1

Nil	Without cable
H	Without cable (Connector only)
1	1.5

\*1 When "Nil: Without driver" is selected for the driver type, only "Nil: Without cable" can be selected.  
 Refer to page 291 if an I/O cable is required. (Options are shown on page 291.)

	Power [W] at 20°C		6.3			7.9			7.9				
	Rated voltage [V]		24 VDC <sup>0</sup> / <sub>-10%</sub>										

- \*1 This is the max. value of the horizontal work load. An external guide is necessary to support the load (Friction coefficient of guide: 0.1 or less). The actual work load changes according to the condition of the external guide. Confirm the load using the actual device.
- \*2 The force setting range (set values for the driver) for the force control with the torque control mode. Set it while referencing the "Force Conversion Graph" on page 45.  
The driver applicable to the pushing operation is "LECSS".  
Combine the LECSS with upper level equipment (such as the Simple Motion module manufactured by Mitsubishi Electric Corporation) which has a pushing operation function.  
\*\* For customer-provided PLC and motion controller setting and usage instructions, confirm with the retailer or manufacturer.
- \*3 The allowable speed changes according to the stroke. Set the number of rotations according to speed.

- \*4 The allowable collision speed for collision with the workpiece with the torque control mode
- \*5 A reference value for correcting errors in reciprocal operation
- \*6 Impact resistance: No malfunction occurred when the actuator was tested with a drop tester in both an axial direction and a perpendicular direction to the lead screw. (The test was performed with the actuator in the initial state.)  
Vibration resistance: No malfunction occurred in a test ranging between 45 to 2000 Hz. The test was performed in both an axial direction and a perpendicular direction to the lead screw. (The test was performed with the actuator in the initial state.)
- \*7 Indicates the max. power during operation (including the driver)  
When selecting the power supply capacity, refer to the power supply capacity in the operation manual of each driver.
- \*8 Only when motor option "With lock" is selected

\*1 This is the max. value of the horizontal work load. An external guide is necessary to support the load (Friction coefficient of guide: 0.1 or less). The actual work load changes according to the condition of the external guide. Confirm the load using the actual device.  
\*2 The force setting range (set values for the driver) for the force control with the torque control mode. Set it while referencing the "Force Conversion Graph (Guide)" on page 46. The driver applicable to the pushing operation is "LECSB-T", and "LECSS-T".  
The LECSB2-T is only applicable when the control method is positioning. The point table is used to set the pushing operation settings. To set the pushing operation settings, an additional dedicated file (pushing operation extension file) must be downloaded separately to be used with the setup software (MR Configurator2™: LEC-MRC2□). Please download this dedicated file from the SMC website: <https://www.smcworld.com>  
When selecting the LECSS2-T, combine it with upper level equipment (such as the Simple Motion module manufactured by Mitsubishi Electric Corporation) which has a pushing operation function.  
\*\* For customer-provided PLC and motion controller setting and usage instructions, confirm with the retailer or manufacturer.

\*3 The allowable speed changes according to the stroke.  
\*4 The allowable collision speed for collision with the workpiece with the torque control mode  
\*5 A reference value for correcting errors in reciprocal operation  
\*6 Impact resistance: No malfunction occurred when the actuator was tested with a drop tester in both an axial direction and a perpendicular direction to the lead screw. (The test was performed with the actuator in the initial state.)  
Vibration resistance: No malfunction occurred in a test ranging between 45 to 2000 Hz. The test was performed in both an axial direction and a perpendicular direction to the lead screw. (The test was performed with the actuator in the initial state.)  
\*7 Indicates the max. power during operation (including the driver) When selecting the power supply capacity, refer to the power supply capacity in the operation manual of each driver.  
\*8 Only when motor option "With lock" is selected  
\*9 The resolution will change depending on the driver type.

Piston rod	GR-S-010 (10 g) GR-S-020 (20 g)

**Dimensions: Top/Right/Left Side Parallel Motor**

- \*1 This is the range within which the rod can move. Make sure that workpieces mounted on the rod do not interfere with other workpieces or the facilities around the rod.
- \*2 The direction of rod end width across flats (□K) differs depending on the products.

# Electric Actuator Rod Type

Dust-tight/Water-jet-proof (IP65 Equivalent)

\* Option

**LEY Series** LEY63 Size **63**

The LECSB-S, LECS-C, and LECS-S electric actuator drivers are to be discontinued. The LECSB-T, LECS-C-T, and LECS-T drivers are available as substitutes. In the product number, select T8 instead of S8 for the **4 Motor type**.

\* For details, refer to page 307 and onward.

LEY □ Series ▶ p. 91

Refer to pages 41 to 48 for model selection.

## How to Order

### ① Accuracy

Nil	Basic type
H	High-precision type

### ② Size

63
----

### ③ Motor mounting position

Nil	Top side parallel
R	Right side parallel
L	Left side parallel
D	In-line

### ④ Motor type

Symbol	Type	Output [W]	Actuator size	Compatible drivers
S4	AC servo motor (Incremental encoder)	400	63	LECSA2-S4
S8	AC servo motor (Absolute encoder)	400	63	LECSB2-S8 LECS2-S8 LECSS2-S8
T8	AC servo motor (Absolute encoder)	400	63	LECSB2-T8 LECS2-T8 LECSN2-T8-□ LECSS2-T8

### ⑤ Lead [mm]

Symbol	LEY63
A	20
B	10
C	5
L	2.86*1 *2

- \*1 Screw lead 5 mm, Pulley ratio [4:7] equivalent lead
- \*2 Only available for top/right/left side parallel motor types

### ⑥ Stroke [mm]

50	50
to	to
800	800

\* For details, refer to the applicable stroke table below.

### ⑦ Dust-tight/Water-jet-proof

Nil	IP5x equivalent (Dust-protected)
P	IP65 equivalent (Dust-tight/Water-jet-proof)/With vent hole tap

- \* When using the dust-tight/water-jet-proof (IP65 equivalent), correctly mount the fitting and tubing to the vent hole tap, and then place the end of the tubing in an area not exposed to dust or water.
- \* The fitting and tubing should be provided separately by the customer. Select [Applicable tubing O.D.: ø4 or more, Connection thread: Rc1/8].
- \* Cannot be used in an environment where oil such as cutting oil splashes or it is constantly exposed to water. Take appropriate protective measures. For details on enclosure, refer to the "Enclosure" on page 207.

### ⑧ Motor option

Nil	Without option
B	With lock

### ⑨ Rod end thread

Nil	Rod end female thread
M	Rod end male thread (1 rod end nut is included.)

### ⑩ Mounting\*1

Symbol	Type	Motor mounting position	
		Parallel	In-line
Nil	Ends tapped/ Body bottom tapped *2	●	●
L	Foot bracket	●	—
F	Rod flange*2	●	●
D	Double clevis*3	●	—

- \*1 The mounting bracket is shipped together with the product but does not come assembled.
- \*2 For the horizontal cantilever mounting of the rod flange or ends tapped types, use the actuator within the following stroke range.
  - LEY63: 400 mm or less
- \*3 For the mounting of the double clevis type, use the actuator within the following stroke range.
  - LEY63: 300 mm or less

### ⑪ Cable type\*1

Nil	Without cable
S	Standard cable
R	Robotic cable (Flexible cable)

- \*1 A motor cable and encoder cable are included with the product. (A lock cable is also included if motor option "B: With lock" is selected.)
- \* Standard cable entry direction is
  - Parallel: (A) Axis side
  - In-line: (B) Counter axis side
 (Refer to page 290 for details.)

### ⑫ Cable length\*2 [m]

Nil	Without cable
2	2
5	5
A	10

\*2 The length of the encoder, motor, and lock cables are the same.

### ⑬ Driver type\*

	Compatible drivers	Power supply voltage [V]
Nil	Without driver	—
A2	LECSA2-S4	200 to 230
B2	LECSB2-S8	200 to 230
	LECSB2-T8	200 to 240
C2	LECS2-S8	200 to 230
	LECS2-T8	
S2	LECSS2-S8	200 to 230
	LECSS2-T8	
N2	LECSN2-T8	200 to 240
E2	LECSN2-T8-E	200 to 240
92	LECSN2-T8-9	200 to 240
P2	LECSN2-T8-P	200 to 240

- \* When a driver type is selected, a cable is included. Select the cable type and cable length.
- Example) S2S2: Standard cable (2 m) + Driver (LECSS2)
  - S2: Standard cable (2 m)
  - Nil: Without cable and driver

### ⑭ I/O cable length [m]\*1

Nil	Without cable
H	Without cable (Connector only)
1	1.5

- \*1 When "Nil: Without driver" is selected for the driver type, only "Nil: Without cable" can be selected.
- Refer to page 291 if an I/O cable is required. (Options are shown on page 291.)

### Applicable Stroke Table

Model	Stroke [mm]	50	100	150	200	250	300	350	400	450	500	600	700	800	Manufacturable stroke range
LEY63		●	●	●	●	●	●	●	●	●	●	●	●	●	50 to 800

\* Please contact SMC for non-standard strokes as they are produced as special orders.

## Specifications

Model		LEY63S <sub>8</sub> <sup>4</sup> /T8 (Parallel)						LEY63DS <sub>8</sub> <sup>4</sup> /T8 (In-line)									
Work load [kg]	Horizontal <sup>*1</sup>	40	70	80	200	40	70	80	Force [N]/Set value <sup>*2</sup> ; 15 to 50% <sup>*3, 4</sup>	156 to 521	304 to 1012	573 to 1910	1003 to 3343	156 to 521	304 to 1012	573 to 1910	
	Vertical <sup>*11</sup>	19	38	72	115	19	38	72									
Max. speed [mm/s]	Stroke range	Up to 500	1000	500	250	70	1000	500	250	Pushing speed [mm/s] <sup>*6</sup>	30 or less			Max. acceleration/deceleration [mm/s <sup>2</sup> ]	5000		
		505 to 600	800	400	200		800	400	200								
		605 to 700	600	300	150		600	300	150								
		705 to 800	500	250	125		500	250	125								
Positioning repeatability [mm]		Basic type		±0.02			High-precision type		±0.01								
Lost motion [mm] <sup>*7</sup>		Basic type		0.1 or less			High-precision type		0.05 or less								
Screw lead [mm] (including pulley ratio)		20	10	5	5 (2.86)	20	10	5	Actuation type		Ball screw + Belt		Ball screw + Belt (Pulley ratio 4:7)		Ball screw		
Impact/Vibration resistance [m/s <sup>2</sup> ] <sup>*8</sup>		50/20		Ball screw		Sliding bushing (Piston rod)		Operating temperature range [°C]		5 to 40		Operating humidity range [%RH]		90 or less (No condensation)			
Regeneration option		May be required depending on speed and work load (Refer to pages 43 and 44.)															
Motor output/Size		400 W/□60															
Motor type		AC servo motor (200 VAC)															
Encoder <sup>*12</sup>		Motor type S4: Incremental 17-bit encoder (Resolution: 131072 p/rev) Motor type S8: Absolute 18-bit encoder (Resolution: 262144 p/rev) Motor type T8: Absolute 22-bit encoder (Resolution: 4194304 p/rev) (For LECSB2-T8, LECSS2-T8) Motor type T8: Absolute 18-bit encoder (Resolution: 262144 p/rev) (For LECSC2-T8)															
Power [W] <sup>*9</sup>		Max. power 1275															
Type <sup>*10</sup>		Non-magnetizing lock															
Holding force [N]		313	607	1146	2006	313	607	1146	Rated voltage [V]		24 VDC <sup>0</sup> <sub>-10%</sub>						

\*1 This is the max. value of the horizontal work load. An external guide is necessary to support the load (Friction coefficient of guide: 0.1 or less). The actual work load changes according to the condition of the external guide. Confirm the load using the actual device.

\*2 Set values for the driver

\*3 The force setting range (set values for the driver) for the force control with the torque control mode. The force and duty ratio change according to the set value. Set it while referencing the "Force Conversion Graph" on pages 45 and 46.

The driver applicable to the pushing operation is "LECSS", "LECSB-T", and "LECSS-T".

The LECSB2-T is only applicable when the control method is positioning. The point table is used to set the pushing operation settings.

To set the pushing operation settings, an additional dedicated file (pushing operation extension file) must be downloaded separately to be used with the setup software (MR Configurator2™: LEC-MRC2□). Please download this dedicated file from the SMC website: <https://www.smcworld.com>

When selecting the LECSB or LECSB2-T, combine it with upper level equipment (such as the Simple Motion module manufactured by Mitsubishi Electric Corporation) which has a pushing operation function.

\*\* For customer-provided PLC and motion controller setting and usage instructions, confirm with the retailer or manufacturer.

\*4 For the motor type T8, the set value is from 12 to 40%.

\*5 The allowable speed changes according to the stroke. Set the number

of rotations according to speed.

\*6 The allowable collision speed for collision with the workpiece with the torque control mode

\*7 A reference value for correcting errors in reciprocal operation

\*8 Impact resistance: No malfunction occurred when the actuator was tested with a drop tester in both an axial direction and a perpendicular direction to the lead screw. (The test was performed with the actuator in the initial state.)

Vibration resistance: No malfunction occurred in a test ranging between 45 to 2000 Hz. The test was performed in both an axial direction and a perpendicular direction to the lead screw. (The test was performed with the actuator in the initial state.)

\*9 Indicates the max. power during operation (including the driver)

When selecting the power supply capacity, refer to the power supply capacity in the operation manual of each driver.

\*10 Only when motor option "With lock" is selected

\*11 When mounting vertically and using the product facing upwards in an environment where water is present, take necessary measures to prevent water from splashing on the rod cover, because water will accumulate on the rod seal due to the structure of the product.

\*12 For motor type T8, the resolution will change depending on the driver type.

## Weight

### Product Weight

[kg]

Series		LEY63S <sub>8</sub> <sup>4</sup> (Motor mounting position: Parallel)

## Dimensions

### End male thread: LEY63□□□-□□M

\*1 The measurement 76.4 is when the unit is in the Z-phase detecting position. At this position, 4 mm from the end of the operating range.

### Foot bracket: LEY63□□□-□□L

#### Outward mounting

Included parts  
• Foot bracket  
• Body mounting bolt

Material: Carbon steel (Chromating)  
\* The overall length is when the unit is in the Z-phase detecting position. At this position, 4 mm from the end of the operating range.  
\* When the motor mounting is the right or left side parallel type, the head side foot bracket should be mounted outward.

	[mm]	
Stroke range [mm]	LA	LS
50 to 200	200.8	133.2
201 to 500	235.8	168.2
501 to 800	270.8	203.2

### Rod flange: LEY63□□□-□□F

Included parts  
• Flange  
• Body mounting bolt

Material: Carbon steel (Nickel plating)  
\*1 When the unit is in the Z-phase detecting position. At this position, 4 mm from the end of the operating range.

### Double clevis: LEY63□□□-□□D

Included parts  
• Double clevis  
• Body mounting bolt  
• Clevis pin  
• Retaining ring

Material: Cast iron (Coating)  
\* The overall length is when the unit is in the Z-phase detecting position. At this position, 4 mm from the end of the operating range.

	[mm]	
Stroke range [mm]	DA	CL
50 to 200	236.6	222.6
201 to 500	271.6	257.6
501 to 800	306.6	292.6

# Electric Actuator Rod Type

**LEY Series** LEY100 Size 100

Refer to pages 41 to 48 for model selection.

## How to Order

**1** Size  
100

**2** Motor mounting position

Nil	Top side parallel
R	Right side parallel
L	Left side parallel
D	In-line

**3** Motor type

Symbol	Type	Output [W]	Actuator size	Compatible drivers
T9	AC servo motor (Absolute encoder)	750	100	LECSB2-T9 LECS2-T9 LECSS2-T9 LECSN2-T9(□)

**4** Lead [mm]

Symbol	LEY100
B	10
D	3.33*1
L	2*2

**5** Stroke [mm]

100	100
to	to
1000	1000

**6** Motor option

Nil	Without option
B	With lock

**7** Rod end thread

Nil	Rod end female thread
M	Rod end male thread (1 rod end nut is included.)

\*1 Screw lead 10 mm, reducer ratio [1/3]  
\*2 Screw lead 10 mm, reducer ratio [1/5]

\* For details, refer to the applicable stroke table below.

**8** Mounting\*1

Symbol	Type	Motor mounting position	
		Parallel	In-line
Nil	Ends tapped*2	●	●
L	Foot bracket (in-line)	—	●
H	Foot bracket	●	●
F	Rod flange*2	●	●
D	Double clevis*3	●	—

\*1 The mounting bracket is shipped together with the product but does not come assembled.  
\*2 Do not mount using the “flange” or “ends tapped” options for the horizontal type with one end secured.  
\*3 Double clevis type: Use within the stroke limit of 400 or less and the thrust limit of 6000 or less.

**11** Driver type\*1

	Compatible drivers	Power supply voltage [V]
Nil	Without driver	
B2	LECSB2-T9/Pulse input (Absolute encoder)	200 to 240
C2	LECS2-T9/CC-Link (Absolute encoder)	200 to 230
S2	LECSS2-T9/SSCNET/H (Absolute encoder)	200 to 240
N2	LECSN2-T9/Without network card (Absolute encoder)	200 to 240
E2	LECSN2-T9-E/EtherCAT® (Absolute encoder)	200 to 240
92	LECSN2-T9-9/EtherNet/IP™ (Absolute encoder)	200 to 240
P2	LECSN2-T9-P/PROFINET (Absolute encoder)	200 to 240

\*1 When a driver type is selected, a cable is included. Select the cable type and cable length.  
Example)  
S2S2: Standard cable (2 m) + Driver (LECSS2)  
S2: Standard cable (2 m)  
Nil: Without cable and driver

**9** Cable type\*1 \*2

Nil	Without cable
S	Standard cable
R	Robotic cable (Flexible)

\*1 A motor cable and encoder cable are included with the product. (A lock cable is also included if motor option “B: With lock” is selected.)  
\*2 Standard connector orientation of cable  
·Top/parallel: “shaft side (A)”  
·In-line: “opposite side (B)”  
(Refer to page 290 for details.)

**10** Cable length [m]\*1

Nil	Without cable
2	2
5	5
A	10

\*1 The length of the encoder, motor, and lock cables are the same.

**12** I/O cable length [m]\*1

Nil	Without cable
H	Without cable (Connector only)
1	1.5

\*1 When “Nil: Without driver” is selected for the driver type, only “Nil: Without cable” can be selected.  
Refer to page 291 if an I/O cable is required.

### Applicable Stroke Table

Size	Stroke [mm]										Manufacturable stroke range
	100	200	300	400	500	600	700	800	900	1000	
100	●	●	●	●	●	●	●	●	●	●	100 to 1000

\* Please contact SMC for non-standard strokes as they are produced as special orders.

## Specifications

Model		LEY100□L	LEY100□D	LEY100□B
Stroke [mm]*12		100, 200, 300, 400, 500, 600, 700, 800, 900, 1000		
Work load [kg]	Horizontal*1	1200	1200	240
	Vertical	200	185	80
Rated force [N]/Set value*2: 25%*3		5500	3300	1100
Max. force [N]/Set value*2: 55%*3*4		12000	7200	2600
Max. speed [mm/s]*5	Stroke range	Up to 500	100	167
		600	74	123
		700	57	95
		800	45	75
		900	36	60
		1000	30	50
Pushing speed [mm/s]*6		20 or less		
Max. acceleration/deceleration [mm/s <sup>2</sup> ]*7		2000	3000	
Positioning repeatability [mm]		0.02		
Lost motion [mm]*8		0.10		
Screw lead [mm]		10		
Reduction ratio		1/5	1/3	—
Lead [mm]		2	3.3	10
Impact/Vibration resistance [m/s <sup>2</sup> ]*9		Motor mounting position: In-line 50/20, Motor mounting position: Parallel 50/15		
Actuation type		Motor mounting position: In-line/Ball screw, Motor mounting position: Parallel/Ball screw + Belt		
Guide type		Sliding bushing (Piston rod)		
Operating temperature range [°C]		5 to 40		
Operating humidity range [%RH]		90 or less (No condensation)		
Motor output [W]/Size [mm]		750/□80		
Motor type		AC servo motor (200 VAC)		
Encoder		Absolute 22-bit encoder (Resolution: 4194304 p/rev) Absolute 18-bit encoder (Resolution: 262144 p/rev) (For LECSC-T□ only)		
Power [W]*10		Max. power 1100		
Type*11		Non-magnetizing lock		
Holding force [N]		5700	3400	1200
Power [W] at 20°C		10		
Rated voltage [V]		24 VDC <sup>0</sup> / <sub>-10%</sub>		

\*1 This is the max. value of the horizontal work load. An external guide is necessary to support the load (Friction coefficient of guide: 0.1 or less). The actual work load changes according to the condition of the external guide. Confirm the load using the actual device.

\*2 Set values for the driver

\*3 The force setting range (set values for the driver) for the force control with the torque control mode. The force and duty ratio change according to the set value. Set it while referencing the "Force Conversion Graph" on page 46 and the "Load-Acceleration/Deceleration Graph" on page 47.

The driver applicable to the pushing operation is "LECSB-T", and "LECSS-T." The LECSSB2-T is only applicable when the control method is positioning. The point table is used to set the pushing operation settings. To set the pushing operation settings, an additional dedicated file (pushing operation extension file) must be downloaded separately to be used with the setup software (MR Configurator2™: LEC-MRC2□). Please download this dedicated file from the SMC website: <https://www.smcworld.com>

When selecting the LECSS2-T, combine it with upper level equipment (such as the Simple Motion module manufactured by Mitsubishi Electric Corporation) which has a pushing operation function.

\*\* For customer-provided PLC and motion controller setting and usage instructions, confirm with the retailer or manufacturer.

\*4 The max. force changes according to the stroke. Check the "Force-Stroke Graph" on page 47.

For "double clevis type": Maximum thrust limited to 6000 or less

\*5 The allowable speed changes according to the stroke. Set the number of rotations according to speed.

\*6 The allowable collision speed for collision with the workpiece with the torque control mode

\*7 The max. acceleration/deceleration changes according to the work load. Check the "Load-Acceleration/Deceleration Graph" on page 47.

\*8 A reference value for correcting errors in reciprocal operation

\*9 Impact resistance: No malfunction occurred when the actuator was tested with a drop tester in both an axial direction and a perpendicular direction to the lead screw. (The test was performed with the actuator in the initial state.)  
Vibration resistance: No malfunction occurred in a test ranging between 45 to 2000 Hz. The test was performed in both an axial direction and a perpendicular direction to the lead screw. (The test was performed with the actuator in the initial state.)

\*10 Indicates the max. power during operation (including the driver)  
When selecting the power supply capacity, refer to the power supply capacity in the operation manual of each driver.

\*11 Only when motor option "With lock" is selected

\*12 For "double clevis type": Stroke limited to 400 or less.

## Weight

### How to Order

#### 1 Accuracy

Nil	Basic type
H	High-precision type

#### 2 Size

25
32
63

#### 3 Motor mounting position

Nil	Top side parallel
R	Right side parallel
L	Left side parallel
D	In-line

#### 4 Motor type

Symbol	Type	Output [W]	Size	Compatible drivers
V6*1	AC servo motor (Absolute encoder)	100	25	LECYM2-V5 LECYU2-V5
V7		200	32	LECYM2-V7 LECYU2-V7
V8		400	63	LECYM2-V8 LECYU2-V8

\*1 For motor type V6, the compatible driver part number suffix is V5.

#### 5 Lead [mm]

Symbol	LEY25	LEY32*1	LEY63
A	12	16 (20)	20
B	6	8 (10)	10
C	3	4 (5)	5
L	—	—	2.86*2

\*1 The values shown in ( ) are the leads for the top/right/left side parallel motor types. (Equivalent leads which include the pulley ratio [1.25:1])

\*2 Only available for top/right/left side parallel motor types (Equivalent leads which include the pulley ratio [4:7])

#### 6 Stroke [mm]

30	30
to	to
800	800

\* For details, refer to the applicable stroke table below.

#### 7 Dust-tight/Water-jet-proof (Only available for LEY63)

Symbol	LEY25/32	LEY63
Nil	IP4x equivalent	IP5x equivalent (Dust-protected)
P	—	IP65 equivalent (Dust-tight/Water-jet-proof)/With vent hole tap

\* When using the dust-tight/water-jet-proof (IP65 equivalent), correctly mount the fitting and tubing to the vent hole tap, and then place the end of the tubing in an area not exposed to dust or water.

\* The fitting and tubing should be provided separately by the customer. Select [Applicable tubing O.D.: ø4 or more, Connection thread: Rc1/8].

\* Cannot be used in environments exposed to cutting oil, etc. Take appropriate protective measures. For details on enclosure, refer to the "Enclosure" on page 207.

#### 8 Motor option

Nil	Without option
B	With lock

\* When "With lock" is selected for the top/right/left side parallel motor types, the motor body will stick out from the end of the body for size 25 with strokes of 30 mm or less. Check for interference with workpieces before selecting a model.

#### 9 Rod end thread

Nil	Rod end female thread
M	Rod end male thread (1 rod end nut is included.)

For auto switches, refer to pages 104 to 107.

# Electric Actuator Rod Type **LEY Series**

AC Servo Motor

Size **25, 32, 63**

Dust-tight/Water-jet-proof (IP65 Equivalent)

\* Option

Motor mounting position: Parallel

Motor mounting position: In-line

## 10 Mounting\*1

Symbol	Type	Motor mounting position	
		Parallel	In-line
Nil	Ends tapped/ Body bottom tapped*2	●	●
L	Foot bracket	●	—
F	Rod flange*2	●*4	●
G	Head flange*2	●*5	—
D	Double clevis*3	●	—

\*1 The mounting bracket is shipped together with the product but does not come assembled.

\*2 For the horizontal cantilever mounting of the ends tapped, rod flange, or head flange types, use the actuator within the following stroke range.

· LEY25: 200 mm or less · LEY32: 100 mm or less · LEY63: 400 mm or less

\*3 For the mounting of the double clevis type, use the actuator within the following stroke range.

· LEY25: 200 mm or less · LEY32: 200 mm or less · LEY63: 300 mm or less

\*4 The rod flange type is not available for the LEY25 with a 30 mm stroke and motor option "With lock."

\*5 The head flange type is not available for the LEY32/LEY63.

## 11 Cable type\*1

Nil	Without cable
S	Standard cable
R	Robotic cable (Flexible cable)

\*1 A motor cable and encoder cable are included with the product.

The motor cable for lock option is included when the motor with lock option is selected.

## 12 Cable length [m]\*1

Nil	Without cable
3	3
5	5
A	10
C	20

\*1 The length of the motor and encoder cables are the same. (For with lock)

## 13 Driver type

	Compatible drivers	Power supply voltage [V]
Nil	Without driver	—
M2	LECYM2-V□	200 to 230
U2	LECYU2-V□	200 to 230

\* When a driver type is selected, a cable is included. Select the cable type and cable length.

## 14 I/O cable length [m]\*1

Nil	Without cable
H	Without cable (Connector only)
1	1.5

\*1 When "Nil: Without driver" is selected for the driver type, only "Nil: Without cable" can be selected.

Refer to page 302 if an I/O cable is required. (Options are shown on page 302.)

## Compatible Drivers

Driver type	MECHATROLINK-II type	MECHATROLINK-III type
Series	LECYM	LECYU
Applicable network	MECHATROLINK-II	MECHATROLINK-III
Control encoder	Absolute 20-bit encoder	
Communication device	USB communication, RS-422 communication	
Power supply voltage [V]	200 to 230 VAC (50/60 Hz)	
Reference page	295

\* LEY63 only

- \*1 When using the dust-tight/water-jet-proof (IP65 equivalent), correctly mount the fitting and tubing to the vent hole tap, and then place the end of the tubing in an area not exposed to dust or water. The fitting and tubing should be provided separately by the customer. Select [Applicable tubing O.D.: ø4 or more, Connection thread: Rc1/8].

# LEY Series Auto Switch Mounting

## Auto Switch Proper Mounting Position

Applicable auto switch: D-M9□(V), D-M9□E(V), D-M9□W(V), D-M9□A(V)

[mm]

Size	Stroke range	Auto switch position				Return to origin distance	Operating range
		Leftward mounting		Rightward mounting			
		A	B	C	D		
16	10 to 100	21.5	46.5	33.5	34.5	(2)	2.9
	105 to 300	41.5		53.5			
25	15 to 100	27	62.5	39	50.5	(2)	4.2
	105 to 400	52		64			
32/40	20 to 100	30.5	65.5	42.5	53.5	(2)	4.9
	105 to 500	60.5		72.5			
63	50 to 200	37	86	49	74	(4)	9.8
	205 to 500	72		84			
	505 to 800	107		119			

- \* The values in the table to the left are to be used as a reference when mounting auto switches for stroke end detection. Adjust the auto switch after confirming the operating conditions in the actual setting.
- \* An auto switch cannot be mounted on the same side as a motor.
- \* For LEYG series models (with a guide), an auto switch cannot be mounted on the guide attachment side (rod side).
- \* Since the operating range is provided as a guideline including hysteresis, it cannot be guaranteed (assuming approx. ±30% dispersion). It may change substantially depending on the ambient environment.

## Auto Switch Mounting

Size: 16, 25, 32, 40, 63

### Tightening Torque for Auto Switch Mounting Screw [N·m]

Auto switch model	Tightening torque
D-M9□(V) D-M9□E(V) D-M9□W(V)	0.05 to 0.15
D-M9□A(V)	0.05 to 0.10

\* When tightening the auto switch mounting screw (included with the auto switch), use a watchmaker's screwdriver with a handle diameter of 5 to 6 mm.

Size: 100

A switch spacer is required in order to mount an auto switch. When mounting an auto switch, first, hold a switch spacer between your fingers and press it into the slot. When doing this, confirm that it is set in the correct mounting orientation, or reinsert it if necessary. Next, insert the auto switch into the slot and slide it until it is positioned under the switch spacer. After confirming the mounting position, use a flat head watchmaker's screwdriver to tighten the included auto switch mounting screw.

### Switch Spacer Part No.

Switch spacer	BMY3-016
---------------	----------

### Tightening Torque for Auto Switch Mounting Screw

Auto switch model	Tightening torque
D-M9□(V) D-M9□W(V)	0.10 to 0.15

# Solid State Auto Switch Direct Mounting Type D-M9N(V)/D-M9P(V)/D-M9B(V)

Refer to the SMC website for details on products that are compliant with international standards.

## Auto Switch Specifications

PLC: Programmable Logic Controller

## Moment Load Graph

### Selection conditions

Mounting position		Vertical		Horizontal	
Max. speed [mm/s]		"Speed-Work Load Graph"		200 or less	Over 200
Bearing	Sliding bearing	Graphs ①, ②		Graphs ⑤, ⑥*1	—
	Ball bushing bearing	Graphs ③, ④		Graphs ⑦, ⑧	Graphs ⑨, ⑩

\*1 For the sliding bearing type, the speed is restricted with a horizontal/moment load.

### Vertical Mounting, Sliding Bearing

#### ① 70 mm stroke or less

\* The limit of vertical load mass varies depending on "lead" and "speed." Check the "Speed-Work Load Graph" on pages 111 to 113.

#### ② Over 75 mm stroke

### Vertical Mounting, Ball Bushing Bearing

#### ③ 35 mm stroke or less

\* The limit of vertical load mass varies depending on "lead" and "speed." Check the "Speed-Work Load Graph" on pages 111 to 113.

#### ④ Over 40 mm stroke

## Moment Load Graph

### Horizontal Mounting, Sliding Bearing

⑤ L = 50 mm

⑥ L = 100 mm

\* Set the speed to less than or equal to the values shown below.

Motor type	LEYG□M□A	LEYG□M□B	LEYG□M□C
Step motor (Servo/24 VDC)	200 mm/s	125 mm/s	75 mm/s
Servo motor (24 VDC)	200 mm/s	200 mm/s	125 mm/s

\* For the specifications below, operate the system at the "load mass" shown in the graph x 80%.  
 • LEYG25MAA/Servo motor (24 VDC), Lead 12

### Horizontal Mounting, Ball Bushing Bearing

⑦ L = 50 mm Max. speed = 200 mm/s or less

⑧ L = 100 mm Max. speed = 200 mm/s or less

⑨ L = 50 mm Max. speed = Over 200 mm/s

⑩ L = 100 mm Max. speed = Over 200 mm/s

## Operating Range when Used as a Stopper

### LEYG□M (Sliding bearing)

#### Caution

#### Handling Precautions

- \* When used as a stopper, select a model with a stroke of 30 mm or less.
- \* LEYG□L (ball bushing bearing) cannot be used as a stopper.
- \* Workpiece collision in series with guide rod cannot be permitted (Fig. a).
- \* The body should not be mounted on the end. It must be mounted on the top or bottom (Fig. b).

There is a limit to the pushing force in relation to the pushing speed. If the product is operated outside of the range (low pushing force), the completion signal [INP] may be output before the pushing operation has been completed (during the moving operation).

If operating with the pushing speed below the min. speed, please check for operating problems before using the product.

### <Set Values for Vertical Upward Transfer Pushing Operations>

For vertical loads (upward), set the pushing force to the max. value shown below and operate at the work load or less.

For auto switches, refer to pages 105 to 107.

#### Use of auto switches for the guide rod type LEYG series

- Auto switches must be inserted from the front side with the rod (plate) sticking out.
- Auto switches cannot be fixed with the parts hidden behind the guide attachment (the side of the rod that sticks out).
- Please contact SMC when using auto switches on the side of the rod that sticks out, as it is produced as a special order.

- \*1 When [M: Sliding bearing] is selected, the max. speed of lead [A] is 400 mm/s (at no-load, horizontal mounting). The speed is also restricted with a horizontal/moment load. Refer to the "Model Selection" on page 110.
- \*2 Please contact SMC for non-standard strokes as they are produced as special orders.
- \*3 There is a limit for mounting the size 32/40 top side parallel motor types and strokes of 50 mm or less. Refer to the dimensions.
- \*4 When "With lock" or "With lock/motor cover" is selected for the top side parallel motor type, the motor body will stick out from the end of the body for size 16/40 with strokes of 30 mm or less. Check for interference with workpieces before selecting a model.
- \*5 Only available for size 25, 32, and 40 sliding bearings (Refer to the "Construction" on page 132.)
- \*6 Produced upon receipt of order (Robotic cable only)
- \*7 The standard cable should only be used on fixed parts.  
For use on moving parts, select the robotic cable.  
Refer to pages 258 and 259 if only the actuator cable is required.
- \*8 For details on controllers/drivers and compatible motors, refer to the compatible controllers/drivers on the next page.

- \*9 Only available for the motor type "Step motor"
- \*10 When pulse signals are open collector, order the current limiting resistor (LEC-PA-R-□) on page 240 separately.
- \*11 When "Without controller/driver" is selected for controller/driver types, I/O cable cannot be selected. Refer to page 224 (For LECA6), page 234 (For LECP1), or page 240 (For LECPA) if I/O cable is required.
- \*12 When "Pulse input type" is selected for controller/driver types, pulse input usable only with differential. Only 1.5 m cables usable with open collector
- \*13 The DIN rail is not included. It must be ordered separately.
- \*14 Select "Nil" for anything other than DeviceNet™, CC-Link, or parallel input.  
Select "Nil," "S," or "T" for DeviceNet™ or CC-Link.  
Select "Nil," "1," "3," or "5" for parallel input.

## ⚠ Caution

### [CE-compliant products]

- ① EMC compliance was tested by combining the electric actuator LEY series and the controller LEC/JXC series.  
The EMC depends on the configuration of the customer's control panel and the relationship with other electrical equipment and wiring. Therefore, compliance with the EMC directive cannot be certified for SMC components incorporated into the customer's equipment under actual operating conditions. As a result, it is necessary for the customer to verify compliance with the EMC directive for the machinery and equipment as a whole.
- ② For the servo motor (24 VDC) specification, EMC compliance was tested by installing a noise filter set (LEC-NFA). Refer to page 224 for the noise filter set. Refer to the LECA series Operation Manual for installation.

### [UL-compliant products (For the LEC series)]

When compliance with UL is required, the electric actuator and controller/driver should be used with a UL1310 Class 2 power supply.

### The actuator and controller/driver are sold as a package.

Confirm that the combination of the controller/driver and actuator is correct.

#### <Check the following before use.>

- ① Check the actuator label for the model number. This number should match that of the controller/driver.
- ② Check that the Parallel I/O configuration matches (NPN or PNP).

\* Refer to the Operation Manual for using the products. Please download it via our website: <https://www.smcworld.com>

	Power [W] <sup>*10</sup>	2.9			5			5			5				
Rated voltage [V]		24 VDC ±10%													

\*1 Horizontal: An external guide is necessary to support the load (Friction coefficient of guide: 0.1 or less). The actual work load and transfer speed change according to the condition of the external guide. Also, speed changes according to the work load. Check the "Model Selection" on pages 111 and 112.

Vertical: Speed changes according to the work load. Check the "Model Selection" on pages 111 and 112.  
Set the acceleration/deceleration values to be 3000 [mm/s<sup>2</sup>] or less.

\*2 Pushing force accuracy is ±20% (F.S.).

\*3 The pushing force values for LEYG16□□ are 35% to 85%, for LEYG25□□ are 35% to 65%, for LEYG32□□ are 35% to 85%, and for LEYG40□□ are 35% to 65%. The pushing force values change according to the duty ratio and pushing speed. Check the "Model Selection" on page 114.

\*4 The speed and force may change depending on the cable length, load, and mounting conditions. Furthermore, if the cable length exceeds 5 m, then it will decrease by up to 10% for each 5 m. (At 15 m: Reduced by up to 20%)

When [M: Sliding bearing] is selected, the max. speed of lead [A] is 400 mm/s (at no-load, horizontal mounting).

The speed is also restricted with a horizontal/moment load. Refer to the "Model Selection" on page 110.

\*5 The allowable speed for the pushing operation

\*6 A reference value for correcting errors in reciprocal operation

\*7 Impact resistance: No malfunction occurred when the actuator was tested with a drop tester in both an axial direction and a perpendicular direction to the lead screw. (The test was performed with the actuator in the initial state.)

Vibration resistance: No malfunction occurred in a test ranging between 45 to 2000 Hz. The test was performed in both an axial direction and a perpendicular direction to the lead screw. (The test was performed with the actuator in the initial state.)

\*8 Indicates the max. power during operation (including the controller). This value can be used for the selection of the power supply.

\*9 With lock only

\*10 For an actuator with lock, add the power for the lock.

## Support Block

### ● Guide for support block application

When the stroke exceeds 100 mm and the mounting orientation is horizontal, the body will be bent. Mounting the support block is recommended. (Please order it separately from the models shown below.)

### Support Block Model

## LEYG-S 016

#### ● Size

<b>016</b>	For size 16
<b>025</b>	For size 25
<b>032</b>	For sizes 32, 40

### ⚠ Caution

Do not install the body using only a support block.  
The support block should be used only for support.

Size	Model	Stroke range	EB	G	GA	OA	OB	ST	WC	X
16	LEYG-S016	100st or less	69	4.3	31.8	M5 x 0.8	10	16	55	44

		101st or more, 300st or less							105	

\* Two body mounting screws are included with the support block.

\* The through holes of the LEYG-S032 cannot be used for the top side parallel motor type. Use taps on the bottom.

# Electric Actuator Guide Rod Type

## LEYG Series LEYG25, 32

The LECSB-S, LECS-C-S, and LECS-S electric actuator drivers are to be discontinued. The LECSB-T, LECS-C-T, and LECS-S-T drivers are available as substitutes. In the product number, select T6 instead of S6, or T7 instead of S7 for the **Motor type**, and select B2 instead of B1, C2 instead of C1, or S2 instead of S1 for the **Driver type**.

\* For details, refer to page 307 and onward.

LECY□ Series ▶ p. 147

### How to Order

#### ① Accuracy

Nil	Basic type
H	High-precision type

#### ② Size

25
32

#### ③ Bearing type

M	Sliding bearing
L	Ball bushing bearing

#### ④ Motor mounting position

Nil	Top side parallel
D	In-line

#### ⑤ Motor type\*1

Symbol	Type	Output [W]	Actuator size	Compatible drivers*3
S2*1	AC servo motor (Incremental encoder)	100	25	LECSA□-S1
S3		200	32	LECSA□-S3
S6*1	AC servo motor (Absolute encoder)	100	25	LECSB□-S5 LECS-C□-S5 LECSS□-S5
S7		200	32	LECSB□-S7 LECS-C□-S7 LECSS□-S7
T6*2	AC servo motor (Absolute encoder)	100	25	LECSB2-T5 LECS-C2-T5 LECSN2-T5-□
				LECSS2-T5
T7		200	32	LECSB2-T7 LECS-C2-T7 LECSN2-T7-□ LECSS2-T7

\*1 For motor type S2 and S6, the compatible driver part number suffixes are S1 and S5 respectively.

\*2 For motor type T6, the compatible driver part number is LECS□2-T5.

\*3 For details on the driver, refer to page 264.

#### ⑥ Lead [mm]

Symbol	LEYG25	LEYG32*1
A	12	16 (20)
B	6	8 (10)
C	3	4 (5)

\*1 The values shown in ( ) are the leads for the size 32 top side parallel motor type. (Equivalent leads which include the pulley ratio [1.25:1])

#### ⑦ Stroke [mm]

30	30
to	to
300	300

\* For details, refer to the applicable stroke table below.

\* There is a limit for mounting the size 32 top side parallel motor type and strokes of 50 mm or less. Refer to the dimensions.

#### ⑧ Motor option

Nil	Without option
B	With lock

#### ⑨ Guide option

Nil	Without option
F	With grease retaining function

\* Only available for size 25 and 32 sliding bearings (Refer to the "Construction" on page 142.)

#### ⑩ Cable length\*1 [m]

Nil	Without cable
2	2
5	5
A	10

\*1 The length of the motor, encoder, and lock cables are the same.

#### ⑩ Cable type\*1 \*2

Nil	Without cable
S	Standard cable
R	Robotic cable (Flexible cable)

\*1 A motor cable and encoder cable are included with the product. (A lock cable is also included if motor option "B: With lock" is selected.)

\*2 Standard cable entry direction is

- Top side parallel: (A) Axis side
  - In-line: (B) Counter axis side
- (Refer to page 290 for details.)

#### Applicable Stroke Table

●: Standard

Model	Stroke [mm]	30	50	100	150	200	250	300	Manufacturable stroke range
LEYG25		●	●	●	●	●	●	●	15 to 300
LEYG32		●	●	●	●	●	●	●	20 to 300

\* Please contact SMC for non-standard strokes as they are produced as special orders.

For auto switches, refer to pages 105 to 107.

Motor mounting position: Parallel

Motor mounting position: In-line

**12** Driver type\*1

	Compatible drivers	Power supply voltage [V]
Nil	Without driver	—
A1	LECSA1-S□	100 to 120
A2	LECSA2-S□	200 to 230
B1	LECSB1-S□	100 to 120
B2	LECSB2-S□	200 to 230
	LECSB2-T□	200 to 240
C1	LECSC1-S□	100 to 120
C2	LECSC2-S□	200 to 230
	LECSC2-T□	
S1	LECSS1-S□	100 to 120
S2	LECSS2-S□	200 to 230
	LECSS2-T□	200 to 240
N2	LECSN2-T□	200 to 240
E2	LECSN2-T□-E	200 to 240
92	LECSN2-T□-9	200 to 240
P2	LECSN2-T□-P	200 to 240

\*1 When a driver type is selected, a cable is included. Select the cable type and cable length.  
Example)  
S2S2: Standard cable (2 m) + Driver (LECSS2)  
S2: Standard cable (2 m)  
Nil: Without cable and driver

**13** I/O cable length [m]\*1

Nil	Without cable
H	Without cable (Connector only)
1	1.5

\*1 When “Nil: Without driver” is selected for the driver type, only “Nil: Without cable” can be selected. Refer to page 291 if an I/O cable is required. (Options are shown on page 291.)

**Use of auto switches for the guide rod type LEYG series**

- Auto switches must be inserted from the front side with the rod (plate) sticking out.
- Auto switches cannot be fixed with the parts hidden behind the guide attachment (the side of the rod that sticks out).
- Please contact SMC when using auto switches on the side of the rod that sticks out, as it is produced as a special order.

# LEYG Series

AC Servo Motor

## Specifications

Model		LEYG25□S <sub>2</sub> <sup>2</sup> /T6 (Parallel) LEYG25□DS <sub>2</sub> <sup>2</sup> /T6 (In-line)			LEYG32□S <sub>3</sub> <sup>3</sup> /T7 (Parallel)			LEYG32□DS <sub>3</sub> <sup>3</sup> /T7 (In-line)			
Actuator specifications	Work load [kg]	Horizontal*1	18	50	50	30	60	60	30	60	60
		Vertical	7	15	29	7	17	35	10	22	44
	Force [N]*2 (Set value: 15 to 30%)*8		65 to 131	127 to 255	242 to 485	79 to 157	154 to 308	294 to 588	98 to 197	192 to 385	368 to 736
	Max. speed [mm/s]		900	450	225	1200	600	300	1000	500	250
	Pushing speed [mm/s]*3		35 or less			30 or less			30 or less		
	Max. acceleration/deceleration [mm/s <sup>2</sup> ]		5000			5000			5000		
	Positioning repeatability [mm]	Basic type	±0.02								
		High-precision type	±0.01								
	Lost motion*4 [mm]	Basic type	0.1 or less								
		High-precision type	0.05 or less								
Lead [mm] (including pulley ratio)		12	6	3	20	10	5	16	8	4	
Impact/Vibration resistance [m/s <sup>2</sup> ]*5		50/20			50/20			50/20			
Actuation type		Ball screw + Belt [1:1]/Ball screw			Ball screw + Belt [1.25:1]			Ball screw			
Guide type		Sliding bearing (LEYG□M), Ball bushing bearing (LEYG□L)									
Operating temperature range [°C]		5 to 40			5 to 40			5 to 40			
Operating humidity range [%RH]		90 or less (No condensation)			90 or less (No condensation)			90 or less (No condensation)			
Regeneration option		May be required depending on speed and work load (Refer to page 117.)									
Motor output/Size		100 W/□40			200 W/□60			200 W/□60			
Motor type		AC servo motor (100/200 VAC)			AC servo motor (100/200 VAC)			AC servo motor (100/200 VAC)			
Encoder*9		Motor type S2, S3: Incremental 17-bit encoder (Resolution: 131072 p/rev)									
		Motor type S6, S7: Absolute 18-bit encoder (Resolution: 262144 p/rev)									
Power [W]*6		Max. power 445			Max. power 724			Max. power 724			
	Type*7	Non-magnetizing lock			Non-magnetizing lock			Non-magnetizing lock			
Lock unit specifications	Holding force [N]	131	255	485	157	308	588	197	385	736	
	Power at 20°C [W]	6.3			7.9			7.9			
Rated voltage [V]		24 VDC <sup>0</sup> <sub>-10%</sub>									

\*1 This is the max. value of the horizontal work load. An external guide is necessary to support the load (Friction coefficient of guide: 0.1 or less). The actual work load changes according to the condition of the external guide. Confirm the load using the actual device.

\*2 The force setting range (set values for the driver) for the force control with the torque control mode. Set it while referencing the "Force Conversion Graph" on page 118.

The driver applicable to the pushing operation is "LECSS", "LECSB-T", and "LECSS-T".

The LECSB2-T is only applicable when the control method is positioning. The point table is used to set the pushing operation settings.

To set the pushing operation settings, an additional dedicated file (pushing operation extension file) must be downloaded separately to be used with the setup software (MR Configurator2™: LEC-MRC2□). Please download this dedicated file from the SMC website: <https://www.smcworld.com>

When selecting the LECSB or LECSB2-T, combine it with upper level equipment (such as the Simple Motion module manufactured by Mitsubishi Electric Corporation) which has a pushing operation function.

\*\* For customer-provided PLC and motion controller setting and usage instructions, confirm with the retailer or manufacturer.

\*3 The allowable collision speed for collision with the workpiece with the torque control mode

\*4 A reference value for correcting errors in reciprocal operation

\*5 Impact resistance: No malfunction occurred when the actuator was tested with a drop tester in both an axial direction and a perpendicular direction to the lead screw. (The test was performed with the actuator in the initial state.)  
Vibration resistance: No malfunction occurred in a test ranging between 45 to 2000 Hz. The test was performed in both an axial direction and a perpendicular direction to the lead screw. (The test was performed with the actuator in the initial state.)

\*6 Indicates the max. power during operation (including the driver)  
When selecting the power supply capacity, refer to the power supply capacity in the operation manual of each driver.

\*7 Only when motor option "With lock" is selected

\*8 For motor types T6 and T7, the set value is 12 to 24%.

\*9 For motor types T6 and T7, the resolution will change depending on the driver type.

# LEYG Series

AC Servo Motor

## Dimensions: Top Side Parallel Motor

### Section Y details

- \*1 This is the range within which the rod can move. Make sure that workpieces mounted on the rod do not interfere with other workpieces or the facilities around the rod.
- \*2 The Z-phase first detecting position from the stroke end of the motor side
- \*3 Through holes cannot be used for size 32 with strokes of 50 mm or less.

### LEYG□L (Ball bushing bearing) [mm]

AC Servo Motor

## Support Block

### ● Guide for support block application

When the stroke exceeds 100 mm and the mounting orientation is horizontal, the body will be bent. Mounting the support block is recommended. (Please order it separately from the models shown below.)

### Support Block Model

**LEYG-S 025**

● **Size**

<b>025</b>	For size 25
<b>032</b>	For size 32

### ⚠ Caution

Do not install the body using only a support block. The support block should be used only for support.

[mm]										
Size	Model	Stroke range	EB	G	GA	OA	OB	ST	WC	X
25	LEYG-S025	100st or less	85	5.4	40.3	M6 x 1.0	12	20	70	54
		101st or more, 300st or less							95	
32	LEYG-S032	100st or less	101	(5.4)	(50.3)	M6 x 1.0	12	22	75	64
		101st or more, 300st or less			105					

\* Two body mounting screws are included with the support block.

\* The through holes of the LEYG-S032 cannot be used for the top side parallel motor type. Use taps on the bottom.

# Electric Actuator Guide Rod Type

## LEYG Series LEYG25, 32

\* For details, refer to page 307 and onward.

LECS□ Series ▶ p. 139

### How to Order

#### 1 Accuracy

Nil	Basic type
H	High-precision type

#### 2 Size

25
32

#### 3 Bearing type

M	Sliding bearing
L	Ball bushing bearing

#### 4 Motor mounting position

Nil	Top side parallel
D	In-line

#### 5 Motor type

Symbol	Type	Output [W]	Actuator size	Compatible drivers
V6*1	AC servo motor (Absolute encoder)	100	25	LECYM2-V5 LECYU2-V5
V7		200	32	LECYM2-V7 LECYU2-V7

\*1 For motor type V6, the compatible driver part number suffix is V5.

#### 6 Lead [mm]

Symbol	LEYG25	LEYG32*1
A	12	16 (20)
B	6	8 (10)
C	3	4 (5)

\*1 The values shown in ( ) are the leads for the top side parallel motor type. (Equivalent leads which include the pulley ratio [1.25:1])

#### 7 Stroke [mm]

30	30
to	to
300	300

\* For details, refer to the applicable stroke table below.

\* There is a limit for mounting the size 32 top side parallel motor type and strokes of 50 mm or less. Refer to the dimensions.

#### 8 Motor option

Nil	Without option
B	With lock

\* When "With lock" is selected for the top side parallel motor type, the motor body will stick out from the end of the body for size 25 with strokes of 30 mm or less. Check for interference with workpieces before selecting a model.

#### 9 Guide option

Nil	Without option
F	With grease retaining function

\* Only available for the sliding bearing

#### 10 Cable type\*1

Nil	Without cable
S	Standard cable
R	Robotic cable (Flexible cable)

\*1 A motor cable and encoder cable are included with the product.

The motor cable for lock option is included when the motor with lock option is selected.

#### 11 Cable length [m]\*1

Nil	Without cable
3	3
5	5
A	10
C	20

\*1 The length of the motor and encoder cables are the same. (For with lock)

#### Applicable Stroke Table

Model	Stroke [mm]	30	50	100	150	200	250	300	Manufacturable stroke range
		●	●	●	●	●	●	●	
LEYG25		●	●	●	●	●	●	●	15 to 300
LEYG32		●	●	●	●	●	●	●	20 to 300

\* Please contact SMC for non-standard strokes as they are produced as special orders.

For auto switches, refer to pages 105 to 107.

Motor mounting position: Parallel

Motor mounting position: In-line

**12 Driver type**

	Compatible drivers	Power supply voltage [V]
<b>Nil</b>	Without driver	—
<b>M2</b>	LECYM2-V□	200 to 230
<b>U2</b>	LECYU2-V□	200 to 230

\* When a driver type is selected, a cable is included. Select the cable type and cable length.

**13 I/O cable length [m]\*1**

	Without cable
<b>Nil</b>	Without cable
<b>H</b>	Without cable (Connector only)
<b>1</b>	1.5

\*1 When "Nil: Without driver" is selected for the driver type, only "Nil: Without cable" can be selected. Refer to page 302 if an I/O cable is required. (Options are shown on page 302.)

**Use of auto switches for the guide rod type LEYG series**

- Auto switches must be inserted from the front side with the rod (plate) sticking out.
- Auto switches cannot be fixed with the parts hidden behind the guide attachment (the side of the rod that sticks out).
- Please contact SMC when using auto switches on the side of the rod that sticks out, as it is produced as a special order.

**Compatible Drivers**

Lock unit specifications	Holding force [N]		131	255	485	157	308	588	197	385	736
	Power at 20°C [W]		5.5			6			6		
	Rated voltage [V]		24 VDC <sup>+10%</sup> / <sub>0</sub>								

- \*1 This is the max. value of the horizontal work load. An external guide is necessary to support the load (Friction coefficient of guide: 0.1 or less). The actual work load changes according to the condition of the external guide. Confirm the load using the actual device.
- \*2 The force setting range (set values for the driver) for the force control with the torque control mode  
Set it while referencing the "Force Conversion Graph" on page 123.
- \*3 The allowable collision speed for collision with the workpiece with the torque control mode
- \*4 Impact resistance: No malfunction occurred when the actuator was tested with a drop tester in both an axial direction and a perpendicular direction to the lead screw. (The test was performed with the actuator in the initial state.)

- Vibration resistance: No malfunction occurred in a test ranging between 45 to 2000 Hz. The test was performed in both an axial direction and a perpendicular direction to the lead screw. (The test was performed with the actuator in the initial state.)
- \*5 The work load conditions which require the regenerative resistor when operating at the max. speed (Duty ratio: 100%).  
Order the regenerative resistor separately. For details, refer to the "Required Conditions for the Regenerative Resistor (Guide)" on page 122.
- \*6 Indicates the max. power during operation (including the driver)  
When selecting the power supply capacity, refer to the power supply capacity in the operation manual of each driver.
- \*7 Only when motor option "With lock" is selected

## Support Block

### ● Guide for support block application

When the stroke exceeds 100 mm and the mounting orientation is horizontal, the body will be bent. Mounting the support block is recommended. (Please order it separately from the models shown below.)

### Support Block Model

**LEYG-S** 025

● Size

<b>025</b>	For size 25
<b>032</b>	For size 32

### ⚠ Caution

Do not install the body using only a support block.  
The support block should be used only for support.

Size	Model	Stroke range	EB	G	GA	OA	OB	ST	WC	X
25	LEYG-S025	15 to 100	85	5.4	40.3	M6 x 1.0	12	20	70	54
		105 to 300							95	
32	LEYG-S032	20 to 100	101	5.4	50.3	M6 x 1.0	12	22	75	64
		105 to 300							105	

\* Two body mounting screws are included with the support block.

\* The through holes of the LEYG-S032 cannot be used for the top side parallel motor type. Use taps on the bottom.

### <Limit Values for Pushing Force and Trigger Level in Relation to Pushing Speed> Without Load

Model	Lead	Pushing speed [mm/s]	Pushing force (Setting input value)	Model	Lead	Pushing speed [mm/s]	Pushing force (Setting input value)
LEY25	A/B/C	21 to 35	50 to 65%	LEY25□A	A/B/C	21 to 35	80 to 95%
	A	24 to 30	60 to 85%				
LEY32	B/C	21 to 30	60 to 85%				
	A	24 to 30	50 to 65%				
LEY40	B/C	21 to 30	50 to 65%				

There is a limit to the pushing force in relation to the pushing speed. If the product is operated outside of the range (low pushing force), the completion signal [INP] may be output before the pushing operation has been completed (during the moving operation). If operating with the pushing speed below the min. speed, please check for operating problems before using the product.

### <Set Values for Vertical Upward Transfer Pushing Operations>

For vertical loads (upward), set the pushing force to the max. value shown below and operate at the work load or less.

Model	LEY25□			LEY32□			LEY40□			LEY25□A		
	A	B	C	A	B	C	A	B	C	A	B	C
Work load [kg]	2.5	5	10	4.5	9	18	7	14	28	1.2	2.5	5
Pushing force	65%			85%			65%			95%		

\*1 Set values for the controller

## Graph of Allowable Lateral Load on the Rod End (Guide)

[Stroke] = [Product stroke] + [Distance from the rod end to the center of gravity of the workpiece]

## Rod Displacement: $\delta$ [mm]

Stroke \ Size	30	50	100	150	200	250	300	350	400	450	500
25	±0.3	±0.4	±0.7	±0.7	±0.9	±1.1	±1.3	±1.5	±1.7	—	—
32/40	±0.3	±0.4	±0.7	±0.6	±0.8	±1.0	±1.1	±1.3	±1.5	±1.7	±1.8

\* The values without a load are shown.

## Non-rotating Accuracy of Rod

Size	Non-rotating accuracy $\theta$
25	±0.8°
32/40	±0.7°

\* Avoid using the electric actuator in such a way that rotational torque would be applied to the piston rod.

This may cause the deformation of the non-rotating guide, abnormal auto switch responses, play in the internal guide, or an increase in the sliding resistance.

# Model Selection

Ambient temperature	Pushing force set value*1 [%]	Duty ratio [%]	Continuous pushing time [min]
40°C or less	95 or less	100	—

## <Limit Values for Pushing Force and Trigger Level in Relation to Pushing Speed> Without Load

Model	Lead	Pushing speed [mm/s]	Pushing force (Setting input value)	Model	Lead	Pushing speed [mm/s]	Pushing force (Setting input value)
LEY25	A/B/C	21 to 35	50 to 65%	LEY25□A	A/B/C	21 to 35	80 to 95%
	A	24 to 30			B/C	21 to 30	
LEY32			60 to 85%				

There is a limit to the pushing force in relation to the pushing speed. If the product is operated outside of the range (low pushing force), the completion signal [INP] may be output before the pushing operation has been completed (during the moving operation). If operating with the pushing speed below the min. speed, please check for operating problems before using the product.

## <Set Values for Vertical Upward Transfer Pushing Operations>

For vertical loads (upward), set the pushing force to the max. value shown below and operate at the work load or less.

Model	LEY25□			LEY32□			LEY25□A		
	A	B	C	A	B	C	A	B	C
Work load [kg]	2.5	5	10	4.5	9	18	1.2	2.5	5
Pushing force	65%			85%			95%		

\*1 Set values for the controller

# Electric Actuator Rod Type

Dust-tight/Water-jet-proof (IP65 Equivalent/IP67 Equivalent)

\* For details, refer to page 307 and onward.

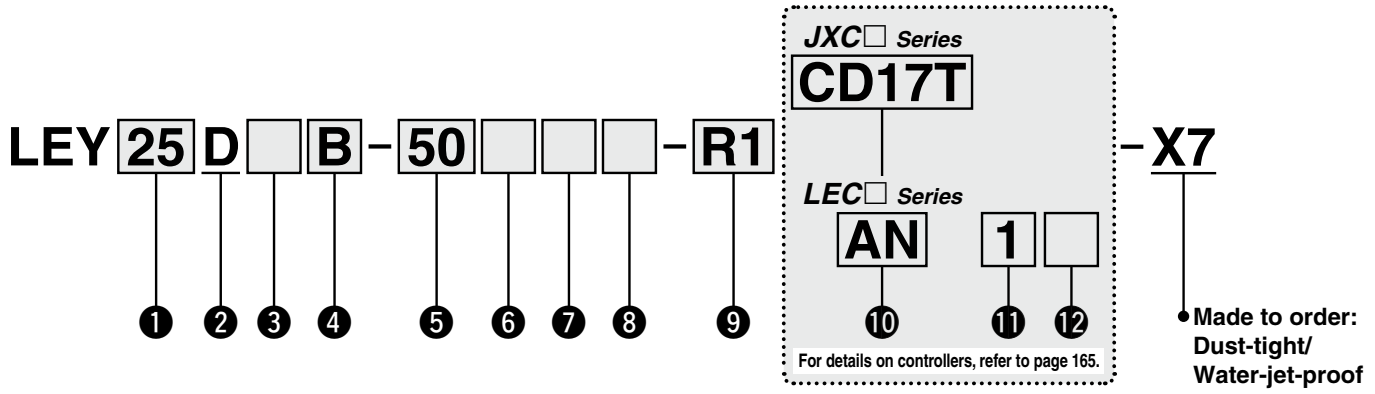

## LEY-X7 (Made to Order) Series LEY25, 32, 40

Refer to pages 155 to 159 for model selection.

### 12 Controller/Driver mounting

Nil	Screw mounting
D	DIN rail*10

- \*1 Please contact SMC for non-standard strokes as they are produced as special orders.
- \*2 The mounting bracket is shipped together with the product but does not come assembled.
- \*3 For the horizontal cantilever mounting of the rod flange or ends tapped types, use the actuator within the following stroke range.  
· LEY25: 200 mm or less · LEY32/40: 100 mm or less
- \*4 The head flange type is not available for the LEY32/40.
- \*5 Produced upon receipt of order (Robotic cable only)
- \*6 For details on controllers/drivers and compatible motors, refer to the compatible controllers/drivers on the next page.
- \*7 When pulse signals are open collector, order the current limiting resistor (LEC-PA-R-□) separately after referring to page 238.

- \*8 When "Without controller/driver" is selected for controller/driver types, I/O cable cannot be selected. Refer to page 224 (For LECA6), page 234 (For LECP1), or page 240 (For LECPA) if I/O cable is required.
- \*9 When "Pulse input type" is selected for controller/driver types, pulse input usable only with differential. Only 1.5 m cables usable with open collector
- \*10 The DIN rail is not included. It must be ordered separately.
- \*11 Select "Nil" for anything other than DeviceNet™, CC-Link, or parallel input.  
Select "Nil," "S," or "T" for DeviceNet™ or CC-Link.  
Select "Nil," "1," "3," or "5" for parallel input.

## ⚠ Caution

### [CE-compliant products]

- ① EMC compliance was tested by combining the electric actuator LEY series and the controller LEC/JXC series.  
The EMC depends on the configuration of the customer's control panel and the relationship with other electrical equipment and wiring. Therefore, compliance with the EMC directive cannot be certified for SMC components incorporated into the customer's equipment under actual operating conditions. As a result, it is necessary for the customer to verify compliance with the EMC directive for the machinery and equipment as a whole.
- ② For the servo motor (24 VDC) specification, EMC compliance was tested by installing a noise filter set (LEC-NFA). Refer to page 224 for the noise filter set. Refer to the LECA series Operation Manual for installation.

## The actuator and controller/driver are sold as a package.

Confirm that the combination of the controller/driver and actuator is correct.

### <Check the following before use.>

- ① Check the actuator label for the model number. This number should match that of the controller/driver.
- ② Check that the Parallel I/O configuration matches (NPN or PNP).

\* Refer to the Operation Manual for using the products.  
Please download it via our website: <https://www.smcworld.com>

Rated voltage [V]			24 VDC ±10%								

\*1 Horizontal: The max. value of the work load. An external guide is necessary to support the load. (Friction coefficient of guide: 0.1 or less) The actual work load and transfer speed change according to the condition of the external guide. Also, speed changes according to the work load. Check the "Model Selection" on pages 155 and 156.

Vertical: Speed changes according to the work load. Check the "Model Selection" on pages 155 and 156.

The values shown in ( ) are the acceleration/deceleration. Set these values to be 3000 [mm/s<sup>2</sup>] or less.

\*2 Pushing force accuracy is ±20% (F.S.).

\*3 The thrust setting values for LEY25□ are 38% to 65%, for LEY32□ are 38% to 85%, and for LEY40□ are 35% to 65%. The pushing force values change according to the duty ratio and pushing speed. Check the "Model Selection" on page 158.

\*4 The speed and force may change depending on the cable length, load, and mounting conditions. Furthermore, if the cable length exceeds 5 m, then it will decrease by up to 10% for each 5 m. (At 15 m: Reduced by up to 20%)

\*5 The allowable speed for pushing operation. When push conveying a workpiece, operate at the vertical work load or less.

\*6 A reference value for correcting errors in reciprocal operation

\*7 Impact resistance: No malfunction occurred when the actuator was tested with a drop tester in both an axial direction and a perpendicular direction to the lead screw. (The test was performed with the actuator in the initial state.)

Vibration resistance: No malfunction occurred in a test ranging between 45 to 2000 Hz. The test was performed in both an axial direction and a perpendicular direction to the lead screw. (The test was performed with the actuator in the initial state.)

\*8 Cannot be used in an environment where oil such as cutting oil splashes or it is constantly exposed to water

Take appropriate protective measures. For details on enclosure, refer to the "Enclosure" on page 207.

\*9 Indicates the max. power during operation (including the controller). This value can be used for the selection of the power supply.

\*10 With lock only

\*11 For an actuator with lock, add the power for the lock.

### Body Bottom Tapped

Size	Stroke range [mm]	MA	MC	MD	MH	ML	MO	MR	XA	XB
25	30 to 39	20	24	32	29	50	M5 x 0.8	6.5	4	5
	40 to 100		42	41		75				
	101 to 124		59	49.5						
	125 to 200		76	58						
	201 to 400									
32/40	30 to 39	25	22	36	30	50	M6 x 1	8.5	5	6
	40 to 100		36	43		80				
	101 to 124		53	51.5						
	125 to 200		70	60						
	201 to 500									

- \*1 This is the range within which the rod can move when it returns to origin.  
Make sure that workpieces mounted on the rod do not interfere with other workpieces or the facilities around the rod.
- \*2 Position after return to origin
- \*3 [ ] for when the direction of return to origin has changed
- \*4 The direction of rod end width across flats (□K) differs depending on the products.
- \*5 The vent hole is the port for releasing to atmosphere. Do not apply pressure to this hole.  
Attach tubing to the vent hole and place the end of the tubing so it is not exposed to dust or water.

For the rod end male thread, refer to page 67. For the mounting bracket dimensions, refer to page 101.

# LEY-X7 Series Auto Switch Mounting

## Auto Switch Proper Mounting Position

Applicable auto switch: D-M9□A(V)

Size	Stroke range	Auto switch position				Return to origin distance	Operating range
		Leftward mounting		Rightward mounting			
		A	B	C	D		
25	15 to 100	27	62.5	39	50.5	(2)	4.2
	105 to 400	52		64			
32/40	20 to 100	30.5	85.5	42.5	53.5	(2)	4.9
	105 to 500	90.5		102.5			

- \* The values in the table above are to be used as a reference when mounting auto switches for stroke end detection. Adjust the auto switch after confirming the operating conditions in the actual setting.
- \* An auto switch cannot be mounted on the same side as a motor.
- \* For LEYG series models (with a guide), an auto switch cannot be mounted on the guide attachment side (rod side).
- \* Since the operating range is provided as a guideline including hysteresis, it cannot be guaranteed (assuming approx.  $\pm 30\%$  dispersion). It may change substantially depending on the ambient environment.

## Auto Switch Mounting

### Tightening Torque for Auto Switch Mounting Screw [N·m]

Auto switch model	Tightening torque
D-M9□A(V)	0.05 to 0.10

- \* When tightening the auto switch mounting screw (included with the auto switch), use a watchmaker's screwdriver with a handle diameter of 5 to 6 mm.

# Water Resistant 2-Color Indicator Solid State Auto Switch: Direct Mounting Type D-M9NA(V)/D-M9PA(V)/D-M9BA(V)

## Grommet

- Water (coolant) resistant type
- 2-wire load current is reduced (2.5 to 40 mA).
- The proper operating range can be determined by the color of the light. (Red → Green ← Red)
- Using flexible cable as standard spec.

## Caution

### Precautions

Fix the auto switch with the existing screw installed on the auto switch body. The auto switch may be damaged if a screw other than the one supplied is used. Please contact SMC if using coolant liquid other than water based solution.

## Weight

[g]

Auto switch model	D-M9NA(V)	D-M9PA(V)	D-M9BA(V)
Lead wire length

D	DIN rail*13

- \*1 Please contact SMC for non-standard strokes as they are produced as special orders.
- \*2 When "With lock" is selected for the top side parallel motor type, the motor body will stick out from the end of the body for strokes of 50 mm or less. Check for interference with workpieces before selecting a model.
- \*3 The mounting bracket is shipped together with the product but does not come assembled.
- \*4 For the horizontal cantilever mounting of the rod flange, head flange, or ends tapped types, use the actuator within the following stroke range.  
· LEY25: 200 mm or less · LEY32: 100 mm or less
- \*5 The rod flange type is not available for the LEY25/32 with strokes of 50 mm or less and motor option "With lock."
- \*6 The head flange type is not available for the LEY32.
- \*7 Produced upon receipt of order (Robotic cable only)
- \*8 For details on controllers/drivers and compatible motors, refer to the compatible controllers/drivers on the next page.

- \*9 Only available for the motor type "Step motor"
- \*10 When pulse signals are open collector, order the current limiting resistor (LEC-PA-R-□) on page 238 separately.
- \*11 When "Without controller/driver" is selected for controller/driver types, I/O cable cannot be selected. Refer to page 224 (For LECA6), page 234 (For LECP1), or page 240 (For LECPA) if I/O cable is required.
- \*12 When "Pulse input type" is selected for controller/driver types, pulse input usable only with differential. Only 1.5 m cables usable with open collector
- \*13 The DIN rail is not included. It must be ordered separately.
- \*14 Select "Nil" for anything other than DeviceNet™, CC-Link, or parallel input.  
Select "Nil," "S," or "T" for DeviceNet™ or CC-Link.  
Select "Nil," "1," "3," or "5" for parallel input.

## ⚠ Caution

### [CE-compliant products]

- ① EMC compliance was tested by combining the electric actuator LEY series and the controller LEC/JXC series.  
The EMC depends on the configuration of the customer's control panel and the relationship with other electrical equipment and wiring. Therefore, compliance with the EMC directive cannot be certified for SMC components incorporated into the customer's equipment under actual operating conditions. As a result, it is necessary for the customer to verify compliance with the EMC directive for the machinery and equipment as a whole.
- ② For the servo motor (24 VDC) specification, EMC compliance was tested by installing a noise filter set (LEC-NFA). Refer to page 224 for the noise filter set. Refer to the LECA series Operation Manual for installation.

## The actuator and controller/driver are sold as a package.

Confirm that the combination of the controller/driver and actuator is correct.

### <Check the following before use.>

- ① Check the actuator label for the model number. This number should match that of the controller/driver.
- ② Check that the Parallel I/O configuration matches (NPN or PNP).

\* Refer to the Operation Manual for using the products. Please download it via our website: <https://www.smcworld.com>

Max. acceleration/deceleration [mm/s <sup>2</sup> ]		3000							
Pushing speed [mm/s] <sup>*5</sup>		35 or less			30 or less				
Positioning repeatability [mm]		±0.02							
Lost motion [mm] <sup>*6</sup>		0.1 or less							
Screw lead [mm]		12	6	3	16	8	4		
Impact/Vibration resistance [m/s <sup>2</sup> ] <sup>*7</sup>		50/20							
Actuation type		Ball screw + Belt (LEY□) Ball screw (LEY□D)							
Guide type		Sliding bushing (Piston rod)							
Enclosure <sup>*8</sup>		IP65 equivalent							
Operating temperature range [°C]		5 to 40							
Operating humidity range [%RH]		90 or less (No condensation)							
Motor size		□42			□56.4				
Motor type		Step motor (Servo/24 VDC)							
Encoder		Incremental							
Power supply voltage [V]		24 VDC ±10%							
Power [W] <sup>*9 *11</sup>		Max. power 48			Max. power 104				
Type <sup>*10</sup>		Non-magnetizing lock							
Holding force [N]		78	157	294	108	216	421		
Power [W] <sup>*11</sup>		5			5				
Rated voltage [V]		24 VDC ±10%							

\*1 Horizontal: The max. value of the work load. An external guide is necessary to support the load. (Friction coefficient of guide: 0.1 or less) The actual work load and transfer speed change according to the condition of the external guide. Also, speed changes according to the work load. Check the "Model Selection" on pages 160 and 161.

Vertical: Speed changes according to the work load. Check the "Model Selection" on pages 160 and 161.

The values shown in ( ) are the acceleration/deceleration. Set these values to be 3000 [mm/s<sup>2</sup>] or less.

\*2 Pushing force accuracy is ±20% (F.S.).

\*3 The thrust setting values for LEY25□ are 38% to 65% and for LEY32□ are 38% to 85%. The pushing force values change according to the duty ratio and pushing speed. Check the "Model Selection" on page 162.

\*4 The speed and force may change depending on the cable length, load, and mounting conditions. Furthermore, if the cable length exceeds 5 m, then it will decrease by up to 10% for each 5 m. (At 15 m: Reduced by up to 20%)

\*5 The allowable speed for pushing operations. When push conveying a workpiece, operate at the vertical work load or less.

\*6 A reference value for correcting errors in reciprocal operation

\*7 Impact resistance: No malfunction occurred when the actuator was tested with a drop tester in both an axial direction and a perpendicular direction to the lead screw. (The test was performed with the actuator in the initial state.)

Vibration resistance: No malfunction occurred in a test ranging between 45 to 2000 Hz. The test was performed in both an axial direction and a perpendicular direction to the lead screw. (The test was performed with the actuator in the initial state.)

\*8 Cannot be used in an environment where oil such as cutting oil splashes or it is constantly exposed to water

Take appropriate protective measures. For details on enclosure, refer to the "Enclosure" on page 207.

\*9 Indicates the max. power during operation (including the controller). This value can be used for the selection of the power supply.

\*10 With lock only

\*11 For an actuator with lock, add the power for the lock.

\*12 When mounting vertically and using the product facing upwards in an environment where water is present, take necessary measures to prevent water from splashing on the rod cover, because water will accumulate on the rod seal due to the structure of the product.

- \*7 Cannot be used in an environment where oil such as cutting oil splashes or it is constantly exposed to water  
Take appropriate protective measures. For details on enclosure, refer to the "Enclosure" on page 207.
- \*8 Indicates the max. power during operation (including the controller). This value can be used for the selection of the power supply.
- \*9 With lock only
- \*10 For an actuator with lock, add the power for the lock.
- \*11 When mounting vertically and using the product facing upwards in an environment where water is present, take necessary measures to prevent water from splashing on the rod cover, because water will accumulate on the rod seal due to the structure of the product.

## Weight

### Weight: Top Side Parallel Motor Type

Model		LEY25-X5										LEY32-X5									
Stroke [mm]		30	50	100	150	200	250	300	350	400	30	50	100	150	200	250	300	350	400	450	500

	Servo motor	1.41	1.48	1.65	1.91	2.09	2.26	2.44	2.61	2.79	—	—	—	—	—	—	—	—	—	—	—

### Weight: In-line Motor Type

Model		LEY25D-X5										LEY32D-X5									
Stroke [mm]		30	50	100	150	200	250	300	350	400	30	50	100	150	200	250	300	350	400	450	500
Product weight [kg]	Step motor	1.46	1.53	1.70	1.96	2.14	2.31	2.49	2.66	2.84	2.49	2.60	2.89	3.36	3.65	3.92	4.22	4.50	4.77	5.05	5.33
	Servo motor	1.42	1.49	1.66	1.92	2.10	2.27	2.45	2.62	2.80	—	—	—	—	—	—	—	—	—	—	—

### Additional Weight

Size		25	32
Lock		0.33	0.63
Rod end male thread	Male thread	0.03	0.03
	Nut	0.02	0.02
Foot bracket (2 sets including mounting bolt)		0.08	0.14
Rod flange (including mounting bolt)		0.17	0.20
Head flange (including mounting bolt)			

## Construction

Top side parallel motor type: LEY<sup>25</sup><sub>32</sub>

In-line motor type: LEY<sup>25</sup><sub>32</sub>D

### Component Parts

No.	Description	Material	Note
1	Body	Aluminum alloy	Anodized
2	Ball screw shaft	Alloy steel	
3	Ball screw nut	Synthetic resin/Alloy steel	
4	Piston	Aluminum alloy	
5	Piston rod	Stainless steel	Hard chrome plating
6	Rod cover	Aluminum alloy	
7	Bearing holder	Aluminum alloy	
8	Rotation stopper	Synthetic resin	
9	Socket	Free cutting carbon steel	Nickel plating
10	Connected shaft	Free cutting carbon steel	Nickel plating
11	Bushing	Bearing alloy	
12	Bearing	—	
13	Return box	Aluminum die-cast	Coating
14	Return plate	Aluminum die-cast	Coating
15	Magnet	—	
16	Wear ring holder	Stainless steel	Stroke 101 mm or more
17	Wear ring	Synthetic resin	Stroke 101 mm or more
18	Screw shaft pulley	Aluminum alloy	
19	Motor pulley	Aluminum alloy	

### Replacement Parts (Top side parallel only)/Belt

No.	Size	Order no.
20	25	LE-D-2-2
	32	LE-D-2-3

### Replacement Parts/Grease Pack

Applied portion	Order no.
Piston rod	GR-S-010 (10 g) GR-S-020 (20 g)

\* Apply grease to the piston rod periodically.  
Grease should be applied when 1 million cycles or 200 km have been reached, whichever comes first.

No.	Description	Material	Note
20	Belt	—	
21	Scraper	Synthetic resin	
22	Retaining ring	Steel for spring	Phosphate coating
23	Motor	—	
24	Lube-retainer	Felt	
25	O-ring	NBR	
26	Gasket	NBR	
27	Motor adapter	Aluminum alloy	Anodized
28	Motor cover	Aluminum alloy	Anodized
29	Seal connector	—	
30	End cover	Aluminum alloy	Anodized
31	Hub	Aluminum alloy	
32	Spider	NBR	
33	Motor block	Aluminum alloy	Anodized
34	Motor adapter	Aluminum alloy	LEY25 only
35	Socket (Male thread)	Free cutting carbon steel	Nickel plating
36	Nut	Alloy steel	Zinc chromating

### Body Bottom Tapped

[mm]

Size	Stroke range [mm]	MA	MB	MC	MD	MH	ML	MO	MR	XA	XB
25	15 to 39	20	46	24	32	29	50	M5 x 0.8	6.5	4	5
	40 to 100			42	41						
	101 to 124			59	49.5						
	125 to 200			76	58						
	201 to 400			76	58						
32	20 to 39	25	55	22	36	30	50	M6 x 1	8.5	5	6
	40 to 100			36	43						
	101 to 124			53	51.5						
	125 to 200			53	51.5						
	201 to 500			70	60						

\*1 This is the range within which the rod can move when it returns to origin. Make sure that workpieces mounted on the rod do not interfere with other workpieces or the facilities around the rod.

\*2 Position after returning to origin

\*3 [ ] for when the direction of return to origin has changed

\*4 The direction of rod end width across flats (□K) differs depending on the products.

\*5 The vent hole is the port for releasing to atmosphere. Do not apply pressure to this hole.

Attach tubing to the vent hole and place the end of the tubing so it is not exposed to dust or water.

For the rod end male thread, refer to page 67. For the mounting bracket dimensions, refer to page 101.

Specific Product Precautions

The LECSB-S, LECS-C-S, and LECS-S electric actuator drivers are to be discontinued. The LECSB-T, LECS-C-T, and LECS-S-T drivers are available as substitutes. In the product number, select T6 instead of S6, or T7 instead of S7 for the **Motor type**, and select B2 instead of B1, C2 instead of C1, or S2 instead of S1 for the **Driver type**.

# Electric Actuator

## Rod Type **Dust-tight/Water-jet-proof (IP65 Equivalent)**

### LEY-X5 (Made to Order) Series LEY25, 32

Refer to page 41 for model selection.

Size 63 is available by selecting option P. Refer to page 79.

\* For details, refer to page 307 and onward.

**LECY** □ Series ▶ p. 187

#### How to Order

• Made to order:  
Dust-tight/  
Water-jet-proof

#### ① Accuracy

Nil	Basic type
H	High-precision type

#### ② Size

25
32

#### ③ Motor mounting position

Nil	Top side parallel
D	In-line

#### ④ Motor type

Symbol	Type	Output [W]	Actuator size	Compatible drivers
S2*1	AC servo motor (Incremental encoder)	100	25	LECSA□-S1
S3		200	32	LECSA□-S3
S6*1	AC servo motor (Absolute encoder)	100	25	LECSB□-S5 LECS-C□-S5 LECSS□-S5
S7		200	32	LECSB□-S7 LECS-C□-S7 LECSS□-S7
T6*2	AC servo motor (Absolute encoder)	100	25	LECSB2-T5 LECS-C2-T5 LECSN2-T5-□ LECSS2-T5
T7		200	32	LECSB2-T7 LECS-C2-T7 LECSN2-T7-□ LECSS2-T7

\*1 For motor type S2 and S6, the compatible driver part number suffixes are S1 and S5 respectively.

\*2 For motor type T6, the compatible driver part number is LECS□2-T5.

#### ⑤ Lead [mm]

Symbol	LEY25□	LEY32□*1
A	12	16 (20)
B	6	8 (10)
C	3	4 (5)

\*1 The values shown in ( ) are the equivalent leads which include the pulley ratio for the size 32 top side parallel motor type.

#### ⑥ Stroke [mm]

30	30
to	to
500	500

\* For details, refer to the applicable stroke table below.

#### ⑦ Motor option

Nil	Without option
B	With lock*1

\*1 When "With lock" is selected for the top side parallel motor type, the motor body will stick out from the end of the body for size 25 with strokes of 30 mm or less. Check for interference with workpieces before selecting a model.

#### ⑧ Rod end thread

Nil	Rod end female thread
M	Rod end male thread (1 rod end nut is included.)

#### ⑨ Mounting\*1

Symbol	Type	Motor mounting position	
		Parallel	In-line
Nil	Ends tapped/ Body bottom tapped*2	●	●
L	Foot bracket	●	—
F	Rod flange*2	●*3	●
G	Head flange*2	●*4	—

\*1 The mounting bracket is shipped together with the product but does not come assembled.

\*2 For the horizontal cantilever mounting of the rod flange, head flange, or ends tapped types, use the actuator within the following stroke range.

- LEY25: 200 mm or less
- LEY32: 100 mm or less

\*3 The rod flange type is not available for the LEY25 with a 30 mm stroke and motor option "With lock."

\*4 The head flange type is not available for the LEY32.

#### Applicable Stroke Table

Model	Stroke											Manufacturable stroke range [mm]
	30	50	100	150	200	250	300	350	400	450	500	
LEY25	●	●	●	●	●	●	●	●	●	—	—	15 to 400
LEY32	●	●	●	●	●	●	●	●	●	●	●	20 to 500

\* Please contact SMC for non-standard strokes as they are produced as special orders.

\* For auto switches, refer to pages 192 and 193.

# Electric Actuator Rod Type **LEY-X5 Series**

AC Servo Motor

Dust-tight/Water-jet-proof (IP65 Equivalent)

## 10 Cable type\*1 \*2

Nil	Without cable
S	Standard cable
R	Robotic cable (Flexible cable)

\*1 A motor cable and encoder cable are included with the product. (A lock cable is also included if motor option "B: With lock" is selected.)

\*2 Standard cable entry direction is  
 • Top side parallel: (A) Axis side  
 • In-line: (B) Counter axis side  
 (Refer to page 290 for details.)

## 11 Cable length [m]\*1

Nil	Without cable
2	2
5	5
A	10

\*1 The length of the encoder, motor, and lock cables are the same.

## 12 Driver type\*1

	Compatible drivers	Power supply voltage [V]
Nil	Without driver	—
A1	LECSA1-S□	100 to 120
A2	LECSA2-S□	200 to 230
B1	LECSB1-S□	100 to 120
B2	LECSB2-S□	200 to 230
	LECSB2-T□	200 to 240
C1	LECS1-S□	100 to 120
C2	LECS2-S□	200 to 230
	LECS2-T□	
S1	LECSS1-S□	100 to 120
S2	LECSS2-S□	200 to 230
	LECSS2-T□	200 to 240
N2	LECSN2-T□	200 to 240
E2	LECSN2-T□-E	200 to 240
92	LECSN2-T□-9	200 to 240
P2	LECSN2-T□-P	200 to 240

\*1 When a driver type is selected, a cable is included. Select the cable type and cable length.

Example)

S2S2: Standard cable (2 m) + Driver (LECSS2)

S2: Standard cable (2 m)

Nil: Without cable and driver

## 13 I/O cable length [m]\*1

Nil	Without cable
H	Without cable (Connector only)
1	1.5

\*1 When "Nil: Without driver" is selected for the driver type, only "Nil: Without cable" can be selected.

Refer to page 291 if an I/O cable is required. (Options are shown on page 291.)

## Compatible Drivers

Rated voltage [V]					24 VDC <sup>0</sup> / <sub>-10%</sub>								

- \*1 This is the max. value of the horizontal work load. An external guide is necessary to support the load (Friction coefficient of guide: 0.1 or less). The actual work load changes according to the condition of the external guide. Confirm the load using the actual device.
- \*2 The force setting range (set values for the driver) for the force control with the torque control mode. Set it while referencing the "Force Conversion Graph" on pages 45 and 46. The driver applicable to the pushing operation is "LECSS", "LECSB-T", and "LECSN-T". The LECSB2-T is only applicable when the control method is positioning. The point table is used to set the pushing operation settings.  
To set the pushing operation settings, an additional dedicated file (pushing operation extension file) must be downloaded separately to be used with the setup software (MR Configurator2™: LEC-MRC2□). Please download this dedicated file from the SMC website: <https://www.smcworld.com>  
When selecting the LECSN or LECSN2-T, combine it with upper level equipment (such as the Simple Motion module manufactured by Mitsubishi Electric Corporation) which has a pushing operation function.  
\*\* For customer-provided PLC and motion controller setting and usage instructions, confirm with the retailer or manufacturer.
- \*3 The allowable speed changes according to the stroke.
- \*4 The allowable collision speed for collision with the workpiece with the torque control mode
- \*5 A reference value for correcting errors in reciprocal operation

- \*6 Impact resistance: No malfunction occurred when the actuator was tested with a drop tester in both an axial direction and a perpendicular direction to the lead screw. (The test was performed with the actuator in the initial state.)  
Vibration resistance: No malfunction occurred in a test ranging between 45 to 2000 Hz. The test was performed in both an axial direction and a perpendicular direction to the lead screw. (The test was performed with the actuator in the initial state.)
- \*7 Cannot be used in an environment where oil such as cutting oil splashes or it is constantly exposed to water  
Take appropriate protective measures. For details on enclosure, refer to the "Enclosure" on page 207.
- \*8 When mounting vertically and using the product facing upwards in an environment where water is present, take necessary measures to prevent water from splashing on the rod cover, because water will accumulate on the rod seal due to the structure of the product.
- \*9 Indicates the max. power during operation (including the driver)  
When selecting the power supply capacity, refer to the power supply capacity in the operation manual of each driver.
- \*10 Only when motor option "With lock" is selected
- \*11 The resolution will change depending on the driver type.
- \*12 For motor type T6 and T7, the set value is from 12 to 24%.

### Body Bottom Tapped

Size	Stroke range [mm]	MA	MB	MC	MD	MH	ML	MO	MR	XA	XB
25	15 to 39	20	46	24	32	29	50	M5 x 0.8	6.5	4	5
	40 to 100			42	41						
	101 to 124			59	49.5						
	125 to 200			76	58						
	201 to 400			76	58						
32	20 to 39	25	55	22	36	30	50	M6 x 1	8.5	5	6
	40 to 100			36	43						
	101 to 124			53	51.5						
	125 to 200			53	51.5						
	201 to 500			70	60						

\*1 This is the range within which the rod can move. Make sure that workpieces mounted on the rod do not interfere with other workpieces or the facilities around the rod.

\*2 The direction of rod end width across flats (□K) differs depending on the products.

\*3 The vent hole is the port for releasing to atmosphere. Do not apply pressure to this hole.

Attach tubing to the vent hole and place the end of the tubing so it is not exposed to dust or water.

For the rod end male thread, refer to page 77. For the mounting bracket dimensions, refer to page 101.

## LEY-X5 (Made to Order) Series LEY25, 32

Refer to page 49 for model selection.

Size 63 is available by selecting option P. Refer to page 91.

\* For details, refer to page 307 and onward.

LECS Series ▶ p. 181

### How to Order

• Made to order:  
Dust-tight/  
Water-jet-proof

#### 1 Accuracy

Nil	Basic type
H	High-precision type

#### 2 Size

25
32

#### 3 Motor mounting position

Nil	Top side parallel
D	In-line

#### 4 Motor type

Symbol	Type	Output [W]	Size	Compatible drivers
V6*1	AC servo motor (Absolute encoder)	100	25	LECYM2-V5 LECYU2-V5
V7		200	32	LECYM2-V7 LECYU2-V7

\*1 For motor type V6, the compatible driver part number suffix is V5.

#### 5 Lead [mm]

Symbol	LEY25	LEY32
A	12	16 (20)
B	6	8 (10)
C	3	4 (5)

\* The values shown in ( ) are the leads for the top side parallel motor type. (Equivalent leads which include the pulley ratio [1.25:1])

#### 6 Stroke [mm]

30	30
to	to
500	500

\* For details, refer to the applicable stroke table below.

#### 7 Motor option

Nil	Without option
B	With lock

\* When "With lock" is selected for the top side parallel motor type, the motor body will stick out from the end of the body for size 25 with strokes of 30 mm or less. Check for interference with workpieces before selecting a model.

#### 8 Rod end thread

Nil	Rod end female thread
M	Rod end male thread (1 rod end nut is included.)

#### Applicable Stroke Table

●: Standard

Model	Stroke [mm]	30	50	100	150	200	250	300	350	400	450	500	Manufacturable stroke range
LEY25		●	●	●	●	●	●	●	●	●	—	—	15 to 400
LEY32		●	●	●	●	●	●	●	●	●	●	●	20 to 500

\* Please contact SMC for non-standard strokes as they are produced as special orders.

For auto switches, refer to pages 192 and 193.

# Electric Actuator Rod Type **LEY-X5 Series**

AC Servo Motor

Dust-tight/Water-jet-proof (IP65 Equivalent)

Motor mounting position: Parallel

Motor mounting position: In-line

## 9 Mounting\*1

Symbol	Type	Motor mounting position	
		Parallel	In-line
Nil	Ends tapped/ Body bottom tapped*2	●	●
L	Foot bracket	●	—
F	Rod flange*2	●*3	●
G	Head flange*2	●*4	—

\*1 The mounting bracket is shipped together with the product but does not come assembled.

\*2 For the horizontal cantilever mounting of the ends tapped, rod flange, or head flange types, use the actuator within the following stroke range.  
· LEY25: 200 mm or less · LEY32: 100 mm or less

\*3 The rod flange type is not available for the LEY25 with a 30 mm stroke and motor option "With lock."

\*4 The head flange type is not available for the LEY32.

## 10 Cable type\*1

Nil	Without cable
S	Standard cable
R	Robotic cable (Flexible cable)

\*1 A motor cable and encoder cable are included with the product.

The motor cable for lock option is included when the motor with lock option is selected.

## 11 Cable length [m]\*1

Nil	Without cable
3	3
5	5
A	10
C	20

\*1 The length of the motor and encoder cables are the same. (For with lock)

## 12 Driver type

	Compatible drivers	Power supply voltage [V]
Nil	Without driver	—
M2	LECYM2-V□	200 to 230
U2	LECYU2-V□	200 to 230

\* When a driver type is selected, a cable is included. Select the cable type and cable length.

## 13 I/O cable length [m]\*1

Nil	Without cable
H	Without cable (Connector only)
1	1.5

\*1 When "Nil: Without driver" is selected for the driver type, only "Nil: Without cable" can be selected.

Refer to page 302 if an I/O cable is required. (Options are shown on page 302.)

## Compatible Drivers

Driver type	MECHATROLINK-II type	MECHATROLINK-III type
		
Series	LECYM	LECYU
Applicable network	MECHATROLINK-II	MECHATROLINK-III
Control encoder	Absolute 20-bit encoder	
Communication device	USB communication, RS-422 communication	
Power supply voltage [V]	200 to 230 VAC (50/60 Hz)	
Reference page	295	

# LEY-X5 Series

AC Servo Motor

Dust-tight/Water-jet-proof (IP65 Equivalent)

## Specifications: LECY

Model		LEY25V6-X5/LEY25DV6-X5				LEY32V7-X5 (Parallel)			LEY32DV7-X5 (In-line)				
Actuator specifications	Work load [kg]	Horizontal <sup>*1</sup>	18	50	50	30	60	60	30	60	60		
		Vertical <sup>*9</sup>	8	16	30	9	19	37	12	24	46

Enclosure <sup>*8</sup>		IP65 equivalent											
Operating temperature range [°C]		5 to 40				5 to 40							
Operating humidity range [%RH]		90 or less (No condensation)				90 or less (No condensation)							
Required conditions for the regenerative resistor <sup>*10</sup> [kg]	Horizontal		Not required				Not required						
	Vertical		6 or more				4 or more						
Motor output/Size		100 W/□40				200 W/□60							
Motor type		AC servo motor (200 VAC)				AC servo motor (200 VAC)							
Encoder		Absolute 20-bit encoder (Resolution: 1048576 p/rev)											
Power [W] <sup>*11</sup>	Type <sup>*12</sup>		Non-magnetizing lock										
			Max. power 445				Max. power 724			Max. power 724			
Lock unit specifications	Holding force [N]		131	255	485	157	308	588	197	385	736		
	Power at 20°C [W]		5.5				6			6			
	Rated voltage [V]		24 VDC <sup>+10%</sup> / <sub>0</sub>										

- \*1 This is the max. value of the horizontal work load. An external guide is necessary to support the load (Friction coefficient of guide: 0.1 or less). The actual work load changes according to the condition of the external guide. Confirm the load using the actual device.
- \*2 The force setting range (set values for the driver) for the force control with the torque control mode  
Set it while referencing the "Force Conversion Graph (Guide)" on page 53.
- \*3 The allowable speed changes according to the stroke.
- \*4 The allowable collision speed for collision with the workpiece with the torque control mode
- \*5 A reference value for correcting errors in reciprocal operation
- \*6 Equivalent leads which include the pulley ratio [1.25:1]
- \*7 Impact resistance: No malfunction occurred when the actuator was tested with a drop tester in both an axial direction and a perpendicular direction to the lead screw. (The test was performed with the actuator in the initial state.)  
Vibration resistance: No malfunction occurred in a test ranging between 45 to 2000 Hz. The test was performed in both an axial direction and a perpendicular direction to the lead screw. (The test was performed with the actuator in the initial state.)

- \*8 Cannot be used in an environment where oil such as cutting oil splashes or it is constantly exposed to water  
Take appropriate protective measures. For details on enclosure, refer to the "Enclosure" on page 207.
- \*9 When mounting vertically and using the product facing upwards in an environment where water is present, take necessary measures to prevent water from splashing on the rod cover, because water will accumulate on the rod seal due to the structure of the product.
- \*10 The work load conditions which require the regenerative resistor when operating at the max. speed (Duty ratio: 100%). Order the regenerative resistor separately. For details, refer to the "Required Conditions for the Regenerative Resistor (Guide)" on pages 51 and 52.
- \*11 Indicates the max. power during operation (including the driver)  
When selecting the power supply capacity, refer to the power supply capacity in the operation manual of each driver.
- \*12 Only when motor option "With lock" is selected

### Body Bottom Tapped

Size	Stroke range [mm]	MA	MB	MC	MD	MH	ML	MO	MR	XA	XB
25	15 to 39	20	46	24	32	29	50	M5 x 0.8	6.5	4	5
	40 to 100			42	41						
	101 to 124			59	49.5						
	125 to 200			76	58						
	201 to 400			76	58						
32	20 to 39	25	55	22	36	30	50	M6 x 1	8.5	5	6
	40 to 100			36	43						
	101 to 124			53	51.5						
	125 to 200			53	51.5						
	201 to 500			70	60						

\*1 This is the range within which the rod can move. Make sure that workpieces mounted on the rod do not interfere with other workpieces or the facilities around the rod.

\*2 The direction of rod end width across flats (□K) differs depending on the products.

\*3 The vent hole is the port for releasing to atmosphere. Do not apply pressure to this hole.

Attach tubing to the vent hole and place the end of the tubing so it is not exposed to dust or water.

For the rod end male thread, refer to page 99. For the mounting bracket dimensions, refer to page 101.

# LEY-X5 Series Auto Switch Mounting

## Auto Switch Proper Mounting Position

Applicable auto switch: D-M9□A(V)

LEY25, 32

➔ Switch mounting groove

Size	Stroke range	Auto switch position				Return to origin distance	Operating range
		Leftward mounting		Rightward mounting			
		A	B	C	D		
25	15 to 100	27	62.5	39	50.5	(2)	4.2
	105 to 400	52		64			
32	20 to 100	30.5	85.5	42.5	53.5	(2)	4.9
	105 to 500	90.5		102.5			

- \* The values in the table above are to be used as a reference when mounting auto switches for stroke end detection. Adjust the auto switch after confirming the operating conditions in the actual setting.
- \* An auto switch cannot be mounted on the same side as a motor.
- \* For LEYG series models (with a guide), an auto switch cannot be mounted on the guide attachment side (rod side).
- \* Since the operating range is provided as a guideline including hysteresis, it cannot be guaranteed (assuming approx.  $\pm 30\%$  dispersion). It may change substantially depending on the ambient environment.

## Auto Switch Mounting

### Tightening Torque for Auto Switch Mounting Screw [N·m]

Auto switch model	Tightening torque
D-M9□A(V)	0.05 to 0.10

- \* When tightening the auto switch mounting screw (included with the auto switch), use a watchmaker's screwdriver with a handle diameter of 5 to 6 mm.

# Water Resistant 2-Color Indicator Solid State Auto Switch: Direct Mounting Type D-M9NA(V)/D-M9PA(V)/D-M9BA(V)

## Grommet

- Water (coolant) resistant type
- 2-wire load current is reduced (2.5 to 40 mA).
- The proper operating range can be determined by the color of the light. (Red → Green ← Red)
- Using flexible cable as standard spec.

## Caution

### Precautions

Fix the auto switch with the existing screw installed on the auto switch body. The auto switch may be damaged if a screw other than the one supplied is used. Please contact SMC if using coolant liquid other than water based solution.

- \*1 Please contact SMC for non-standard strokes as they are produced as special orders.
- \*2 When "With lock" or "With lock/motor cover" is selected for the top/right/left side parallel motor types, the motor body will stick out from the end of the body for size 16/40 with strokes of 30 mm or less. Check for interference with workpieces before selecting a model.
- \*3 When ordering foot brackets, order 2 pieces per actuator.
- \*4 Parts belonging to each bracket are as follows.  
Foot bracket, Flange: Body mounting bolt, Double clevis: Clevis pin, Type C retaining ring for axis, Body mounting bolt
- \*5 The mounting bracket is shipped together with the product but does not come assembled.
- \*6 For the horizontal cantilever mounting of the rod flange, head flange, or ends tapped types, use the actuator within the following stroke range.  
- LEY25: 200 mm or less - LEY32/40: 100 mm or less
- \*7 For the mounting of the double clevis type, use the actuator within the following stroke range.  
- LEY16: 100 mm or less - LEY25: 200 mm or less - LEY32/40: 200 mm or less
- \*8 The rod flange type is not available for the LEY16/40 with a 30 mm stroke and motor option "With lock," "With lock/motor cover."
- \*9 The head flange type is not available for the LEY32/40.
- \*10 Produced upon receipt of order (Robotic cable only)

- \*11 The standard cable should only be used on fixed parts. For use on moving parts, select the robotic cable. Refer to pages 258 and 259 if only the actuator cable is required.
- \*12 For details on controllers/drivers and compatible motors, refer to the compatible controllers/drivers on the next page.
- \*13 Only available for the motor type "Step motor"
- \*14 When pulse signals are open collector, order the current limiting resistor (LEC-PA-R-□) on page 240 separately.
- \*15 When "Without controller/driver" is selected for controller/driver types, I/O cable cannot be selected. Refer to page 224 (For LECA6), page 234 (For LECP1), or page 240 (For LECPA) if I/O cable is required.
- \*16 When "Pulse input type" is selected for controller/driver types, pulse input usable only with differential. Only 1.5 m cables usable with open collector
- \*17 The DIN rail is not included. It must be ordered separately.
- \*18 Select "Nil" for anything other than DeviceNet™, CC-Link, or parallel input.  
Select "Nil," "S," or "T" for DeviceNet™ or CC-Link.  
Select "Nil," "1," "3," or "5" for parallel input.

## ⚠ Caution

### [CE-compliant products]

- ① EMC compliance was tested by combining the electric actuator LEY series and the controller LEC/JXC series.  
The EMC depends on the configuration of the customer's control panel and the relationship with other electrical equipment and wiring. Therefore, compliance with the EMC directive cannot be certified for SMC components incorporated into the customer's equipment under actual operating conditions. As a result, it is necessary for the customer to verify compliance with the EMC directive for the machinery and equipment as a whole.
- ② For the servo motor (24 VDC) specification, EMC compliance was tested by installing a noise filter set (LEC-NFA). Refer to page 224 for the noise filter set. Refer to the LECA series Operation Manual for installation.

### [UL-compliant products (For the LEC series)]

When compliance with UL is required, the electric actuator and controller/driver should be used with a UL1310 Class 2 power supply.

## The actuator and controller/driver are sold as a package.

Confirm that the combination of the controller/driver and actuator is correct.

### <Check the following before use.>

- ① Check the actuator label for the model number (after "25A-"). This number should match that of the controller/driver.
- ② Check that the Parallel I/O configuration matches (NPN or PNP).

\* Refer to the Operation Manual for using the products. Please download it via our website: <https://www.smcworld.com>

Secondary Battery Compatible

\* For details, refer to page 307 and onward.

## 25A-LEY Series LEY25, 32 Size 25, 32

LECS □ Series ▶ p. 199

Refer to page 49 for model selection.

### How to Order

Series compatible with secondary batteries

#### 1 Accuracy

Nil	Basic type
H	High-precision type

#### 2 Size

25
32

#### 3 Motor mounting position

Nil	Top side parallel
R	Right side parallel
L	Left side parallel
D	In-line

#### 4 Motor type

Symbol	Type	Output [W]	Size	Compatible drivers
V6*1	AC servo motor (Absolute encoder)	100	25	LECYM2-V5 LECYU2-V5
V7		200	32	LECYM2-V7 LECYU2-V7

\*1 For motor type V6, the compatible driver part number suffix is V5.

#### 5 Lead [mm]

Symbol	25A-LEY25	25A-LEY32*1
A	12	16 (20)
B	6	8 (10)
C	3	4 (5)

\*1 The values shown in ( ) are the leads for the size 32 top/right/left side parallel motor types. (Equivalent leads which include the pulley ratio [1.25:1])

#### 6 Stroke [mm]

30	30
to	to
500	500

\* For details, refer to the applicable stroke table below.

#### 7 Motor option

Nil	Without option
B	With lock*1

\*1 When "With lock" is selected for the top/right/left side parallel motor types, the motor body will stick out from the end of the body for size 25 with strokes of 30 mm or less. Check for interference with workpieces before selecting a model.

#### 8 Rod end thread

Nil	Rod end female thread
M	Rod end male thread (1 rod end nut is included.)

#### 9 Mounting\*1

Symbol	Type	Motor mounting position	
		Parallel	In-line
Nil	Ends tapped/ Body bottom tapped *2	●	●
L	Foot bracket	●	—
F	Rod flange*2	●*4	●
G	Head flange*2	●*5	—
D	Double clevis*3	●	—

- \*1 The mounting bracket is shipped together with the product but does not come assembled.
- \*2 For the horizontal cantilever mounting of the rod flange, head flange, or ends tapped types, use the actuator within the following stroke range.
  - LEY25: 200 mm or less · LEY32: 100 mm or less
- \*3 For the mounting of the double clevis type, use the actuator within the following stroke range.
  - LEY25: 200 mm or less · LEY32: 200 mm or less
- \*4 The rod flange type is not available for the LEY25 with a 30 mm stroke and motor option "With lock."
- \*5 The head flange type is not available for the LEY32.

#### Mounting Bracket Part Nos. for the 25A- Series

Applicable size	Foot bracket*1	Flange	Double clevis
25	25-LEY-L025	25-LEY-F025	25-LEY-D025
32	25-LEY-L032	25-LEY-F032	25-LEY-D032
Surface treatment	RAYDENT®	RAYDENT®	Coating (Size 16: Electroless nickel plating)

\*1 When ordering foot brackets, order 2 pieces per actuator.

\* Parts belonging to each bracket are as follows.

Foot bracket, Flange: Body mounting bolt, Double clevis: Clevis pin, Type C retaining ring for axis, Body mounting bolt

Solid state auto switches should be ordered separately. For details on auto switches, refer to page 203.

#### Applicable auto switches

D-M9N(V)-900, D-M9P(V)-900, D-M9B(V)-900  
D-M9NW(V)-900, D-M9PW(V)-900, D-M9BW(V)-900

#### Applicable Stroke Table

Model	Stroke [mm]	●: Standard											Manufacturable stroke range [mm]
		30	50	100	150	200	250	300	350	400	450	500

				2-wire		D-M9BWV-900	●	●	●	○	○

\* Solid state auto switches marked with a "○" are produced upon receipt of order.

\* Auto switches cannot be ordered with the actuator part number. They should be ordered separately. Please refer below for ordering.  
One each of the right-hand-type and the left-hand-type are shipped together with the actuator.

### Ordering the Auto Switches

- Individual auto switch: D-M9BWL-900  
(Place the order with the part number for auto switch shown in the table above.)
- \* Lead wire length symbols: 0.5 m..... Nil (Example) M9NW  
1 m..... M (Example) M9NWM  
3 m..... L (Example) M9NWL  
5 m..... Z (Example) M9NWZ

# LEY/LEYG Series Specific Product Precautions 1

Be sure to read this before handling the products. Refer to the back cover for safety instructions. For electric actuator and auto switch precautions, refer to the “Handling Precautions for SMC Products” and the “Operation Manual” on the SMC website: <https://www.smcworld.com>

## Design / Selection

### Warning

- Do not apply a load in excess of the specification limits.**  
Select a suitable actuator by work load and allowable lateral load on the rod end. If a load in excess of the specification limits is applied to the piston rod, the generation of play in the piston rod sliding parts, reduced accuracy, etc., may occur and adversely affect the operation and service life of the product.
- Do not use the product in applications where excessive external force or impact force is applied to it.**  
Failure to do so may result in a malfunction.
- When used as a stopper, select the LEYG series “Sliding bearing” for strokes of 30 mm or less.**
- When used as a stopper, fix the main body with a guide attachment (“Top mounting” or “Bottom mounting”).**  
If the end of the actuator is used to fix the main body (end mounting), the excessive load acts on the actuator, which may adversely affect the operation and service life of the product.

## Handling

### Caution

- INP output signal**
  - Positioning operation**  
When the product comes within the set range of the step data [In position], the INP output signal will turn ON.  
Initial value: Set to [0.50] or higher.
  - Pushing operation**  
When the effective force exceeds the step data [Trigger LV], the INP output signal will turn ON.  
Use the product within the specified range of the [Pushing force] and [Trigger LV].
    - To ensure that the actuator pushes the workpieces with the set [Pushing force], it is recommended that the [Trigger LV] be set to the same value as the [Pushing force].
    - When the [Pushing force] and the [Trigger LV] are set below the specified range, the INP output signal will turn ON from the pushing start position.

<Limit Values for Pushing Force and Trigger Level in Relation to Pushing Speed>  
Without Load

Model	Lead	Pushing speed [mm/s]	Pushing force (Setting input value)	Model	Lead	Pushing speed [mm/s]	Pushing force (Setting input value)
LEY□16□	A/B/C	21 to 50	60 to 85%	LEY□16□A	A/B/C	21 to 50	80 to 95%
LEY□25□	A/B/C	21 to 35	50 to 65%	LEY□25□A	A/B/C	21 to 35	80 to 95%
LEY□32□	A	24 to 30	60 to 85%				
	B/C	21 to 30					
LEY□40□	A	24 to 30	50 to 65%				
	B/C	21 to 30					

There is a limit to the pushing force in relation to the pushing speed. If the product is operated outside of the range (low pushing force), the completion signal [INP] may be output before the pushing operation has been completed (during the moving operation). If operating with the pushing speed below the min. speed, please check for operating problems before using the product.

## Handling

### Caution

<Set Values for Vertical Upward Transfer Pushing Operations>  
For vertical loads (upward), set the pushing force to the max. value shown below and operate at the work load or less.

Model	LEY16□			LEY25□			LEY32□			LEY40□		
Lead	A	B	C	A	B	C	A	B	C	A	B	C
Work load [kg]	1	1.5	3	2.5	5	10	4.5	9	18	7	14	28
Pushing force	85%			65%			85%			65%		

Model	LEY16□A			LEY25□A		
Lead	A	B	C	A	B	C
Work load [kg]	1	1.5	3	1.2	2.5	5
Pushing force	95%			95%		

Model	LEYG16□			LEYG25□			LEYG32□			LEYG40□		
Lead	A	B	C	A	B	C	A	B	C	A	B	C
Work load [kg]	0.5	1	2.5	1.5	4	9	2.5	7	16	5	12	26
Pushing force	85%			65%			85%			65%		

Model	LEYG16□A			LEYG25□A		
Lead	A	B	C	A	B	C
Work load [kg]	0.5	1	2.5	0.5	1.5	4
Pushing force	95%			95%		

- To conduct a pushing operation, be sure to set the product to [Pushing operation].**  
Also, refrain from bumping the workpiece during a positioning operation or when in the range of the positioning operation. Failure to do so may result in a malfunction.
- Use the product within the specified pushing speed range for the pushing operation.**  
Failure to do so may result in damage or malfunction.
- The moving force should be the initial value (LEY16□/25□/32□/40□: 100%, LEY16A□: 150%, and LEY25A□: 200%).**  
If the moving force is set below the initial value, it may cause the generation of an alarm.
- The actual speed of this actuator is affected by the load.**  
Check the model selection section of the catalog.
- Do not apply a load, impact, or resistance in addition to the transferred load during return to origin.**  
Additional force will cause the displacement of the origin position since it is based on the detected motor torque.
- For pushing operations, set the product to a position at least 2 mm away from a workpiece. (This position is referred to as the pushing start position.)**

The following alarms may be generated and operation may become unstable if setting is not done correctly.

- “Posn failed”**  
The product cannot reach the pushing start position due to variations in the target positions.
- “Pushing ALM”**  
The product is pushed back from the pushing start position after starting to push.

# LEY/LEYG Series Specific Product Precautions 2

Be sure to read this before handling the products. Refer to the back cover for safety instructions. For electric actuator and auto switch precautions, refer to the “Handling Precautions for SMC Products” and the “Operation Manual” on the SMC website: <https://www.smcworld.com>

## Handling

### ⚠ Caution

8. Do not scratch or dent the sliding parts of the piston rod by bumping them or placing objects on them.  
The piston rod and guide rod are manufactured to precise tolerances, so even a slight deformation may result in a malfunction.
9. When an external guide is used, connect it in such a way that no impact or load is applied to it.  
Use a freely moving connector (such as a floating joint).
10. Do not operate by fixing the piston rod and moving the actuator body.  
Excessive load will be applied to the piston rod, resulting in damage to the actuator and a reduced service life of the product.
11. When an actuator is operated with one end fixed and the other free (ends tapped or flange), a bending moment may act on the actuator due to vibration generated at the stroke end, which can damage the actuator. In such cases, install a mounting bracket to suppress the vibration of the actuator body or reduce the speed so that the actuator does not vibrate at the stroke end.  
Also, use a mounting bracket when moving the actuator body or when a long stroke actuator is mounted horizontally and fixed at one end.
12. Avoid using the electric actuator in such a way that rotational torque would be applied to the piston rod.  
Failure to do so may result in the deformation of the non-rotating guide, abnormal auto switch responses, play in the internal guide, or an increase in the sliding resistance.  
Refer to the table below for the approximate values of the allowable range of rotational torque.

Allowable rotational torque [N·m] or less	LEY16□□	LEY25□□	LEY32/40□□	LEY63	LEY100
	0.8	1.1	1.4	2.8	4.6

When screwing a bracket or nut into the piston rod end, hold the flats of the end of the “socket” with a wrench (the piston rod should be fully retracted). Do not apply tightening torque to the non-rotating mechanism.

13. When rotational torque is applied to the end of the plate, use it within the allowable range. [LEYG series]  
Failure to do so may result in the deformation of the guide rod and bushing, play in the guide, or an increase in the sliding resistance.

14. For pushing operations, use the product within the duty ratio range below.

The duty ratio is a ratio of the operation time in one cycle.

### • Step motor (Servo/24 VDC)

#### LEY16□

Pushing force [%]	Ambient temperature: 25°C or less		Ambient temperature: 40°C	
	Duty ratio [%]	Continuous pushing time [min]	Duty ratio [%]	Continuous pushing time [min]
40 or less	100	—	100	—
50			70	12 or less
70			20	1.3 or less
85			15	0.8 or less

#### LEY25□/40□

Pushing force [%]	Ambient temperature: 25°C or less		Ambient temperature: 40°C	
	Duty ratio [%]	Continuous pushing time [min]	Duty ratio [%]	Continuous pushing time [min]
65 or less	100	—	100	—

#### LEY32□

Pushing force [%]	Ambient temperature: 25°C or less		Ambient temperature: 40°C	
	Duty ratio [%]	Continuous pushing time [min]	Duty ratio [%]	Continuous pushing time [min]
65 or less	100	—	100	—
85			50	15 or less

### • Servo motor (24 VDC)

#### LEY16A□

Pushing force [%]	Ambient temperature: 25°C or less		Ambient temperature: 40°C	
	Duty ratio [%]	Continuous pushing time [min]	Duty ratio [%]	Continuous pushing time [min]
95 or less	100	—	100	—

#### LEY25A□

Pushing force [%]	Ambient temperature: 25°C or less		Ambient temperature: 40°C	
	Duty ratio [%]	Continuous pushing time [min]	Duty ratio [%]	Continuous pushing time [min]
95 or less	100	—	100	—

15. When mounting the product, secure a space of 40 mm or more to allow for bends in the cable.

\* Failure to do so may result in cable breakage.

16. When mounting a bolt, workpiece, or attachment, hold the flats of the piston rod end with a wrench so that the piston rod does not rotate. The bolt should be tightened within the specified torque range.

Failure to do so may result in abnormal auto switch responses, play in the internal guide, or an increase in the sliding resistance.

# LEY/LEYG Series Specific Product Precautions 3

Be sure to read this before handling the products. Refer to the back cover for safety instructions. For electric actuator and auto switch precautions, refer to the “Handling Precautions for SMC Products” and the “Operation Manual” on the SMC website: <https://www.smcworld.com>

## Handling

### Caution

#### 17. When mounting the product and/or a workpiece, tighten the mounting screws within the specified torque range.

Tightening the screws with a higher torque than recommended may result in a malfunction, while tightening with a lower torque can result in the displacement of the mounting position or, in extreme conditions, the actuator could become detached from its mounting position.

#### <LEY series>

##### Workpiece fixed/Rod end female thread

Model	Screw size	Max. tightening torque [N·m]	Max. screw-in depth [mm]	End socket width across flats [mm]

LEYG16 <sup>M</sup>	M5 x 0.8	3.0	8
LEYG25 <sup>M</sup>	M6 x 1.0	5.2	11
LEYG32 <sup>M</sup> / 40 <sup>L</sup>	M6 x 1.0	5.2	12

##### Body fixed/Top mounting

Model	Screw size	Max. tightening torque [N·m]	Length: L [mm]
LEYG16 <sup>M</sup>	M4 x 0.7	1.5	32
LEYG25 <sup>M</sup>	M5 x 0.8	3.0	40.3
LEYG32 <sup>M</sup> / 40 <sup>L</sup>	M5 x 0.8	3.0	50.3

##### Body fixed/Bottom mounting

Model	Screw size	Max. tightening torque [N·m]	Max. screw-in depth [mm]
LEYG16 <sup>M</sup>	M5 x 0.8	3.0	10
LEYG25 <sup>M</sup>	M6 x 1.0	5.2	12
LEYG32 <sup>M</sup> / 40 <sup>L</sup>	M6 x 1.0	5.2	12

##### Body fixed/Head side tapped type

Model	Screw size	Max. tightening torque [N·m]	Max. screw-in depth [mm]
LEYG16 <sup>M</sup>	M4 x 0.7	1.5	7
LEYG25 <sup>M</sup>	M5 x 0.8	3.0	8
LEYG32 <sup>M</sup> / 40 <sup>L</sup>	M6 x 1.0	5.2	10

#### 18. Keep the flatness of the mounting surface within the following ranges when mounting the actuator body and workpiece.

Mounting the product on an uneven workpiece or base may result in an increase in the sliding resistance.

Model	Mounting position	Flatness
LEY□	Body/Body bottom	0.1 mm or less
LEYG□	Top mounting/Bottom mounting	0.02 mm or less
	Workpiece/Plate mounting	0.02 mm or less

#### 19. When using auto switches with the guide rod type LEYG series, the following limits apply. Please consider the following before selecting the product.

- Auto switches must be inserted from the front side with the rod (plate) sticking out.
- Auto switches with perpendicular electrical entries cannot be used.
- Auto switches cannot be fixed with the parts hidden behind the guide attachment (the side of the rod that sticks out).
- Please contact SMC when using auto switches on the side of the rod that sticks out.

# LEY/LEYG Series Specific Product Precautions 4

Be sure to read this before handling the products. Refer to the back cover for safety instructions. For electric actuator and auto switch precautions, refer to the “Handling Precautions for SMC Products” and the “Operation Manual” on the SMC website: <https://www.smcworld.com>

## Handling

### ⚠ Caution

- When using the product with the IP65 or equivalent specifications, be sure to mount the tubing to the vent hole, and then place the end of the tubing in an area where it is not exposed to dust or water. When the actuator is used without mounting the fitting and tubing to the vent hole, water or dust may enter the inside of the actuator, resulting in a malfunction.
- When fluctuations in the load are caused during operation, malfunction, noise, or alarm generation may occur. (In the case of the AC servo motor)

The gain tuning may not be suitable for fluctuating loads.

Adjust the gain properly by following the instructions in the driver manual.

## Enclosure

### • First Digit: Degree of protection against solid foreign objects

0	Not protected
1	Protected against solid foreign objects of 50 mmø and larger
2	Protected against solid foreign objects of 12 mmø and larger
3	Protected against solid foreign objects of 2.5 mmø and larger
4	Protected against solid foreign objects of 1.0 mmø and larger
5	Dust protected
6	Dust-tight

### • Second Digit: Degree of protection against water

0	Not protected	—
1	Protected against vertically falling water droplets	Dripproof type 1
2	Protected against vertically falling water droplets when enclosure is tilted up to 15°	Dripproof type 2
3	Protected against rainfall when enclosure is tilted up to 60°	Rainproof type
4	Protected against splashing water	Splashproof type
5	Protected against water jets	Water-jet-proof type
6	Protected against powerful water jets	Powerful water-jet-proof type
7	Protected against the effects of temporary immersion in water	Immersible type
8	Protected against the effects of continuous immersion in water	Submersible type

### Example) Degrees of protection

Degrees of protection			Details
IP65	Solid foreign objects	Dust-tight	Dust particles are prevented from entering the device.
	Entry of water	Water-jet-proof*1	The direct application of water jets to the device from any direction will not cause any damage.
IP67	Solid foreign objects	Dust-tight	Dust particles are prevented from entering the device.
	Entry of water	Immersible*1	The amount of water that enters the device when the actuator (in the stopped state) is submersed in up to 1 m of water for up to 30 mins will not cause any damage.

\*1 Be sure to take appropriate protective measures if the product is to be used in an environment where it will be constantly exposed to water or fluids other than water splash.

In particular, the product cannot be used in environments where oils, such as cutting oil or cutting fluid, are present.

## Maintenance

### ⚠ Warning

- Ensure that the power supply is stopped and the workpiece is removed before starting maintenance work or replacing the product.

#### • Maintenance frequency

Perform maintenance according to the table below.

Frequency	Appearance check	Belt check
Inspection before daily operation	○	—
Inspection every 6 months/ 250 km/5 million cycles*1	○	○

\*1 Select whichever comes first.

#### • Items for visual appearance check

- Loose set screws, Abnormal amount of dirt, etc.
- Check for visible damage, Check of cable joint
- Vibration, Noise

#### • Items for belt check

Stop operation immediately and replace the belt when any of the following occur. In addition, ensure your operating environment and conditions satisfy the requirements specified for the product.

##### a. Tooth shape canvas is worn out

Canvas fiber becomes fuzzy, Rubber is coming off and the fiber has become whitish, Lines of fibers have become unclear

##### b. Peeling off or wearing of the side of the belt

Belt corner has become rounded and frayed threads stick out

##### c. Belt is partially cut

Belt is partially cut, Foreign matter caught in the teeth of other parts is causing damage

##### d. A vertical line on belt teeth is visible

Damage which is made when the belt runs on the flange

##### e. Rubber back of the belt is softened and sticky

##### f. Cracks on the back of the belt are visible

# 25A- Series Precautions

Be sure to read this before handling products.

Be sure to read the “Handling Precautions for SMC Products” (M-E03-3) and the “Operation Manual” before use.

## Precautions

### ⚠ Caution

#### ■ Change of material

For the 25A- series, there is a restriction on the use of copper and zinc as main components in the metal materials used. Keep in mind that the aluminum alloy, aluminum die cast, and some of the stainless steel materials contain traces of copper (Cu) and/or zinc (Zn) as an additive element.

However, copper is used in some parts—the coils of solenoid valves, the circuit boards, connector pins, and lead wires of electrical equipment and auto switches, and the motors, cables, and drivers of electric actuators—whose materials cannot be easily changed to alternative materials.

In addition, some magnets (including the surface treatment) contain copper (Cu) and/or zinc (Zn). However, due to their magnetic characteristics, it is impossible to use alternative materials.

#### ■ Chemical environment

Refrain from using the products in such environments as exposed to chemicals. Otherwise, resin parts may deteriorate.

If you want SMC to test the products for the effects of chemicals attached to them, send the products back to SMC after thoroughly cleaning them.

Please contact your local sales representative for further details.

# Controller (Step Data Input Type)

## JXC51/61 Series

\* For details, refer to page 307 and onward.

### How to Order

JXC **5** 1 **7** **1** - **□**

①            ②    ③            ④

#### ① Parallel I/O type

5	NPN
6	PNP

#### ② Mounting

7	Screw mounting
8*1	DIN rail

\*1 The DIN rail is not included.  
It must be ordered separately.

#### ③ I/O cable length [m]

Nil	None
1	1.5
3	3
5	5

#### ④ Actuator part number

Without cable specifications and actuator options  
Example: Enter "LEY16B-100" for the  
LEY16B-100B-R1□□.

**BC** Blank controller\*1

\*1 Requires dedicated software (JXC-BCW)

### The controller is sold as single unit after the compatible actuator is set.

Confirm that the combination of the controller and actuator is correct.

<Check the following before use.>

- ① Check the actuator label for the model number. This number should match that of the controller.
- ② Check that the Parallel I/O configuration matches (NPN or PNP).

\* Refer to the operation manual for using the products. Please download it via our website:  
<https://www.smcworld.com>

### Precautions for blank controllers (JXC□1□□-BC)

A blank controller is a controller to which the customer can write the data of the actuator it is to be combined and used with. Use the dedicated software (JXC-BCW) for data writing.

- Please download the dedicated software (JXC-BCW) via our website.
- Order the communication cable for controller setting (JXC-W2A-C) separately to use this software.

**SMC website**  
<https://www.smcworld.com>

## Specifications

Model	JXC51 JXC61
Compatible motor	Step motor (Servo/24 VDC)
Power supply	Power voltage: 24 VDC ±10%
Current consumption (Controller)	100 mA or less
Compatible encoder	Incremental
Parallel input	11 inputs (Photo-coupler isolation)
Parallel output	13 outputs (Photo-coupler isolation)
Serial communication	RS485 (Only for the LEC-T1 and JXC-W2)
Memory	EEPROM
LED indicator	PWR, ALM
Cable length [m]	Actuator cable: 20 or less
Cooling system	Natural air cooling
Operating temperature range [°C]	0 to 55°C (No freezing)
Operating humidity range [%RH]	90 or less (No condensation)
Insulation resistance [MΩ]	Between all external terminals and the case: 50 (500 VDC)
Weight [g]	150 (Screw mounting), 170 (DIN rail mounting)

## How to Mount

### a) Screw mounting (JXC□17□-□) (Installation with two M4 screws)

### b) DIN rail mounting (JXC□18□-□) (Installation with the DIN rail)

Hook the controller on the DIN rail and press the lever of section **A** in the arrow direction to lock it.

\* When size 25 or more of the LE series are used, the space between the controllers should be 10 mm or more.

### DIN rail AXT100-DR-□

\* For □, enter a number from the No. line in the table below.  
Refer to the dimension drawings on page 213 for the mounting dimensions.

#### L Dimensions [mm]

No.	1	2	3	4	5	6	7	8	9	10	11	12	13	14	15	16	17	18	19	20

## Wiring Example 1

### Parallel I/O Connector

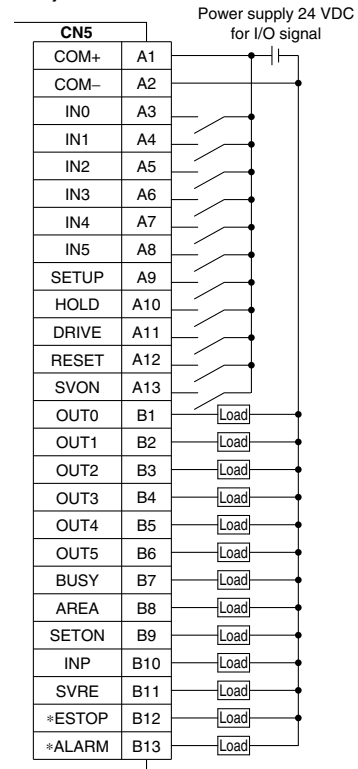

- \* When you connect a PLC to the parallel I/O connector, use the I/O cable (LEC-CN5-□).
- \* The wiring changes depending on the type of parallel I/O (NPN or PNP).

### Wiring diagram

#### JXC51□□-□ (NPN)

#### JXC61□□-□ (PNP)

### Input Signal

Name	Details
COM+	Connects the power supply 24 V for input/output signal
COM-	Connects the power supply 0 V for input/output signal
IN0 to IN5	Step data specified bit no. (Input is instructed by combining IN0 to 5.)
SETUP	Instruction to return to origin
HOLD	Temporarily stops operation
DRIVE	Instruction to drive
RESET	Resets alarm and interrupts operation
SVON	Servo ON instruction

### Output Signal

Name	Details
OUT0 to OUT5	Outputs the step data no. during operation
BUSY	Outputs when the actuator is moving
AREA	Outputs within the step data area output setting range
SETON	Outputs when returning to origin
INP	Outputs when target position or target force is reached (Turns on when the positioning or pushing is completed.)
SVRE	Outputs when servo is on
*ESTOP* <sup>1</sup>	OFF when EMG stop is instructed
*ALARM* <sup>1</sup>	OFF when alarm is generated

\*1 Signal of negative-logic circuit (N.C.)

Specific Product Precautions

## Step Data Setting

### 1. Step data setting for positioning

In this setting, the actuator moves toward and stops at the target position.

The following diagram shows the setting items and operation. The setting items and set values for this operation are stated below.

◎ : Need to be set.  
○ : Need to be adjusted as required.  
— : Setting is not required.

#### Step Data (Positioning)

Necessity	Item	Details
◎	Movement MOD	When the absolute position is required, set Absolute. When the relative position is required, set Relative.
◎	Speed	Transfer speed to the target position
◎	Position	Target position
○	Acceleration	Parameter which defines how rapidly the actuator reaches the speed set. The higher the set value, the faster it reaches the speed set.
○	Deceleration	Parameter which defines how rapidly the actuator comes to stop. The higher the set value, the quicker it stops.
◎	Pushing force	Set 0. (If values 1 to 100 are set, the operation will be changed to the pushing operation.)
—	Trigger LV	Setting is not required.
—	Pushing speed	Setting is not required.
○	Moving force	Max. torque during the positioning operation (No specific change is required.)
○	Area 1, Area 2	Condition that turns on the AREA output signal.
○	In position	Condition that turns on the INP output signal. When the actuator enters the range of [in position], the INP output signal turns on. (It is unnecessary to change this from the initial value.) When it is necessary to output the arrival signal before the operation is completed, make the value larger.

### 2. Step data setting for pushing

The actuator moves toward the pushing start position, and when it reaches that position, it starts pushing with the set force or less.

The following diagram shows the setting items and operation. The setting items and set values for this operation are stated below.

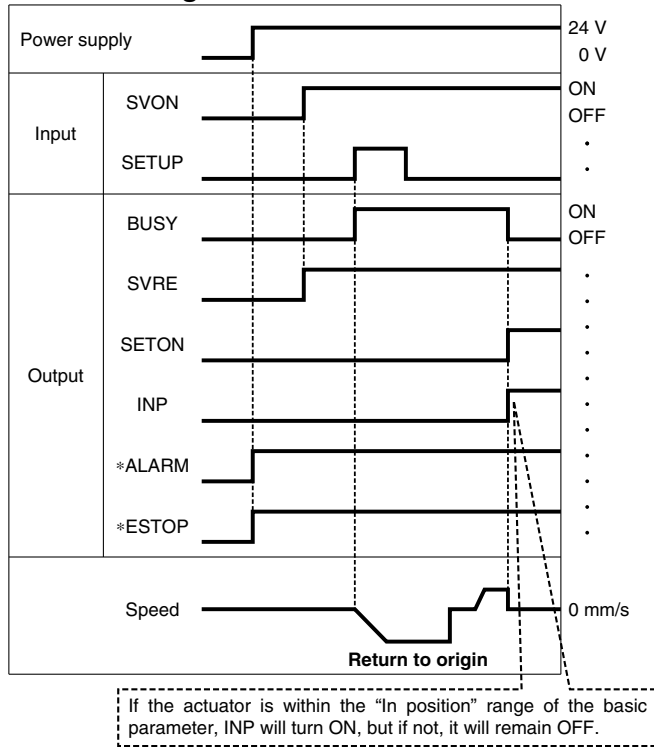

◎ : Need to be set.  
○ : Need to be adjusted as required.

#### Step Data (Pushing)

Necessity	Item	Details
◎	Movement MOD	When the absolute position is required, set Absolute. When the relative position is required, set Relative.
◎	Speed	Transfer speed to the pushing start position
◎	Position	Pushing start position
○	Acceleration	Parameter which defines how rapidly the actuator reaches the speed set. The higher the set value, the faster it reaches the speed set.
○	Deceleration	Parameter which defines how rapidly the actuator comes to stop. The higher the set value, the quicker it stops.
◎	Pushing force	Pushing force ratio is defined. The setting range differs depending on the electric actuator type. Refer to the operation manual for the electric actuator.
◎	Trigger LV	Condition that turns on the INP output signal. The INP output signal turns on when the generated force exceeds the value. Trigger level should be the pushing force or less.
○	Pushing speed	Pushing speed during pushing. When the speed is set fast, the electric actuator and workpieces might be damaged due to the impact when they hit the end, so this set value should be smaller. Refer to the operation manual for the electric actuator.
○	Moving force	Max. torque during the positioning operation (No specific change is required.)
○	Area 1, Area 2	Condition that turns on the AREA output signal.
◎	In position	Transfer distance during pushing. If the transferred distance exceeds the setting, it stops even if it is not pushing. If the transfer distance is exceeded, the INP output signal will not turn on.

## Signal Timing

### Return to Origin

\* \*ALARM and \*ESTOP are expressed as negative-logic circuits.

### Positioning Operation

\* "OUT" is output when "DRIVE" is changed from ON to OFF. Refer to the operation manual for details on the controller for the LEM series. (When power supply is applied, "DRIVE" or "RESET" is turned ON or \*ESTOP is turned OFF, all of the "OUT" outputs are OFF.)

### HOLD

\* When the actuator is within the "In position" range in the pushing operation, it does not stop even if HOLD signal is input.

### Pushing Operation

### Reset

\* \*ALARM is expressed as a negative-logic circuit.

## LECA6 Series

LECA6 Series

\* For details, refer to page 307 and onward.

### How to Order

#### ⚠ Caution

##### [CE-compliant products]

- EMC compliance was tested by combining the electric actuator LE series and the controller LEC series. The EMC depends on the configuration of the customer's control panel and the relationship with other electrical equipment and wiring. Therefore, compliance with the EMC directive cannot be certified for SMC components incorporated into the customer's equipment under actual operating conditions. As a result, it is necessary for the customer to verify compliance with the EMC directive for the machinery and equipment as a whole.
- For the LECA6 series (servo motor controller), EMC compliance was tested by installing a noise filter set (LEC-NFA). Refer to page 224 for the noise filter set. Refer to the LECA Operation Manual for installation.

##### [UL-compliant products]

When compliance with UL is required, the electric actuator and controller should be used with a UL1310 Class 2 power supply.

\* When controller equipped type is selected when ordering the LE series, you do not need to order this controller.

### The controller is sold as single unit after the compatible actuator is set.

Confirm that the combination of the controller and actuator is correct.

#### <Check the following before use.>

- Check the actuator label for the model number. This number should match that of the controller.
- Check that the Parallel I/O configuration matches (NPN or PNP).

### Precautions for blank controllers (LEC□6□□-BC)

A blank controller is a controller to which the customer can write the data of the actuator it is to be combined and used with. Use the dedicated software (LEC-BCW) for data writing.

- Please download the dedicated software (LEC-BCW) via our website.
- Order the communication cable for controller setting (LEC-W2A-C) separately to use this software.

SMC website:  
<https://www.smcworld.com>

\* Refer to the operation manual for using the products. Please download it via our website:  
<https://www.smcworld.com>

## Specifications

### Basic Specifications

Item	LECA6
Compatible motor	Servo motor (24 VDC)
Power supply*1	Power voltage: 24 VDC ±10%*2 [Including motor drive power, control power, stop, lock release]
Parallel input	11 inputs (Photo-coupler isolation)
Parallel output	13 outputs (Photo-coupler isolation)
Compatible encoder	Incremental
Serial communication	RS485 (Modbus protocol compliant)
Memory	EEPROM
LED indicator	LED (Green/Red) one of each
Lock control	Forced-lock release terminal*3
Cable length [m]	I/O cable: 5 or less, Actuator cable: 20 or less
Cooling system	Natural air cooling
Operating temperature range [°C]	0 to 40 (No freezing)
Operating humidity range [%RH]	90 or less (No condensation)
Storage temperature range [°C]	-10 to 60 (No freezing)
Storage humidity range [%RH]	90 or less (No condensation)
Insulation resistance [MΩ]	Between the housing and SG terminal: 50 (500 VDC)
Weight [g]	150 (Screw mounting), 170 (DIN rail mounting)

\*1 Do not use the power supply of "inrush current prevention type" for the controller power supply. When compliance with UL is required, the electric actuator and controller should be used with a UL1310 Class 2 power supply.

\*2 The power consumption changes depending on the actuator model. Refer to the specifications of actuator for more details.

\*3 Applicable to non-magnetizing locks

## Wiring Example 1

**Power Supply Connector: CN1** \* The power supply plug is an accessory.  
 <Applicable cable size> AWG20 (0.5 mm<sup>2</sup>), cover diameter 2.0 mm or less

### CN1 Power Supply Connector Terminal for LECA6 (PHOENIX CONTACT FK-MC0.5/7-ST-2.5)

Terminal name	Function	Details
0V	Common supply (-)	The M24V terminal, C24V terminal, EMG terminal, and BK RLS terminal are common (-).
M24V	Motor power supply (+)	Motor power supply (+) supplied to the controller
C24V	Control power supply (+)	Control power supply (+) supplied to the controller
EMG	Stop (+)	Input (+) for releasing the stop
BK RLS	Lock release (+)	Input (+) for releasing the lock
RG+	Regenerative output 1	Regenerative output terminals for external connection
RG-	Regenerative output 2	(Not necessary to connect them in the combination with the LE series standard specifications.)

### Power supply plug for LECA6: LEC-D-1-2

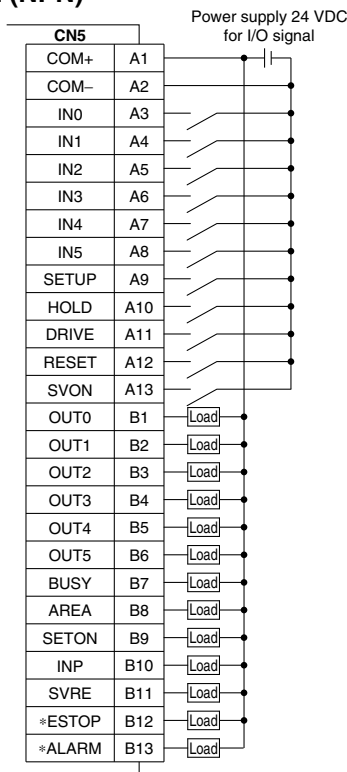

## Wiring Example 2

**Parallel I/O Connector: CN5** \* When you connect a PLC to the CN5 parallel I/O connector, use the I/O cable (LEC-CN5-□).  
 \* The wiring changes depending on the type of parallel I/O (NPN or PNP).

### Wiring diagram

#### LECA6N□□□□ (NPN)

#### LECA6P□□□□ (PNP)

### Input Signal

Name	Details
COM+	Connects the power supply 24 V for input/output signal
COM-	Connects the power supply 0 V for input/output signal
IN0 to IN5	Step data specified bit no. (Input is instructed by combining IN0 to 5.)
SETUP	Instruction to return to origin
HOLD	Temporarily stops operation
DRIVE	Instruction to drive
RESET	Resets alarm and interrupts operation
SVON	Servo ON instruction

### Output Signal

Name	Details
OUT0 to OUT5	Outputs the step data no. during operation
BUSY	Outputs when the actuator is moving
AREA	Outputs within the step data area output setting range
SETON	Outputs when returning to origin
INP	Outputs when target position or target force is reached (Turns on when the positioning or pushing is completed.)
SVRE	Outputs when servo is ON
*ESTOP* <sup>1</sup>	OFF when EMG stop is instructed
*ALARM* <sup>1</sup>	OFF when alarm is generated

\*<sup>1</sup> Negative-logic (N.C.) circuit signal

## Step Data Setting

### 1. Step data setting for positioning

In this setting, the actuator moves toward and stops at the target position.

The following diagram shows the setting items and operation. The setting items and set values for this operation are stated below.

⊙ : Need to be set.  
○ : Need to be adjusted as required.  
— : Setting is not required.

#### Step Data (Positioning)

Necessity	Item	Details
⊙	Movement MOD	When the absolute position is required, set Absolute. When the relative position is required, set Relative.
⊙	Speed	Transfer speed to the target position
⊙	Position	Target position
○	Acceleration	Parameter which defines how rapidly the actuator reaches the speed set. The higher the set value, the faster it reaches the speed set.
○	Deceleration	Parameter which defines how rapidly the actuator comes to stop. The higher the set value, the quicker it stops.
⊙	Pushing force	Set 0. (If values 1 to 100 are set, the operation will be changed to the pushing operation.)
—	Trigger LV	Setting is not required.
—	Pushing speed	Setting is not required.
○	Moving force	Max. torque during the positioning operation (No specific change is required.)
○	Area 1, Area 2	Condition that turns on the AREA output signal.
○	In position	Condition that turns on the INP output signal. When the actuator enters the range of [in position], the INP output signal turns on. (It is unnecessary to change this from the initial value.) When it is necessary to output the arrival signal before the operation is completed, make the value larger.

### 2. Step data setting for pushing

The actuator moves toward the pushing start position, and when it reaches that position, it starts pushing with the set force or less.

The following diagram shows the setting items and operation. The setting items and set values for this operation are stated below.

⊙ : Need to be set.  
○ : Need to be adjusted as required.

#### Step Data (Pushing)

Necessity	Item	Details
⊙	Movement MOD	When the absolute position is required, set Absolute. When the relative position is required, set Relative.
⊙	Speed	Transfer speed to the pushing start position
⊙	Position	Pushing start position
○	Acceleration	Parameter which defines how rapidly the actuator reaches the speed set. The higher the set value, the faster it reaches the speed set.
○	Deceleration	Parameter which defines how rapidly the actuator comes to stop. The higher the set value, the quicker it stops.
⊙	Pushing force	Pushing force ratio is defined. The setting range differs depending on the electric actuator type. Refer to the operation manual for the electric actuator.
⊙	Trigger LV	Condition that turns on the INP output signal. The INP output signal turns on when the generated force exceeds the value. Trigger level should be the pushing force or less.
○	Pushing speed	Pushing speed during pushing. When the speed is set fast, the electric actuator and workpieces might be damaged due to the impact when they hit the end, so this set value should be smaller. Refer to the operation manual for the electric actuator.
○	Moving force	Max. torque during the positioning operation (No specific change is required.)
○	Area 1, Area 2	Condition that turns on the AREA output signal.
⊙	In position	Transfer distance during pushing. If the transferred distance exceeds the setting, it stops even if it is not pushing. If the transfer distance is exceeded, the INP output signal will not turn on.

## Signal Timing

### Return to Origin

\* \*ALARM and \*ESTOP are expressed as negative-logic circuits.

### Positioning Operation

\* "OUT" is output when "DRIVE" is changed from ON to OFF.  
Refer to the operation manual for details on the controller for the LEM series.  
(When power supply is applied, "DRIVE" or "RESET" is turned ON or \*ESTOP is turned OFF, all of the "OUT" outputs are OFF.)

### HOLD

\* When the actuator is within the "In position" range in the pushing operation, it does not stop even if HOLD signal is input.

### Pushing Operation

### Reset

\* \*ALARM is expressed as a negative-logic circuit.

## LEC-G Series

### How to Order

#### ⚠ Caution

**[CE-compliant products]**  
EMC compliance was tested by combining the electric actuator LE series and the controller LEC series. The EMC depends on the configuration of the customer's control panel and the relationship with other electrical equipment and wiring. Therefore, compliance with the EMC directive cannot be certified for SMC components incorporated into the customer's equipment under actual operating conditions. As a result, it is necessary for the customer to verify compliance with the EMC directive for the machinery and equipment as a whole.

**[UL-compliant products]**  
When compliance with UL is required, the electric actuator and controller should be used with a UL1310 Class 2 power supply.

### Gateway unit **LEC-G MJ2**

#### Applicable Fieldbus protocols

<b>MJ2</b>	CC-Link Ver. 2.0
<b>DN1</b>	DeviceNet™
<b>PR1</b>	PROFIBUS DP
<b>EN1</b>	EtherNet/IP™

#### Mounting

<b>Nil</b>	Screw mounting
<b>D*1</b>	DIN rail

\*1 The DIN rail is not included. It must be ordered separately.

### Cable

\*1 Please note that versions are subject to change.

\*2 Each file can be downloaded from the SMC website.

\*3 When using a teaching box (LEC-T1-□), set the communication speed to 115.2 kbps.

\*4 A communication response time for 1 controller is approximately 30 ms.

Refer to the "Communication Response Time Guideline" for response times when several controllers are connected.

\*5 For step data input, up to 12 controllers connectable.

\*6 When compliance with UL is required, the electric actuator and controller should be used with a UL1310 Class 2 power supply.

## Communication Response Time Guideline

Response time between gateway unit and controllers depends on the number of controllers connected to the gateway unit. For response time, refer to the graph below.

\* This graph shows delay times between gateway unit and controllers. Fieldbus network delay time is not included.

**Parallel I/O type**

<b>N</b>	NPN
<b>P</b>	PNP

**Option**

<b>Nil</b>	Screw mounting
<b>D*1</b>	DIN rail mounting

\*1 The DIN rail is not included. It must be ordered separately.

**I/O cable length [m]**

<b>Nil</b>	Without cable
<b>1</b>	1.5
<b>3</b>	3
<b>5</b>	5

**Actuator part number**

(Without cable specifications and actuator options)  
Example: Enter "LEY16B-100" for the LEY16B-100B-R16N1.

\* When controller equipped type is selected when ordering the LE series, you do not need to order this controller.

**⚠ Caution**

**[CE-compliant products]**  
EMC compliance was tested by combining the electric actuator LE series and the controller LEC series. The EMC depends on the configuration of the customer's control panel and the relationship with other electrical equipment and wiring. Therefore, compliance with the EMC directive cannot be certified for SMC components incorporated into the customer's equipment under actual operating conditions. As a result, it is necessary for the customer to verify compliance with the EMC directive for the machinery and equipment as a whole.

**[UL-compliant products]**  
When compliance with UL is required, the electric actuator and controller should be used with a UL1310 Class 2 power supply.

**The controller is sold as single unit after the compatible actuator is set.**

Confirm that the combination of the controller and actuator is correct.

\* Refer to the operation manual for using the products. Please download it via our website: <https://www.smcworld.com>

## Specifications

### Basic Specifications

Item	LECP1
<b>Compatible motor</b>	Step motor (Servo/24 VDC)
<b>Power supply*1</b>	Power supply voltage: 24 VDC ±10%*2 [Including the motor drive power, control power supply, stop, lock release]
<b>Parallel input</b>	6 inputs (Photo-coupler isolation)
<b>Parallel output</b>	6 outputs (Photo-coupler isolation)
<b>Stop points</b>	14 points (Position number 1 to 14(E))
<b>Compatible encoder</b>	Incremental
<b>Memory</b>	EEPROM
<b>LED indicator</b>	LED (Green/Red) one of each
<b>7-segment LED display*3</b>	1 digit, 7-segment display (Red) Figures are expressed in hexadecimal ("10" to "15" in decimal number are expressed as "A" to "F")
<b>Lock control</b>	Forced-lock release terminal*4
<b>Cable length [m]</b>	I/O cable: 5 or less, Actuator cable: 20 or less
<b>Cooling system</b>	Natural air cooling
<b>Operating temperature range [°C]</b>	0 to 40 (No freezing)
<b>Operating humidity range [%RH]</b>	90 or less (No condensation)
<b>Storage temperature range [°C]</b>	-10 to 60 (No freezing)
<b>Storage humidity range [%RH]</b>	90 or less (No condensation)
<b>Insulation resistance [M.Ω]</b>	Between the housing and SG terminal: 50 (500 VDC)
<b>Weight [g]</b>	130 (Screw mounting), 150 (DIN rail mounting)

\*1 Do not use the power supply of "inrush current prevention type" for the controller input power supply. When compliance with UL is required, the electric actuator and controller should be used with a UL1310 Class 2 power supply.  
\*2 The power consumption changes depending on the actuator model. Refer to the each actuator's operation manual, etc., for details.  
\*3 "10" to "15" in decimal number are displayed as follows in the 7-segment LED.

Decimal display      10      11      12      13      14      15  
Hexadecimal display      A      b      c      d      E      F

\*4 Applicable to non-magnetizing locks

## Controller Details

No.	Display	Description	Details
①	<b>PWR</b>	Power supply LED	Power supply ON/Servo ON : Green turns on Power supply ON/Servo OFF : Green flashes
②	<b>ALM</b>	Alarm LED	With alarm : Red turns on Parameter setting : Red flashes
③	—	Cover	Change and protection of the mode switch (Close the cover after changing switch)
④	—	FG	Frame ground (Tighten the screw with the washer when mounting the controller. Connect the ground wire.)
⑤	—	Mode switch	Switch the mode between manual and auto.
⑥	—	7-segment LED	Stop position, the value set by ⑧ and alarm information are displayed.
⑦	<b>SET</b>	Set button	Decide the settings or drive operation in Manual mode.
⑧	—	Position selecting switch	Assign the position to drive (1 to 14), and the origin position (15).
⑨	<b>MANUAL</b>	Manual forward button	Perform forward jog and inching.
⑩		Manual reverse button	Perform reverse jog and inching.
⑪	<b>SPEED</b>	Forward speed switch	16 forward speeds are available.
⑫		Reverse speed switch	16 reverse speeds are available.
⑬	<b>ACCEL</b>	Forward acceleration switch	16 forward acceleration steps are available.
⑭		Reverse acceleration switch	16 reverse acceleration steps are available.
⑮	<b>CN1</b>	Power supply connector	Connect the power supply cable.
⑯	<b>CN2</b>	Motor connector	Connect the motor connector.
⑰	<b>CN3</b>	Encoder connector	Connect the encoder connector.
⑱	<b>CN4</b>	I/O connector	Connect I/O cable.

## How to Mount

Controller mounting shown below.

### 1. Mounting screw (LECP1□□-□)

(Installation with two M4 screws)

### 2. Grounding

Tighten the screw with the washer when mounting the ground wire as shown below.

\* When size 25 or more of the LE series are used, the space between the controllers should be 10 mm or more.

### ⚠ Caution

- M4 screws, cable with crimping terminal and tooth lock washer are not included. Be sure to carry out grounding earth in order to ensure the noise tolerance.
- Use a watchmaker's screwdriver of the size shown below when changing position switch ⑧ and the set value of the speed/acceleration switch ⑪ to ⑭.

#### Size

End width **L**: 2.0 to 2.4 [mm]  
End thickness **W**: 0.5 to 0.6 [mm]

Magnified view of the end of the screwdriver

## LECPA Series

\* For details, refer to page 307 and onward.

### How to Order

#### ⚠ Caution

##### [CE-compliant products]

① EMC compliance was tested by combining the electric actuator LE series and the LECPA series. The EMC depends on the configuration of the customer's control panel and the relationship with other electrical equipment and wiring. Therefore, compliance with the EMC directive cannot be certified for SMC components incorporated into the customer's equipment under actual operating conditions. As a result, it is necessary for the customer to verify compliance with the EMC directive for the machinery and equipment as a whole.

② For the LECPA series (step motor driver), EMC compliance was tested by installing a noise filter set (LEC-NFA).

Refer to page 240 for the noise filter set. Refer to the LECPA Operation Manual for installation.

##### [UL-compliant products]

When compliance with UL is required, the electric actuator and driver should be used with a UL1310 Class 2 power supply.

## LECP AN 1 □ - LEY16B-100

#### Driver type

AN	Pulse input type (NPN)
AP	Pulse input type (PNP)

#### I/O cable length [m]

Nil	None
1	1.5
3	3*1
5	5*1

\*1 Pulse input usable only with differential. Only 1.5 m cables usable with open collector.

#### Driver mounting

Nil	Screw mounting
D*1	DIN rail

\*1 The DIN rail is not included. It must be ordered separately.

#### Actuator part number

Without cable specifications and actuator options  
Example: Enter "LEY16B-100"  
for the LEY16B-100B-R16N1.

BC Blank controller\*1

\*1 Requires dedicated software (LEC-BCW)

- \* When controller equipped type is selected when ordering the LE series, you do not need to order this driver.
- \* When pulse signals are open collector, order the current limiting resistor (LEC-PA-R-□) separately.

### The driver is sold as single unit after the compatible actuator is set.

Confirm that the combination of the driver and actuator is correct.

#### <Check the following before use.>

① Check the actuator label for the model number. This number should match that of the driver.

② Check that the Parallel I/O configuration matches (NPN or PNP).

### Precautions for blank controllers (LECPA□□-BC)

A blank controller is a controller to which the customer can write the data of the actuator it is to be combined and used with. Use the dedicated software (LEC-BCW) for data writing.

- Please download the dedicated software (LEC-BCW) via our website.
- Order the communication cable for controller setting (LEC-W2A-C) separately to use this software.

SMC website:

<https://www.smcworld.com>

\* Refer to the operation manual for using the products. Please download it via our website: <https://www.smcworld.com>

## Specifications

Item	LECPA
Compatible motor	Step motor (Servo/24 VDC)
Power supply*1	Power voltage: 24 VDC ±10%*2 [Including motor drive power, control power, stop, lock release]
Parallel input	5 inputs (Except photo-coupler isolation, pulse input terminal, COM terminal)
Parallel output	9 outputs (Photo-coupler isolation)
Pulse signal input	Max. frequency: 60 kpps (Open collector), 200 kpps (Differential) Input method: 1 pulse mode (Pulse input in direction), 2 pulse mode (Pulse input in differing directions)
Compatible encoder	Incremental A/B phase (Encoder resolution: 800 pulse/rotation)
Serial communication	RS485 (Modbus protocol compliant)
Memory	EEPROM
LED indicator	LED (Green/Red) one of each
Lock control	Forced-lock release terminal*3
Cable length [m]	I/O cable: 1.5 or less (Open collector), 5 or less (Differential), Actuator cable: 20 or less
Cooling system	Natural air cooling
Operating temperature range [°C]	0 to 40 (No freezing)
Operating humidity range [%RH]	90 or less (No condensation)
Storage temperature range [°C]	-10 to 60 (No freezing)
Storage humidity range [%RH]	90 or less (No condensation)
Insulation resistance [MΩ]	Between the housing and SG terminal: 50 (500 VDC)
Weight [g]	120 (Screw mounting), 140 (DIN rail mounting)

\*1 Do not use the power supply of "inrush current prevention type" for the driver power supply. When compliance with UL is required, the electric actuator and driver should be used with a UL1310 Class 2 power supply.

\*2 The power consumption changes depending on the actuator model. Refer to the specifications of actuator for more details.

\*3 Applicable to non-magnetizing locks

## How to Mount

**a) Screw mounting (LECPA□□-□)**  
(Installation with two M4 screws)

**b) DIN rail mounting (LECPA□□D-□)**  
(Installation with the DIN rail)

Hook the driver on the DIN rail and press the lever of section A in the arrow direction to lock it.

\* The space between the drivers should be 10 mm or more.

## DIN rail AXT100-DR-□

\* For □, enter a number from the No. line in the table below.  
Refer to the dimension drawings on page 237 for the mounting dimensions.

### L Dimensions [mm]

No.	1	2	3	4	5	6	7	8	9	10	11	12	13	14	15	16	17	18	19	20

## Dimensions

### a) Screw mounting (LECPA□□-□)

### b) DIN rail mounting (LECPA□□D-□)

## Wiring Example 1

**Power Supply Connector: CN1** \* The power supply plug is an accessory.  
<Applicable cable size> AWG20 (0.5 mm<sup>2</sup>), cover diameter 2.0 mm or less

**CN1 Power Supply Connector Terminal for LECPA (PHOENIX CONTACT FK-MC0.5/5-ST-2.5)**

Terminal name	Function	Details
0V	Common supply (-)	The M24V terminal, C24V terminal, EMG terminal, and BK RLS terminal are common (-).
M24V	Motor power supply (+)	Motor power supply (+) supplied to the driver
C24V	Control power supply (+)	Control power supply (+) supplied to the driver
EMG	Stop (+)	Input (+) for releasing the stop
BK RLS	Lock release (+)	Input (+) for releasing the lock

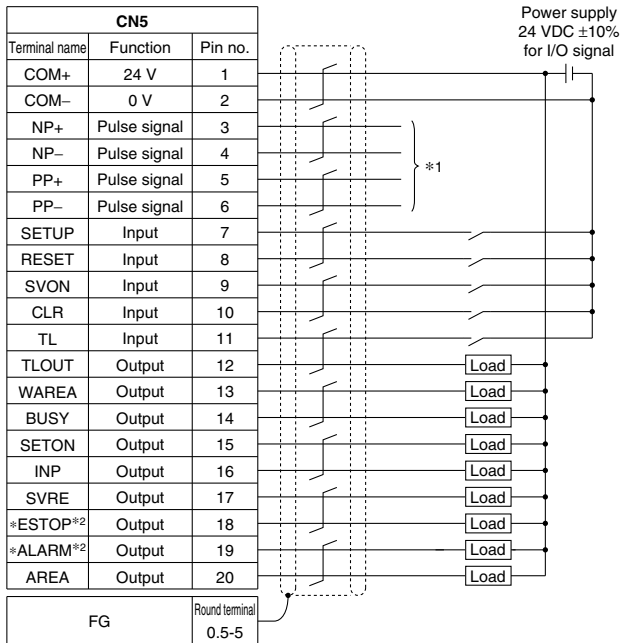

**Power supply plug for LECPA: LEC-D-1-1**

## Wiring Example 2

**Parallel I/O Connector: CN5** \* When you connect a PLC to the CN5 parallel I/O connector, use the I/O cable (LEC-CL5-□).  
 \* The wiring changes depending on the type of parallel I/O (NPN or PNP).

### LECPAN□□-□ (NPN)

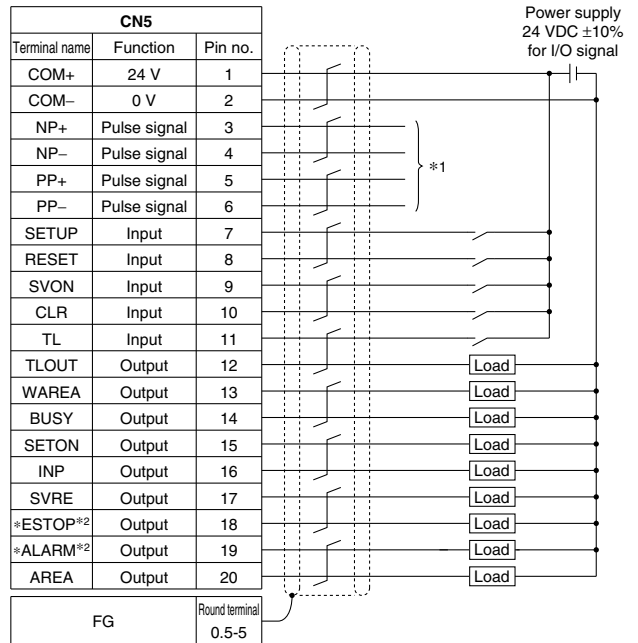

\*1 For pulse signal wiring method, refer to the "Pulse Signal Wiring Details."  
 \*2 Output when the power supply of the driver is ON. (N.C.)

### Input Signal

Name	Details
COM+	Connects the power supply 24 V for input/output signal
COM-	Connects the power supply 0 V for input/output signal
SETUP	Instruction to return to origin
RESET	Alarm reset
SVON	Servo ON instruction
CLR	Deviation reset
TL	Instruction to pushing operation

### LECPAP□□-□ (PNP)

### Output Signal

Name	Details
BUSY	Outputs when the actuator is moving
SETON	Outputs when returning to origin
INP	Outputs when target position is reached
SVRE	Outputs when servo is ON
*ESTOP* <sup>3</sup>	OFF when EMG stop is instructed
*ALARM* <sup>3</sup>	OFF when alarm is generated
AREA	Outputs within the area output setting range
WAREA	Outputs within W-AREA output setting range
TLOUT	Outputs during pushing operation

\*3 Negative-logic (N.C.) circuit signal

## Pulse Signal Wiring Details

### • Pulse signal output of positioning unit is differential output

### • Pulse signal output of positioning unit is open collector output

\*1 Connect the current limiting resistor R in series to correspond to the pulse signal voltage.

Pulse signal power supply voltage	Current limiting resistor R specifications	Current limiting resistor part no.
24 VDC ±10%	3.3 kΩ ±5% (0.5 W or more)	LEC-PA-R-332
5 VDC ±5%	390 Ω ±5% (0.1 W or more)	LEC-PA-R-391

LEC-CL5-1	190
LEC-CL5-3	370
LEC-CL5-5	610

### [Noise filter set]

#### Step Motor Driver (Pulse Input Type)

## LEC-NFA

Contents of the set: 2 noise filters  
(Manufactured by WURTH ELEKTRONIK: 74271222)

\* Refer to the LECPA series Operation Manual for installation.

### [Current limiting resistor]

This optional resistor (LEC-PA-R-□) is used when the pulse signal output of the positioning unit is open collector output.

## LEC-PA-R-□

### Current limiting resistor

Symbol	Resistance	Pulse signal power supply voltage
332	3.3 kΩ ±5%	24 VDC ±10%
391	390 Ω ±5%	5 VDC ±5%

- \* Select a current limiting resistor that corresponds to the pulse signal power supply voltage.
- \* For the LEC-PA-R-□, two pieces are shipped as a set.
- \* For pulse signal wiring details, refer to page 238.

# Step Motor Controller

## JXCE1/91/P1/D1/L1/M1 Series

\* For details, refer to page 307 and onward.

### How to Order

JXC **D** 1 **7** **T** -

**Communication protocol**

<b>E</b>	EtherCAT®
<b>9</b>	EtherNet/IP™
<b>P</b>	PROFINET
<b>D</b>	DeviceNet™
<b>L</b>	IO-Link
<b>M</b>	CC-Link

**For single axis**

**Mounting**

<b>7</b>	Screw mounting
<b>8</b> *1	DIN rail

\*1 The DIN rail is not included. It must be ordered separately. (Refer to page 245.)

**Option**

<b>Nil</b>	Without option
<b>S</b>	With straight type communication plug
<b>T</b>	With T-branch type communication plug

\* Select "Nil" for anything other than JXCD1 and JXCM1.

**Actuator part number**

Without cable specifications and actuator options  
Example: Enter "LEY16B-100"  
for the LEY16B-100B-S1□□.

**BC** Blank controller\*1

\*1 Requires dedicated software (JXC-BCW)

EtherCAT → EtherNet/IP PROFINET DeviceNet IO-Link CC-Link

**The controller is sold as single unit after the compatible actuator is set.**

Confirm that the combination of the controller and actuator is correct.

- ① Check the actuator label for the model number. This number should match that of the controller.

\* Refer to the operation manual for using the products. Please download it via our website: <https://www.smcworld.com>

**Precautions for blank controllers (JXC□1□□-BC)**

A blank controller is a controller to which the customer can write the data of the actuator it is to be combined and used with. Use the dedicated software (JXC-BCW) for data writing.

- Please download the dedicated software (JXC-BCW) via our website.
- Order the communication cable for controller setting (JXC-W2A-C) and USB cable (LEC-W2-U) separately to use this software.

SMC website: <https://www.smcworld.com>

 DeviceNet™ is a trademark of ODVA.  
 EtherCAT® is registered trademark and patented technology, licensed by Beckhoff Automation GmbH, Germany.

## Example of Operation Command

In addition to the step data input of 64 points max. in each communication protocol, the changing of each parameter can be performed in real time via numerical data defined operation.  
 \* Numerical values other than "Moving force," "Area 1," and "Area 2" can be used to perform operation under numerical instructions from JXCL1.

### <Application example> Movement between 2 points

No.	Movement mode	Speed	Position	Acceleration	Deceleration	Pushing force	Trigger LV	Pushing speed	Moving force	Area 1	Area 2	In position
0	1: Absolute	100	10	3000	3000	0	0	0	100	0	0	0.50
1	1: Absolute	100	100	3000	3000	0	0	0	100	0	0	0.50

### <Step no. defined operation>

- Sequence 1: Servo ON instruction
- Sequence 2: Instruction to return to origin
- Sequence 3: Specify step data No. 0 to input the DRIVE signal.
- Sequence 4: Specify step data No. 1 after the DRIVE signal has been temporarily turned OFF to input the DRIVE signal.

### <Numerical data defined operation>

- Sequence 1: Servo ON instruction
- Sequence 2: Instruction to return to origin
- Sequence 3: Specify step data No. 0 and turn ON the input instruction flag (position). Input 10 in the target position. Subsequently the start flag turns ON.
- Sequence 4: Turn ON step data No. 0 and the input instruction flag (position) to change the target position to 100 while the start flag is ON.

The same operation can be performed with any operation command.

LK RLS	Lock release (+)	Connection terminal of the lock release switch

### ■ Communication plug connector

#### For DeviceNet™

##### Straight type JXC-CD-S

##### T-branch type JXC-CD-T

#### Communication plug connector for DeviceNet™

Terminal name	Details
V+	Power supply (+) for DeviceNet™
CAN_H	Communication wire (High)
Drain	Grounding wire/Shielded wire
CAN_L	Communication wire (Low)
V-	Power supply (-) for DeviceNet™

#### For IO-Link

##### Straight type JXC-CL-S

#### Communication plug connector for IO-Link

Terminal no.	Terminal name	Details
1	L+	+24 V
2	NC	N/A
3	L-	0 V
4	C/Q	IO-Link signal

#### For CC-Link

##### Straight type LEC-CMJ-S

##### T-branch type LEC-CMJ-T

#### Communication plug connector for CC-Link

Terminal name	Details
DA	CC-Link communication line A
DB	CC-Link communication line B
DG	CC-Link ground line
SLD	CC-Link shield
FG	Frame ground

### ■ Conversion cable P5062-5 (Cable length: 300 mm)

\* To connect the teaching box (LEC-T1-3□G□) or controller setting kit (LEC-W2□) to the controller, a conversion cable is required.

# JXC51/61/E1/91/P1/D1/L1/M1 Series Precautions Relating to Differences in Controller Versions

As the controller version of the JXC series differs, the internal parameters are not compatible.

- If using the JXC□1□-BC or JXC□1□-BC-E, please use the latest version of the JXC-BCW (parameter writing tool).
- There are currently 3 versions available: version 1 products (V1.□ or S1.□), version 2 products (V2.□ or S2.□), and version 3 products (V3.□ or S3.□). Keep in mind that in order to write a backup file (.bkp) to another controller with the JXC-BCW, it needs to be the same version as the controller that created the file. (For example, a backup file created by a version 1 product can only be written to another version 1 product, and so on.) A backup file for the electric actuator with battery-less absolute encoder can only be written between version 3.4 or higher product (the backup file of version 2 or earlier products cannot be written).

## Identifying Version Symbols

# 3-Axis Step Motor Controller (EtherNet/IP™ Type)

## JXC92 Series

\* For details, refer to page 307 and onward.

### How to Order

#### ■ EtherNet/IP™ Type (JXC92)

#### Controller

**JXC 9 2 7**

EtherNet/IP™ type

3-axis type

Mounting

Symbol	Mounting
7	Screw mounting
8	DIN rail

- \* Order the actuator separately, including the actuator cable.  
(Example: LEY16B-100B-S1)
- \* For the "Speed-Work Load" graph of the actuator, refer to the LECPA section on the model selection page of the actuator to be connected.

### Specifications

For the setting of functions and operation methods, refer to the operation manual on the SMC website. (Documents/Download --> Instruction Manuals)

#### EtherNet/IP™ Type (JXC92)

Item	Specifications	
Number of axes	Max. 3 axes	
Compatible motor	Step motor (Servo/24 VDC)	
Compatible encoder	Incremental	
Power supply*1	Control power supply Power voltage: 24 VDC ±10% Max. current consumption: 500 mA Motor power supply Power voltage: 24 VDC ±10% Max. current consumption: Based on the connected actuator*2	
Communication	Protocol	EtherNet/IP™*3
	Communication speed	10 Mbps/100 Mbps (automatic negotiation)
	Communication method	Full duplex/Half duplex (automatic negotiation)
	Configuration file	EDS file
	Occupied area	Input 16 bytes/Output 16 bytes
	IP address setting range	Manual setting by switches: From 192.168.1.1 to 254, Via DHCP server: Arbitrary address
	Vendor ID	7 h (SMC Corporation)
	Product type	2 Bh (Generic Device)
Product code	DEh	
Serial communication	USB2.0 (Full Speed 12 Mbps)	
Memory	Flash-ROM	
LED indicator	PWR, RUN, USB, ALM, NS, MS, L/A, 100	
Lock control	Forced-lock release terminal*4	
Cable length	Actuator cable: 20 m or less	
Cooling system	Natural air cooling	
Operating temperature range	0°C to 40°C (No freezing)	
Operating humidity range	90% RH or less (No condensation)	
Storage temperature range	-10°C to 60°C (No freezing)	
Storage humidity range	90% RH or less (No condensation)	
Insulation resistance	Between all external terminals and the case: 50 MΩ (500 VDC)	
Weight	600 g (Screw mounting), 650 g (DIN rail mounting)	

\*1 Do not use a power supply with inrush current protection for the motor drive power supply.

\*2 Power consumption depends on the actuator connected. Refer to the actuator specifications for further details.

\*3 EtherNet/IP™ is a trademark of ODVA.

\*4 Applicable to non-magnetizing locks

## Dimensions

### EtherNet/IP™ Type JXC92

#### Screw mounting

#### DIN rail mounting

## Controller Details

### EtherNet/IP™ Type JXC92

No.	Name	Description	Details
①	<b>P1, P2</b>	EtherNet/IP™ communication connector	Connect Ethernet cable.
②	<b>NS, MS</b>	Communication status LED	Displays the status of the EtherNet/IP™ communication
③	<b>X100 X10 X1</b>	IP address setting switches	Switch to set the 4th byte of the IP address by X1, X10 and X100.
④	<b>PWR</b>	Power supply LED (Green)	Power supply ON: Green turns on Power supply OFF: Green turns off
⑤	<b>RUN</b>	Operation LED (Green)	Running in EtherNet/IP™: Green turns on Running via USB communication: Green flashes Stopped: Green turns off
⑥	<b>USB</b>	USB connection LED (Green)	USB connected: Green turns on USB not connected: Green turns off
⑦	<b>ALM</b>	Alarm LED (Red)	With alarm: Red turns on Without alarm: Red turns off
⑧	<b>USB</b>	Serial communication connector	Connect to a PC via the USB cable.
⑨	<b>ENC ①</b>	Encoder connector (16 pins)	Axis 1: Connect the actuator cable.
⑩	<b>MOT ①</b>	Motor power connector (6 pins)	
⑪	<b>ENC ②</b>	Encoder connector (16 pins)	Axis 2: Connect the actuator cable.
⑫	<b>MOT ②</b>	Motor power connector (6 pins)	
⑬	<b>ENC ③</b>	Encoder connector (16 pins)	Axis 3: Connect the actuator cable.
⑭	<b>MOT ③</b>	Motor power connector (6 pins)	
⑮	<b>CI</b>	Control power supply connector*1	Control power supply (+), All axes stop (+), Axis 1 lock release (+), Axis 2 lock release (+), Axis 3 lock release (+), Common (-)
⑯	<b>M PWR</b>	Motor power supply connector*1	Motor power supply (+), Motor power supply (-)

\*1 Connectors are included. (Refer to page 253.)

# 4-Axis Step Motor Controller (Parallel I/O/EtherNet/IP™ Type)

## JXC73/83/93 Series

## Wiring Example 1

**Cable with Main Control Power Supply Connector (For 4 Axes)\*1: C PWR** 1 pc. For 4 Axes  
JXC73/83/93

Terminal name	Function	Details
+24V	Main control power supply (+)	Power supply (+) supplied to the main control
24-0V	Main control power supply (-)	Power supply (-) supplied to the main control

\*1 Part no.: JXC-C1 (Cable length: 1.5 m)

**Cable with main control power supply connector**

**Motor Power Supply Connector (For 3/4 Axes)\*2: M PWR** 2 pcs.\*3 For 3 Axes  
JXC92    For 4 Axes  
JXC73/83/93

Terminal name	Function	Details	Note
0V	Motor power supply (-)	Power supply (-) supplied to the motor power	For 3 axes JXC92
		The M24V terminal, C24V terminal, EMG terminal, and LKRLS terminal are common (-).	For 4 axes JXC73/83/93
M24V	Motor power supply (+)	Power supply (+) supplied to the motor power	

\*2 Manufactured by PHOENIX CONTACT (Part no.: MSTB2, 5/2-STF-5, 08)

\*3 1 pc. for 3 axes (JXC92)

**Motor power supply connector**

**Motor Control Power Supply Connector (For 4 Axes)\*4: CI** 2 pcs. For 4 Axes  
JXC73/83/93

Terminal name	Function	Details
C24V	Motor control power supply (+)	Power supply (+) supplied to the motor control
EMG1/EMG3	Stop (+)	Axis 1/Axis 3: Input (+) for releasing the stop
EMG2/EMG4	Stop (+)	Axis 2/Axis 4: Input (+) for releasing the stop
LKRLS1/LKRLS3	Lock release (+)	Axis 1/Axis 3: Input (+) for releasing the lock
LKRLS2/LKRLS4	Lock release (+)	Axis 2/Axis 4: Input (+) for releasing the lock

\*4 Manufactured by PHOENIX CONTACT (Part no.: FK-MC0, 5/5-ST-2, 5)

**Motor control power supply connector**

**Control Power Supply Connector (For 3 Axes)\*5: CI** 1 pc. For 3 Axes  
JXC92

Terminal name	Function	Details
0V	Control power supply (-)	The C24V terminal, LKRLS terminal, and EMG terminal are common (-).
C24V	Control power supply (+)	Power supply (+) supplied to the control
LKRLS3	Lock release (+)	Axis 3: Input (+) for releasing the lock
LKRLS2	Lock release (+)	Axis 2: Input (+) for releasing the lock
LKRLS1	Lock release (+)	Axis 1: Input (+) for releasing the lock
EMG	Stop (+)	All axes: Input (+) for releasing the stop

\*5 Manufactured by PHOENIX CONTACT (Part no.: FK-MC0, 5/6-ST-2, 5)

**Control power supply connector**

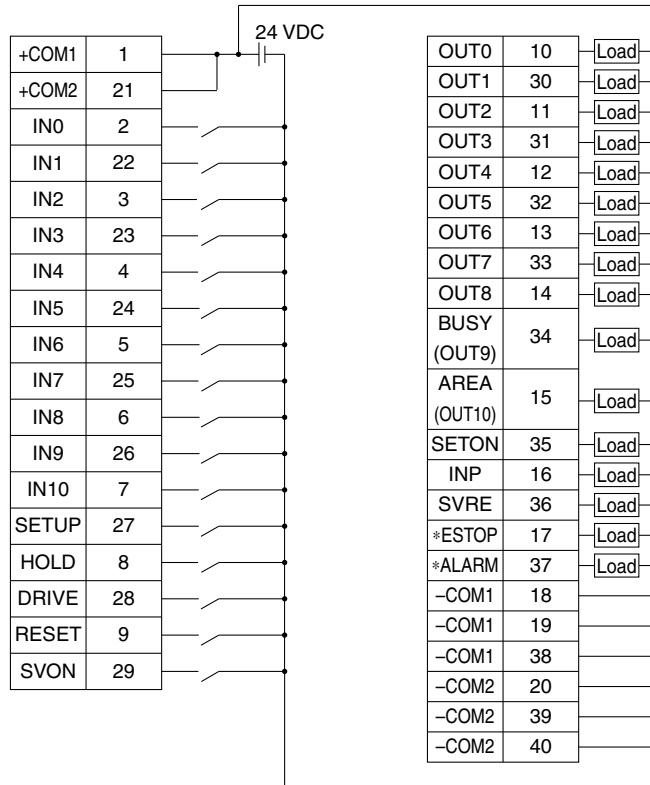

## Wiring Example 2

### Parallel I/O Connector

- \* When you connect a PLC to the I/O 1 or I/O 2 parallel I/O connector, use the I/O cable (JXC-C2-□).
- \* The wiring changes depending on the type of parallel I/O (NPN or PNP).

### I/O 1 Wiring example

#### NPN JXC73

#### PNP JXC83

### I/O 1 Input Signal

Name	Details
+COM1 +COM2	Connects the power supply 24 V for input/output signal
IN0 to IN8	Step data specified bit no. (Standard: When 512 points are used)
IN9 IN10	Step data specified extension bit no. (Extension: When 2048 points are used)
SETUP	Instruction to return to origin
HOLD	Temporarily stops operation
DRIVE	Instruction to drive
RESET	Resets alarm and interrupts operation
SVON	Servo ON instruction

### I/O 1 Output Signal

Name	Details
OUT0 to OUT8	Outputs the step data no. during operation
BUSY (OUT9)	Outputs when the operation of the actuator is in progress
AREA (OUT10)	Outputs when all actuators are within the area output range
SETON	Outputs when the return to origin of all actuators is completed
INP	Outputs when the positioning or pushing of all actuators is completed
SVRE	Outputs when servo is ON
*ESTOP*1	OFF when EMG stop is instructed
*ALARM*1	OFF when alarm is generated
-COM1 -COM2	Connects the power supply 0 V for input/output signal

\*1 Negative-logic circuit signal

## Wiring Example 2

### Parallel I/O Connector

- \* When you connect a PLC to the I/O 1 or I/O 2 parallel I/O connector, use the I/O cable (JXC-C2-□).
- \* The wiring changes depending on the type of parallel I/O (NPN or PNP).

### I/O 2 Wiring example

#### NPN JXC73

#### PNP JXC83

### I/O 2 Input Signal

Name	Details
+COM3 +COM4	Connects the power supply 24 V for input/output signal
N.C.	Cannot be connected

### I/O 2 Output Signal

Name	Details
BUSY1	Busy signal for axis 1
BUSY2	Busy signal for axis 2
BUSY3	Busy signal for axis 3
BUSY4	Busy signal for axis 4
AREA1	Area signal for axis 1
AREA2	Area signal for axis 2
AREA3	Area signal for axis 3
AREA4	Area signal for axis 4
INP1	Positioning or pushing completion signal for axis 1
INP2	Positioning or pushing completion signal for axis 2
INP3	Positioning or pushing completion signal for axis 3
INP4	Positioning or pushing completion signal for axis 4
*ALARM1*2	Alarm signal for axis 1
*ALARM2*2	Alarm signal for axis 2
*ALARM3*2	Alarm signal for axis 3
*ALARM4*2	Alarm signal for axis 4
-COM3 -COM4	Connects the power supply 0 V for input/output signal

\*2 Negative-logic circuit signal

JXCE1/91/P1/D1/L1/M1 Series

\* When connecting to a JXCE1/91/P1/D1/L1/M1 series product, use a conversion cable (P5062-5) as a relay.

Refer to page 245 for details on the communication cable for controller setting (JXC-W2A-C) which doesn't require a conversion cable.

## Hardware Requirements

OS	Windows®7, Windows®8.1, Windows®10
Communication interface	USB 1.1 or USB 2.0 ports
Display	1024 x 768 or more

\* Windows®7, Windows®8.1 and Windows®10 are registered trademarks of Microsoft Corporation in the United States.

## Screen Example

### Easy mode screen example

### Easy operation and simple setting

- Allowing to set and display actuator step data such as position, speed, force, etc.
- Setting of step data and test drive can be performed on the same page.
- Can be used to jog and move at a constant rate

### Normal mode screen example

### Detailed setting

- Step data can be set in detail.
- Signals and terminal status can be monitored.
- Parameters can be set.
- JOG and constant rate movement, return to origin, test drive and testing of forced output can be performed.

# AC Servo Motor Driver

LECS□ Series

Power supply voltage 100 to 120 VAC  
200 to 230 VAC

Motor capacity 100/200/400 W

Incremental Type

## LECSA Series (Pulse input type/Positioning type)

- Up to 7 positioning points by point table
- Input type: Pulse input
- Control encoder: Incremental 17-bit encoder (Resolution: 131072 p/rev)
- Parallel input: 6 inputs  
output: 4 outputs

## LECSB Series (Pulse input type)

- Input type: Pulse input
- Control encoder: Absolute 18-bit encoder (Resolution: 262144 p/rev)
- Parallel input: 10 inputs  
output: 6 outputs

## LECS C Series (CC-Link direct input type)

- Position data/speed data setting and operation start/stop
- Positioning by up to 255 point tables (when 2 stations are occupied)
- Up to 32 drivers can be connected (when 2 stations are occupied) with CC-Link communication.
- Applicable Fieldbus protocol: CC-Link (Ver. 1.10, Max. communication speed: 10 Mbps)
- Control encoder: Absolute 18-bit encoder (Resolution: 262144 p/rev)

CC-Link

## LECSS Series (SSCNET III type)

- Compatible with Mitsubishi Electric's servo system controller network
- Reduced wiring and SSCNET III optical cable for one-touch connection
- The SSCNET III optical cable provides enhanced noise resistance.
- Up to 16 drivers can be connected with SSCNET III communication.
- Applicable Fieldbus protocol: SSCNET III  
(High-speed optical communication, Max. bidirectional communication speed: 50 Mbps)
- Control encoder: Absolute 18-bit encoder (Resolution: 262144 p/rev)

SSCNET III  
SERVO SYSTEM CONTROLLER NETWORK

# AC Servo Motor Driver

## LECS□-T Series

Power supply voltage 200 to 240 VAC  
(LECS-T Series: 200 to 230 VAC)

Motor capacity 100/200/400/750 W

Model Selection

### LECSB-T Series (Pulse input type/Positioning type)

- Positioning by up to 255 point tables
- Input type: Pulse input (Sink (NPN) type interface/Source (PNP) type interface)
- Control encoder: Absolute 22-bit encoder (Resolution: 4194304 p/rev)
- STO (Safe Torque Off) safety function available
- Parallel input: 10 inputs  
output: 6 outputs

### LECS-C-T Series (CC-Link direct input type)

- Position data/speed data setting and operation start/stop
- Positioning by up to 255 point tables (when 2 stations are occupied)
- Up to 32 drivers can be connected (when 2 stations are occupied) with CC-Link communication.
- Applicable Fieldbus protocol: CC-Link (Ver. 1.10, Max. communication speed: 10 Mbps)
- Control encoder: Absolute 18-bit encoder (Resolution: 262144 p/rev)

CC-Link

### LECSN-T Series (Network card type)

- Supports EtherCAT<sup>®</sup>, EtherNet/IP<sup>™</sup>, and PROFINET<sup>®</sup>
- Supports 3 types of network card (EtherCAT<sup>®</sup>, EtherNet/IP<sup>™</sup>, and PROFINET)
- STO (Safe Torque Off) safety function available
- Control encoder: Absolute 22-bit encoder (Resolution: 4194304 p/rev)

PROFINET<sup>®</sup>

### LECSS-T Series (SSCNET III/H type)

- Applicable Fieldbus protocol: SSCNET III/H  
(High-speed optical communication, max. bidirectional communication speed: 150 Mbps)
- Bidirectional communication speed: 3 times
- SSCNET III/H and SSCNET III products are compatible.
- Improved noise resistance
- STO (Safe Torque Off) safety function available
- Control encoder: Absolute 22-bit encoder (Resolution: 4194304 p/rev)

LEF LEJ LEY

## How to Order

### For LECSA/LECSB/LECSC/LECSS

**LECS A 1 - S1**

Driver type

A	Pulse input type/Positioning type (For incremental encoder)
B	Pulse input type (For absolute encoder)
C	CC-Link direct input type (For absolute encoder)
S	SSCNET III type (For absolute encoder)

Power supply voltage

1	100 to 120 VAC, 50/60 Hz
2	200 to 230 VAC, 50/60 Hz

The LECSB-S, LECSC-S, and LECSS-S electric actuator drivers are to be discontinued. Please select one of the substitute drivers ending with a "-T" instead: the LECSB-T, LECSC-T, and LECSS-T.

- \* If an I/O connector is required, order the part number "LE-CSN□" separately.
- \* If an I/O cable is required, order the part number "LEC-CSN□-1" separately.  
(Since the electric actuator will not operate without emergency stop (EMG) wiring for the LECSB, an I/O connector or an I/O cable is required.)

Compatible motor type

Symbol	Type	Capacity	Encoder
S1	AC servo motor (S2*1)	100 W	Incremental
S3	AC servo motor (S3*1)	200 W	
S4	AC servo motor (S4*1)*2	400 W	
S5	AC servo motor (S6*1)	100 W	Absolute
S7	AC servo motor (S7*1)	200 W	
S8	AC servo motor (S8*1)*2	400 W	

\*1 The symbol shows the motor type (actuator).

\*2 Only available for power supply voltage "200 to 230 VAC"

### For LECSB-T/LECSC-T/LECSS-T

**LECS B 2 - T5**

Driver type

B	Pulse input type/Positioning type (For absolute encoder)
C	CC-Link direct input type (For absolute encoder)
S	SSCNET III/H type (For absolute encoder)

Power supply voltage

2	200 to 240 VAC, 50/60 Hz (For LECSB2-T/LECSS2-T) 200 to 230 VAC, 50/60 Hz (For LECSC2-T)
---	---------------------------------------------------------------------------------------------------

- \* If an I/O connector is required, order the part number "LE-CSN□" separately.
- \* If an I/O cable is required, order the part number "LEC-CSN□-1" separately.  
(Since the electric actuator will not operate without forced stop (EM2) wiring when using the LECSB-T in any mode other than positioning mode, an I/O connector or an I/O cable is required.)

Compatible motor type

Symbol	Type	Capacity	Encoder
T5	AC servo motor (T6*1)	100 W	Absolute
T7	AC servo motor (T7*1)	200 W	
T8	AC servo motor (T8*1)	400 W	
T9	AC servo motor (T9*1)	750 W	

\*1 The symbol shows the motor type (actuator).

### For LECSN-T

**LECS N 2 - T5 - 9**

Driver type

N	Network card type (For absolute encoder)
---	---------------------------------------------

Power supply voltage

2	200 to 240 VAC, 50/60 Hz
---	--------------------------

Compatible motor type

Symbol	Type	Capacity	Encoder
T5	AC servo motor (T6*1)	100 W	Absolute
T7	AC servo motor (T7*1)	200 W	
T8	AC servo motor (T8*1)	400 W	
T9	AC servo motor (T9*1)	750 W	

\*1 The symbol shows the motor type (actuator).

Network card type\*1

Nil	Without network card
E	EtherCAT®
9	EtherNet/IP™
P	PROFINET

\*1 Only the "Without network card" option is UL compliant.

## Specifications

### LECSA Series

Model		LECSA1-S1	LECSA1-S3	LECSA2-S1	LECSA2-S3	LECSA2-S4
Compatible motor capacity [W]		100	200	100	200	400
Compatible encoder		Incremental 17-bit encoder (Resolution: 131072 p/rev)				
Main power supply	Power voltage [V]	Single phase 100 to 120 VAC (50/60 Hz)		Single phase 200 to 230 VAC (50/60 Hz)		
	Allowable voltage fluctuation [V]	Single phase 85 to 132 VAC		Single phase 170 to 253 VAC		
	Rated current [A]	3.0	5.0	1.5	2.4	4.5
Control power supply	Control power supply voltage [V]	24 VDC				
	Allowable voltage fluctuation [V]	21.6 to 26.4 VDC				
	Rated current [A]	0.5				
Parallel input		6 inputs				
Parallel output		4 outputs				
Max. input pulse frequency [pps]		1 M (for differential receiver), 200 k (for open collector)*2				
Function	In-position range setting [pulse]	0 to ±65535 (Command pulse unit)				
	Error excessive	±3 rotations				
	Torque limit	Parameter setting				
	Communication	USB communication				
Point table		Up to 7 points				
Operating temperature range [°C]		0 to 55 (No freezing)				
Operating humidity range [%RH]		90 or less (No condensation)				
Storage temperature range [°C]		-20 to 65 (No freezing)				
Storage humidity range [%RH]		90 or less (No condensation)				
Insulation resistance [MΩ]		Between the housing and SG: 10 (500 VDC)				
Weight [g]		600				700

### LECSB Series

Model		LECSB1-S5	LECSB1-S7	LECSB2-S5	LECSB2-S7	LECSB2-S8
Compatible motor capacity [W]		100	200	100	200	400
Compatible encoder		Absolute 18-bit encoder (Resolution: 262144 p/rev)				
Main power supply	Power voltage [V]	Single phase 100 to 120 VAC (50/60 Hz)		Three phase 200 to 230 VAC (50/60 Hz) Single phase 200 to 230 VAC (50/60 Hz)		
	Allowable voltage fluctuation [V]	Single phase 85 to 132 VAC		Three phase 170 to 253 VAC Single phase 170 to 253 VAC		
	Rated current [A]	3.0	5.0	0.9	1.5	2.6
Control power supply	Control power supply voltage [V]	Single phase 100 to 120 VAC (50/60 Hz)		Single phase 200 to 230 VAC (50/60 Hz)		
	Allowable voltage fluctuation [V]	Single phase 85 to 132 VAC		Single phase 170 to 253 VAC		
	Rated current [A]	0.4		0.2		
Parallel input		10 inputs				
Parallel output		6 outputs				
Max. input pulse frequency [pps]		1 M (for differential receiver), 200 k (for open collector)*2				
Function	In-position range setting [pulse]	0 to ±10000 (Command pulse unit)				
	Error excessive	±3 rotations				
	Torque limit	Parameter setting or external analog input setting (0 to 10 VDC)				
	Communication	USB communication, RS422 communication*1				
Operating temperature range [°C]		0 to 55 (No freezing)				
Operating humidity range [%RH]		90 or less (No condensation)				
Storage temperature range [°C]		-20 to 65 (No freezing)				
Storage humidity range [%RH]		90 or less (No condensation)				
Insulation resistance [MΩ]		Between the housing and SG: 10 (500 VDC)				
Weight [g]		800				1000

\*1 USB communication and RS422 communication cannot be performed at the same time.

\*2 If the command pulse input is open collector method, it supports only the sink (NPN) type interface. It does not correspond to the source (PNP) type interface.

**Specifications**

**LECS Series**

Model		LECS1-S5	LECS1-S7	LECS2-S5	LECS2-S7	LECS2-S8	
<b>Compatible motor capacity [W]</b>		100	200	100	200	400	
<b>Compatible encoder</b>		Absolute 18-bit encoder (Resolution: 262144 p/rev)					
<b>Main power supply</b>	<b>Power voltage [V]</b>	Single phase 100 to 120 VAC (50/60 Hz)		Three phase 200 to 230 VAC (50/60 Hz) Single phase 200 to 230 VAC (50/60 Hz)			
	<b>Allowable voltage fluctuation [V]</b>	Single phase 85 to 132 VAC		Three phase 170 to 253 VAC Single phase 170 to 253 VAC			
	<b>Rated current [A]</b>	3.0	5.0	0.9	1.5	2.6	
<b>Control power supply</b>	<b>Control power supply voltage [V]</b>	Single phase 100 to 120 VAC (50/60 Hz)		Single phase 200 to 230 VAC (50/60 Hz)			
	<b>Allowable voltage fluctuation [V]</b>	Single phase 85 to 132 VAC		Single phase 170 to 253 VAC			
	<b>Rated current [A]</b>	0.4		0.2			
<b>Communication specifications</b>	<b>Applicable Fieldbus protocol (Version)</b>		CC-Link communication (Ver. 1.10)				
	<b>Connection cable</b>		CC-Link Ver. 1.10 compliant cable (Shielded 3-core twisted pair cable)*1				
	<b>Remote station number</b>		1 to 64				
	<b>Cable length</b>	<b>Communication speed [bps]/ Max. overall cable length [m]</b>	16 k/1200, 625 k/900, 2.5 M/400, 5 M/160, 10 M/100				
		<b>Cable length between stations [m]</b>	0.2 or more				
	<b>I/O occupation area (Inputs/Outputs)</b>		1 station occupied (Remote I/O 32 points/32 points)/(Remote register 4 words/4 words) 2 stations occupied (Remote I/O 64 points/64 points)/(Remote register 8 words/8 words)				
	<b>Number of connectable drivers</b>		Up to 42 (when 1 station is occupied by 1 driver), Up to 32 (when 2 stations are occupied by 1 driver), when there are only remote device stations.				
<b>Command method</b>	<b>Remote register input</b>	Available with CC-Link communication (2 stations occupied)					
	<b>Point table No. input</b>	Available with CC-Link communication, RS422 communication CC-Link communication (1 station occupied): 31 points CC-Link communication (2 stations occupied): 255 points RS422 communication: 255 points					
	<b>Indexer positioning input</b>	Available with CC-Link communication CC-Link communication (1 station occupied): 31 points CC-Link communication (2 stations occupied): 255 points					
<b>Communication function</b>		USB communication, RS-422 communication*2					
<b>Operating temperature range [°C]</b>		0 to 55 (No freezing)					
<b>Operating humidity range [%RH]</b>		90 or less (No condensation)					
<b>Storage temperature range [°C]</b>		-20 to 65 (No freezing)					
<b>Storage humidity range [%RH]</b>		90 or less (No condensation)					
<b>Insulation resistance [MΩ]</b>		Between the housing and SG: 10 (500 VDC)					
<b>Weight [g]</b>		800				1000	

\*1 If the system comprises of both CC-Link Ver. 1.00 and Ver. 1.10 compliant cables, Ver. 1.00 specifications are applied to the overall cable length and the cable length between stations.

\*2 USB communication and RS422 communication cannot be performed at the same time.

**LECS Series**

Model		LECS1-S5	LECS1-S7	LECS2-S5	LECS2-S7	LECS2-S8

## Specifications

### LECSB-T Series

Model		LECSB2-T5	LECSB2-T7	LECSB2-T8	LECSB2-T9
<b>Compatible motor capacity [W]</b>		100	200	400	750
<b>Compatible encoder</b>		Absolute 22-bit encoder (Resolution: 4194304 p/rev)			
<b>Main power supply</b>	<b>Power voltage [V]</b>	Three phase 200 to 240 VAC (50/60 Hz), Single phase 200 to 240 VAC (50/60 Hz)			
	<b>Allowable voltage fluctuation [V]</b>	Three phase 170 to 264 VAC (50/60 Hz), Single phase 170 to 264 VAC (50/60 Hz)			
	<b>Rated current [A]</b>	0.9	1.5	2.6	3.8
<b>Control power supply</b>	<b>Control power supply voltage [V]</b>	Single phase 200 to 240 VAC (50/60 Hz)			
	<b>Allowable voltage fluctuation [V]</b>	Single phase 170 to 264 VAC			
	<b>Rated current [A]</b>	0.2			
<b>Parallel input</b>		10 inputs			
<b>Parallel output</b>		6 outputs			
<b>Max. input pulse frequency [pps]</b>		4 M (for differential receiver), 200 k (for open collector)			
<b>Function</b>	<b>In-position range setting [pulse]</b>	0 to ±65535 (Command pulse unit)			
	<b>Error excessive</b>	±3 rotations			
	<b>Torque limit</b>	Parameter setting or external analog input setting (0 to 10 VDC)			
	<b>Communication</b>	USB communication, RS422 communication*1			
	<b>Point table</b>	Up to 255 points			
<b>Pushing operation</b>		Point table no. input method, Up to 127 points			
<b>Operating temperature range [°C]</b>		0 to 55 (No freezing)			
<b>Operating humidity range [%RH]</b>		90 or less (No condensation)			
<b>Storage temperature range [°C]</b>		-20 to 65 (No freezing)			
<b>Storage humidity range [%RH]</b>		90 or less (No condensation)			
<b>Insulation resistance [MΩ]</b>		Between the housing and SG: 10 (500 VDC)			
<b>Safety function</b>		STO (IEC/EN 61800-5-2)			
<b>Safety standards*2</b>		EN ISO 13849-1 Category 3 PL e, IEC 61508 SIL 3, EN 62061 SIL CL3, EN 61800-5-2			
<b>Weight [g]</b>		800	1000	1400	

\*1 USB communication and RS422 communication cannot be performed at the same time.

\*2 The safety level depends on the set value of the driver parameter [Pr. PF18 STO diagnosis error detection time] and whether STO input diagnosis by TOFB output is performed or not. Refer to the LECSB-T operation manual for details.

### LECSC-T Series

Model		LECSC2-T5	LECSC2-T7	LECSC2-T8	LECSC2-T9
<b>Compatible motor capacity [W]</b>		100	200	400	750
<b>Compatible encoder</b>		Absolute 18-bit encoder (Resolution: 262144 p/rev)			
<b>Main power supply</b>	<b>Power voltage [V]</b>	Three phase 200 to 230 VAC (50/60 Hz), Single phase 200 to 230 VAC (50/60 Hz)			
	<b>Allowable voltage fluctuation [V]</b>	Three phase 170 to 253 VAC, Single phase 170 to 253 VAC			
	<b>Rated current [A]</b>	0.9	1.5	2.6	3.8
<b>Control power supply</b>	<b>Control power supply voltage [V]</b>	Single phase 200 to 230 VAC (50/60 Hz)			
	<b>Allowable voltage fluctuation [V]</b>	Single phase 170 to 253 VAC			
	<b>Rated current [A]</b>	0.2			
<b>Communication specifications</b>	<b>Applicable Fieldbus protocol (Version)</b>		CC-Link communication (Ver. 1.10)		
	<b>Connection cable</b>		CC-Link Ver. 1.10 compliant cable (Shielded 3-core twisted pair cable)*1		
	<b>Remote station number</b>		1 to 64		
	<b>Cable length</b>	<b>Communication speed [bps]/ Max. overall cable length [m]</b>	16 k/1200, 625 k/900, 2.5 M/400, 5 M/160, 10 M/100		
		<b>Cable length between stations [m]</b>	0.2 or more		
	<b>I/O occupation area (Inputs/Outputs)</b>		1 station occupied (Remote I/O 32 points/32 points)/(Remote register 4 words/4 words) 2 stations occupied (Remote I/O 64 points/64 points)/(Remote register 8 words/8 words)		
<b>Number of connectable drivers</b>		Up to 42 (when 1 station is occupied by 1 driver), Up to 32 (when 2 stations are occupied by 1 driver), when there are only remote device stations.			
<b>Command method</b>	<b>Remote register input</b>		Available with CC-Link communication (2 stations occupied)		
	<b>Point table No. input</b>		Available with CC-Link communication, RS422 communication CC-Link communication (1 station occupied): 31 points, CC-Link communication (2 stations occupied): 255 points RS422 communication: 255 points		
	<b>Indexer positioning input</b>		Available with CC-Link communication CC-Link communication (1 station occupied): 31 points, CC-Link communication (2 stations occupied): 255 points		
<b>Communication function</b>		USB communication, RS-422 communication*2			
<b>Operating temperature range [°C]</b>		0 to 55 (No freezing)			
<b>Operating humidity range [%RH]</b>		90 or less (No condensation)			
<b>Storage temperature range [°C]</b>		-20 to 65 (No freezing)			
<b>Storage humidity range [%RH]</b>		90 or less (No condensation)			
<b>Insulation resistance [MΩ]</b>		Between the housing and SG: 10 (500 VDC)			
<b>Weight [g]</b>		800	1000	1400	

\*1 If the system comprises of both CC-Link Ver. 1.00 and Ver. 1.10 compliant cables, Ver. 1.00 specifications are applied to the overall cable length and the cable length between stations.

\*2 USB communication and RS422 communication cannot be performed at the same time.

## Specifications

### LECSN-T Series

Model		LECSN2-T5	LECSN2-T7	LECSN2-T8	LECSN2-T9
<b>Compatible motor capacity [W]</b>		100	200	400	750
<b>Compatible encoder</b>		Absolute 22-bit encoder (Resolution: 4194304 p/rev)			
<b>Main power supply</b>	<b>Power voltage [V]</b>	Three phase 200 to 240 VAC (50/60 Hz), Single phase 200 to 240 VAC (50/60 Hz)			
	<b>Allowable voltage fluctuation [V]</b>	Three phase 170 to 264 VAC (50/60 Hz), Single phase 170 to 264 VAC (50/60 Hz)			
	<b>Rated current [A]</b>	0.9	1.5	2.6	3.8
<b>Control power supply</b>	<b>Control power supply voltage [V]</b>	Single phase 200 to 240 VAC (50/60 Hz)			
	<b>Allowable voltage fluctuation [V]</b>	Single phase 170 to 264 VAC			
	<b>Rated current [A]</b>	0.2			
<b>Applicable Fieldbus protocol</b>		PROFINET, EtherCAT®, EtherNet/IP™			
<b>Function</b>	<b>Communication</b>	USB communication			
	<b>Point table*1</b>	Up to 255 points			
<b>Operating temperature range [°C]</b>		0 to 55 (No freezing)			
<b>Operating humidity range [%RH]</b>		90 or less (No condensation)			
<b>Storage temperature range [°C]</b>		-20 to 65 (No freezing)			
<b>Storage humidity range [%RH]</b>		90 or less (No condensation)			
<b>Insulation resistance [MΩ]</b>		Between the housing and SG: 10 (500 VDC)			
<b>Safety function</b>		STO (IEC/EN 61800-5-2)			
<b>Safety standards*2</b>		EN ISO 13849-1 Category 3 PL e, IEC 61508 SIL 3, EN 62061 SIL CL3, EN 61800-5-2			
<b>Weight [g]</b>		1000			1400

\*1 Only supports PROFINET and EtherCAT®

\*2 The safety level depends on the set value of the driver parameter [Pr. PF18 STO diagnosis error detection time] and whether STO input diagnosis by TOFB output is performed or not. Refer to the LECSN-T operation manual for details.

### LECSS-T Series

Model		LECSS2-T5	LECSS2-T7	LECSS2-T8	LECSS2-T9
<b>Compatible motor capacity [W]</b>		100	200	400	750
<b>Compatible encoder</b>		Absolute 22-bit encoder (Resolution: 4194304 p/rev)			
<b>Main power supply</b>	<b>Power voltage [V]</b>	Three phase 200 to 240 VAC (50/60 Hz), Single phase 200 to 240 VAC (50/60 Hz)			
	<b>Allowable voltage fluctuation [V]</b>	Three phase 170 to 264 VAC (50/60 Hz), Single phase 170 to 264 VAC (50/60 Hz)			
	<b>Rated current [A]</b>	0.9	1.5	2.6	3.8
<b>Control power supply</b>	<b>Control power supply voltage [V]</b>	Single phase 200 to 240 VAC (50/60 Hz)			
	<b>Allowable voltage fluctuation [V]</b>	Single phase 170 to 264 VAC			
	<b>Rated current [A]</b>	0.2			
<b>Applicable Fieldbus protocol</b>		SSCNET III/H (High-speed optical communication)			
<b>Communication function</b>		USB communication			
<b>Operating temperature range [°C]</b>		0 to 55 (No freezing)			
<b>Operating humidity range [%RH]</b>		90 or less (No condensation)			
<b>Storage temperature range [°C]</b>		-20 to 65 (No freezing)			
<b>Storage humidity range [%RH]</b>		90 or less (No condensation)			
<b>Insulation resistance [MΩ]</b>		Between the housing and SG: 10 (500 VDC)			
<b>Safety function</b>		STO (IEC/EN 61800-5-2)			
<b>Safety standards*1</b>		EN ISO 13849-1 Category 3 PL d, EN 61508 SIL 2, EN 62061 SIL CL2, EN 61800-5-2			
<b>Weight [g]</b>		800		1000	1400

\*1 Refer to the LECSS-T operation manual for details.

## Power Supply Wiring Example: LECSA

LECSA□-□

### Main Circuit Power Supply Connector: CNP1 \* Accessory

Terminal name	Function	Details
	Protective earth (PE)	Should be grounded by connecting the servo motor's earth terminal and the control panel's protective earth (PE)
L1	Main circuit power supply	Connect the main circuit power supply. LECSA1: Single phase 100 to 120 VAC, 50/60 Hz LECSA2: Single phase 200 to 230 VAC, 50/60 Hz
L2		
P	Regeneration option	Terminal to connect regeneration option LECSA□-S1: Not connected at time of shipping LECSA□-S3, S4: Connected at time of shipping * If regeneration option is required for "Model Selection," connect to this terminal.
C		
U	Servo motor power (U)	Connect to motor cable (U, V, W).
V	Servo motor power (V)	
W	Servo motor power (W)	

### Control Circuit Power Supply Connector: CNP2 \* Accessory

Terminal name	Function	Details
24V	Control circuit power supply (24 V)	24 V side of the control circuit power supply (24 VDC) supplied to the driver
0V	Control circuit power supply (0 V)	0 V side of the control circuit power supply (24 VDC) supplied to the driver

## Power Supply Wiring Example: LECSB, LECS, LECS

**LECSB1-□**  
**LECS1-□**  
**LECS1-□**

**LECSB2-□**  
**LECS2-□**  
**LECS2-□**

**For single phase 200 VAC**

**For three phase 200 VAC**

\* For single phase 200 to 230 VAC, power supply should be connected to L1 and L2 terminals, with nothing connected to L3.

### Main Circuit Power Supply Connector: CNP1 \* Accessory

Terminal name	Function	Details
L1	Main circuit power supply	Connect the main circuit power supply. LECSB1/LECS1/LECS1: Single phase 100 to 120 VAC, 50/60 Hz Connection terminal: L1, L2 LECSB2/LECS2/LECS2: Single phase 200 to 230 VAC, 50/60 Hz Connection terminal: L1, L2 Three phase 200 to 230 VAC, 50/60 Hz Connection terminal: L1, L2, L3
L2		
L3		
N	Do not connect.	
P1	Connect between P1 and P2. (Connected at time of shipping)	
P2		

### Control Circuit Power Supply Connector: CNP2 \* Accessory

Terminal name	Function	Details
P	Regeneration option	Connect between P and D. (Connected at time of shipping) * If regeneration option is required for "Model Selection," connect to this terminal.
C		
D		
L11	Control circuit power supply	Connect the control circuit power supply. LECSB1/LECS1/LECS1: Single phase 100 to 120 VAC, 50/60 Hz Connection terminal: L11, L21 LECSB2/LECS2/LECS2: Single phase 200 to 230 VAC, 50/60 Hz Connection terminal: L11, L21
L21		

### Motor Connector: CNP3 \* Accessory

Terminal name	Function	Details
U	Servo motor power (U)	Connect to motor cable (U, V, W).
V	Servo motor power (V)	
W	Servo motor power (W)

## Power Supply Wiring Example: LECSB2-T□, LECSS2-T□, LECSN2-T□

For single phase 200 VAC

For three phase 200 VAC

\* For single phase 200 to 240 VAC, power supply should be connected to L1 and L3 terminals, with nothing connected to L2. Please note that the wiring locations differ from the LECS□.

### Main Circuit Power Supply Connector: CNP1 \* Accessory

Terminal name	Function	Details
L1	Main circuit power supply	Connect the main circuit power supply. LECSB2-T/LECSS2-T/LECSN2-T: Single phase 200 to 240 VAC, 50/60 Hz Connection terminal: L1, L3 Three phase 200 to 240 VAC, 50/60 Hz Connection terminal: L1, L2, L3
L2		
L3		
N(-)	Do not connect.	
P3	Connect between P3 and P4. (Connected at time of shipping)	
P4		

### Control Circuit Power Supply Connector: CNP2 \* Accessory

Terminal name	Function	Details
P(+)	Regeneration option	Connect between P(+) and D. (Connected at time of shipping) * If regeneration option is required for "Model Selection," connect to this terminal.
C		
D		
L11	Control circuit power supply	Connect the control circuit power supply. LECSB2-T/LECSS2-T/LECSN2-T: Single phase 200 to 240 VAC, 50/60 Hz Connection terminal: L11, L21
L21		

### Motor Connector: CNP3 \* Accessory

Terminal name	Function	Details
U	Servo motor power (U)	Connect to motor cable (U, V, W).
V	Servo motor power (V)	
W	Servo motor power (W)	

## Power Supply Wiring Example: LECS2-T□

**For single phase 200 VAC**

**For three phase 200 VAC**

\* For single phase 200 to 230 VAC, power supply should be connected to L1 and L2 terminals, with nothing connected to L3.

### Main Circuit Power Supply Connector: CNP1 \* Accessory

Terminal name	Function	Details
L1	Main circuit power supply	Connect the main circuit power supply. LECS2-T: Single phase 200 to 230 VAC, 50/60 Hz Connection terminal: L1, L2 Three phase 200 to 230 VAC, 50/60 Hz Connection terminal: L1, L2, L3
L2		
L3		
N	Do not connect.	
P3	Connect between P3 and P4. (Connected at time of shipping)	
P4		

### Control Circuit Power Supply Connector: CNP2 \* Accessory

Terminal name	Function	Details
P(+)	Regeneration option	Connect between P and D. (Connected at time of shipping) * If regeneration option is required for "Model Selection," connect to this terminal.
C		
D		
L11	Control circuit power supply	Connect the control circuit power supply. LECS2-T: Single phase 200 to 230 VAC, 50/60 Hz Connection terminal: L11, L21
L21		

### Motor Connector: CNP3 \* Accessory

Terminal name	Function	Details
U	Servo motor power (U)	Connect to motor cable (U, V, W).
V	Servo motor power (V)	
W	Servo motor power (W)

## Control Signal Wiring Example: LECSA

### LECSA□-□

This wiring example shows connection with a PLC (FX3U-□□MT/ES) manufactured by Mitsubishi Electric Corporation as when used in position control mode. Refer to the LECSA series Operation Manual and any technical literature or operation manuals for your PLC and positioning unit before connecting to another PLC or positioning unit.

- \*1 For preventing electric shock, be sure to connect the driver main circuit power supply connector (CNP1)'s protective earth (PE) terminal (marked ⊕) to the control panel's protective earth (PE).
- \*2 For interface use, supply 24 VDC  $\pm 10\%$  200 mA using an external source. 200 mA is the value when all I/O command signals are being used. In addition, reducing the number of inputs/outputs can decrease the current capacity. Refer to the Operation Manual for required current for interface.
- \*3 The failure (ALM) is normally ON. When it is OFF (alarm occurs), stop the PLC signal using the sequence program.
- \*4 Signals of the same name are connected inside the driver.
- \*5 For command pulse input with an open collector method. When a positioning unit loaded with a differential line driver method is used, it is 10 m or less.
- \*6 If the command pulse input is open collector method, it supports only the sink (NPN) type interface. It does not correspond to the source (PNP) type interface.
- \*7 The Z-phase pulse encoder corresponds to the differential line driver method and the open collector method. If the Z-phase pulse encoder is using the open collector method, it supports only the sink (NPN) type interface. It does not correspond to the source (PNP) type interface.

## Control Signal Wiring Example: LECSA

In this wiring example, the device of the CN1-10 pin in the initial status has been changed to the device shown below. For details on the device and changing method, refer to the LECSA series Operation Manual.  
 CN1-10: MEND (Travel completion)

### Positioning mode (Point table method) For sink (NPN) I/O interface

- \*1 For preventing electric shock, be sure to connect the driver's protective earth (PE) terminal (marked ⊕) to the control panel's protective earth (PE).
- \*2 For interface use, supply 24 VDC ±10% 200 mA using an external source. 200 mA is the value when all I/O command signals are being used. In addition, reducing the number of inputs/outputs can decrease the current capacity.
- \*3 The failure (ALM) is normally ON.
- \*4 Signals of the same name are connected inside the driver.
- \*5 The wiring example is for the sink (NPN) type interface. Refer to the LECSA series Operation Manual for the source (PNP) type interface. Note that the 23 pin and 25 pin cannot be used for the source type interface.
- \*6 The Z-phase pulse encoder corresponds to the differential line driver method and the open collector method. If the Z-phase pulse encoder is using the open collector method, it supports only the sink (NPN) type interface. It does not correspond to the source (PNP) type interface.

## Control Signal Wiring Example: LECSB

This wiring example shows connection with a positioning unit (QD75D) manufactured by Mitsubishi Electric Corporation as when used in position control mode. Refer to the LECSB series Operation Manual and any technical literature or operation manuals for your PLC and positioning unit before connecting to another PLC or positioning unit.

- \*1 For preventing electric shock, be sure to connect the driver's protective earth (PE) terminal (marked  $\oplus$ ) to the control panel's protective earth (PE).
- \*2 For interface use, supply 24 VDC  $\pm 10\%$  300 mA using an external source.
- \*3 The failure (ALM) is normally ON. When it is OFF (alarm occurs), stop the PLC signal using the sequence program.
- \*4 Signals of the same name are connected inside the driver.
- \*5 For command pulse input with a differential line driver method. For open collector method, it is 2 m or less.
- \*6 If the command pulse input is open collector method, it supports only the sink (NPN) type interface. It does not correspond to the source (PNP) type interface.
- \*7 The Z-phase pulse encoder corresponds to the differential line driver method and the open collector method. If the Z-phase pulse encoder is using the open collector method, it supports only the sink (NPN) type interface. It does not correspond to the source (PNP) type interface.

## Control Signal Wiring Example: LECS□, LECS□-T□

\*1 For preventing electric shock, be sure to connect the driver's protective earth (PE) terminal (marked ⊕) to the control panel's protective earth (PE).  
 \*2 For interface use, supply 24 VDC ±10% 150 mA using an external source.  
 \*3 The failure (ALM) is normally ON. When it is OFF (alarm occurs), stop the PLC signal using the sequence program.

## Control Signal Wiring Example: LECSS

- \*1 For preventing electric shock, be sure to connect the driver's protective earth (PE) terminal (marked ⊕) to the control panel's protective earth (PE).
- \*2 For interface use, supply 24 VDC ±10% 150 mA using an external source.
- \*3 The failure (ALM) is normally ON. When it is OFF (alarm occurs), stop the PLC signal using the sequence program.
- \*4 Signals of the same name are connected inside the driver.
- \*5 Use the following SSCNET III optical cables. Refer to the "SSCNET III optical cable" on page 291 for cable product numbers.

Cable	Product no.	Cable length
SSCNET III optical cable	LE-CSS-□	0.15 m to 3 m

- \*6 Connections from Axis 2 onward are omitted.
- \*7 Up to 16 axes can be set.
- \*8 Be sure to place a cap on unused CN1A/CN1B.

## Control Signal Wiring Example: LECSB2-T□

This wiring example shows connection with a positioning unit (QD75D) manufactured by Mitsubishi Electric Corporation as when used in position control mode. Refer to the LECSB2-T series Operation Manual and any technical literature or operation manuals for your PLC and positioning unit before connecting to another PLC or positioning unit.

### Position control mode For sink (NPN) I/O interface

\*1 For preventing electric shock, be sure to connect the driver's protective earth (PE) terminal (marked ⊕) to the control panel's protective earth (PE).  
 \*2 For interface use, supply 24 VDC ±10% using an external source. Set the total current capacity to 500 mA. 500 mA is the value when all I/O command signals are being used. In addition, reducing the number of inputs/outputs can decrease the current capacity.  
 \*3 The failure (ALM) is normally ON. When it is OFF (alarm occurs), stop the PLC signal using the sequence program.  
 \*4 Signals of the same name are connected inside the driver.  
 \*5 For command pulse input with a differential line driver method. For open collector method, it is 2 m or less.  
 \*6 When not using the STO function, use the driver with the short-circuit connector (provided as an accessory) inserted.  
 \*7 Configure a circuit to turn off EM2 when the main circuit power is turned off to prevent any unexpected restarts of the driver.

# LECS□/LECS□-T Series

## Control Signal Wiring Example: LECSB2-T□

In this wiring example, the devices of the CN1-22 pin, CN1-23 pin, and CN1-25 pin in the initial status have been changed to the devices shown below. For details on the devices and changing method, refer to the LECSB2-T series Operation Manual.  
 CN1-22: CPO (Rough match)/CN1-23: ZP (Return to origin completion)/CN1-25: MEND (Travel completion)

### Positioning mode (Point table method) For sink (NPN) I/O interface

- \*1 For preventing electric shock, be sure to connect the servo amplifier's protective earth (PE) terminal (marked ⊕) to the control panel's protective earth (PE).
- \*2 For interface use, supply 24 VDC  $\pm 10\%$  using an external source. Set the total current capacity to 500 mA. 500 mA is the value when all I/O command signals are being used. In addition, reducing the number of inputs/outputs can decrease the current capacity.
- \*3 The ALM (Failure) is normally ON. (Normally closed contact)
- \*4 Signals of the same name are connected inside the servo amplifier.
- \*5 When not using the STO function, use the servo amplifier with the short-circuit connector (provided as an accessory) inserted.
- \*6 Configure a circuit to turn off EM2 when the main circuit power is turned off to prevent any unexpected restarts of the driver.
- \*7 Output devices are not assigned in the initial status. Assign the output devices as necessary.

## Control Signal Wiring Example: LECSN2-T□

- \*1 For preventing electric shock, be sure to connect the driver's protective earth (PE) terminal (marked ⊕) to the control panel's protective earth (PE).
- \*2 If upper level equipment does not have forced stop function, always install the forced stop 2 switch (normally closed contact).
- \*3 Configure a circuit to turn off EM2 when the main circuit power is turned off to prevent any unexpected restarts of the driver.
- \*4 When not using the STO function, use the driver with the short-circuit connector (provided as an accessory) inserted.
- \*5 For interface use, supply 24 VDC  $\pm 10\%$  using an external source. Set the total current capacity to 300 mA. 300 mA is the value when all I/O command signals are being used. In addition, reducing the number of inputs/outputs can decrease the current capacity.
- \*6 The ALM (Failure) is normally ON. (Normally closed contact)
- \*7 Signals of the same name are connected inside the driver.

LECS□2-T□	—	○
LECS□2-T□	—	○
LECSN2-T□	—	○

**Options**

**USB cable (3 m)**  
 (LECSA, LECSB, LECSA, LECSB, LECSB-T,  
 LECSA-T, LECSN-T, LECSB-T common)

**LEC – MR – J3USB**

\* MR-J3USBCBL3M manufactured by Mitsubishi Electric Corporation  
 Weight: 140 g

Cable for connecting PC and driver when using the setup software (MR Configurator2™)  
 Do not use any cable other than this cable.

**STO cable (3 m)**  
 (Only for LECSB2-T□, LECSN2-T□, and LECSB2-T□)

**LEC – MR – D05UDL3M**

\* MR-D05UDL3M manufactured by Mitsubishi Electric Corporation

Cable for connecting the driver and device, when using the safety function  
 Do not use any cable other than this cable.

Weight: 500 g

**Battery**

**LEC – MR – J3BAT**

\* MR-J3BAT manufactured by Mitsubishi Electric Corporation

Battery for replacement  
 Absolute position data is maintained by installing the battery to the driver.

Weight: 30 g

\* The LEC-MR-J3BAT is a single battery that uses lithium metal battery ER6V. When transporting lithium metal batteries and devices with built-in lithium metal batteries by a method subject to UN regulations, it is necessary to apply measures according to the regulations stipulated in the United Nations Recommendations on the Transport of Dangerous Goods, the Technical Instructions (ICAO-TI) of the International Civil Aviation Organization (ICAO), and the International Maritime Dangerous Goods Code (IMDG CODE) of the International Maritime Organization (IMO). If a customer is transporting products such as shown above, it is necessary to confirm the latest regulations, or the laws and regulations of the country of transport on your own, in order to apply the proper measures. Please contact SMC sales representative for details.

**LEC – MR – BAT6V1SET**

\* MR-BAT6V1SET manufactured by Mitsubishi Electric Corporation

Battery for replacement  
 Absolute position data is maintained by installing the battery to the driver.

Weight: 60 g

**LEC – MR – BAT6V1SET-A**

\* MR-BAT6V1SET-A manufactured by Mitsubishi Electric Corporation

Battery for replacement  
 Absolute position data is maintained by installing the battery to the driver.

Weight: 60 g

\* The LEC-MR-BAT6V1SET and LEC-MR-BAT6V1SET-A are assembled batteries that use lithium metal battery 2CR17335A. When transporting lithium metal batteries and devices with built-in lithium metal batteries by a method subject to UN regulations, it is necessary to apply measures according to the regulations stipulated in the United Nations Recommendations on the Transport of Dangerous Goods, the Technical Instructions (ICAO-TI) of the International Civil Aviation Organization (ICAO), and the International Maritime Dangerous Goods Code (IMDG CODE) of the International Maritime Organization (IMO). If a customer is transporting products such as shown above, it is necessary to confirm the latest regulations, or the laws and regulations of the country of transport on your own, in order to apply the proper measures. Please contact SMC sales representative for details.

# AC Servo Motor Driver Absolute Type

## LECYM/LECYU Series

(MECHATROLINK-II Type) (MECHATROLINK-III Type)

\* For details, refer to page 307 and onward.

### How to Order

Driver

LECYM 2 -

Driver type

M	MECHATROLINK-II type (For absolute encoder)
U	MECHATROLINK-III type (For absolute encoder)

Power supply voltage

2	200 to 230 VAC, 50/60 Hz
---	--------------------------

- \* If an I/O connector (CN1) is required, order the part number "LE-CYNA" separately.
- \* If an I/O cable (CN1) is required, order the part number "LEC-CSNA-1" separately.

Compatible motor type

Symbol	Type	Capacity	Encoder
V5	AC servo motor (V6*1)	100 W	Absolute
V7	AC servo motor (V7*1)	200 W	
V8	AC servo motor (V8*1)	400 W	

\*1 The symbol shows the motor type (actuator).

### Dimensions

MECHATROLINK-II type

LECYM2-V□

Connector name	Description
CN1	I/O signal connector
CN2	Encoder connector
CN3*1	Digital operator connector
CN6A	MECHATROLINK-II communication connector
CN6B	MECHATROLINK-II communication connector
CN7	PC connector
CN8	Safety connector

\*1 Digital operator is JUSP-OP05A-1-E manufactured by YASKAWA Electric Corporation. When using the digital operator, it should be provided by the customer.

Motor capacity	Hole position	A	B	C	D	Mounting hole
V5 (100 W)	①②	5	—	5	5	ø5
V7 (200 W)	①②	5	—	5	5	
V8 (400 W)	②③	5	5	5	5	

\* The mounting hole position varies depending on the motor capacity.

MECHATROLINK-III type

LECYU2-V□

Connector name	Description
CN1	I/O signal connector
CN2	Encoder connector
CN3*1	Digital operator connector
CN6A	MECHATROLINK-III communication connector
CN6B	MECHATROLINK-III communication connector
CN7	PC connector
CN8	Safety connector

\*1 Digital operator is JUSP-OP05A-1-E manufactured by YASKAWA Electric Corporation. When using the digital operator, it should be provided by the customer.

Motor capacity	Hole position	A	B	C	D	Mounting hole
V5 (100 W)	①②	5	—	5	5	ø5
V7 (200 W)	①②	5	—	5	5	
V8 (400 W)	②③	5	5	5	5	

\* The mounting hole position varies depending on the motor capacity.

## Specifications

### MECHATROLINK-II Type

Model		LECYM2-V5	LECYM2-V7	LECYM2-V8
Compatible motor capacity [W]		100	200	400
Compatible encoder		Absolute 20-bit encoder (Resolution: 1048576 p/rev)		
Main circuit power supply	Power voltage [V]	Three phase 200 to 230 VAC (50/60 Hz)		
	Allowable voltage fluctuation [V]	Three phase 170 to 253 VAC		
Control power supply	Power voltage [V]	Single phase 200 to 230 VAC (50/60 Hz)		
	Allowable voltage fluctuation [V]	Single phase 170 to 253 VAC		
Power supply capacity (at rated output) [A]		0.91	1.6	2.8
Input circuit		NPN (Sink circuit)/PNP (Source circuit)		
Parallel input (7 inputs)	Number of optional allocations	7 inputs	[Initial allocation] · Homing deceleration switch (/DEC) · External latch (/EXT 1 to 3) · Forward run prohibited (P-OT), reverse run prohibited (N-OT) [Can be allocated by setting the parameters] · Forward external torque limit (/P-CL), reverse external torque limit (/N-CL) Signal allocations can be performed, and positive and negative logic can be changed.	
			Number of fixed allocations	1 output
Parallel output (4 outputs)	Number of optional allocations	3 outputs	[Initial allocation] · Lock (/BK) [Can be allocated by setting the parameters] · Positioning completion (/COIN) · Speed limit detection (/VLT) · Speed coincidence detection (/V-CMP) · Rotation detection (/TGON) · Warning (/WARN) · Servo ready (/S-RDY) · Near (/NEAR) · Torque limit detection (/CLT) Signal allocations can be performed, and positive and negative logic can be changed.	
MECHATROLINK communication	Communication protocol	MECHATROLINK-II		
	Station address	41H to 5FH		
	Transmission speed	10 Mbps		
	Transmission cycle	250 μs, 0.5 ms to 4 ms (Multiples of 0.5 ms)		
	Number of transmission bytes	17 bytes, 32 bytes		
	Max. number of stations	30		
	Cable length	Overall cable length: 50 m or less, Cable length between the stations: 0.5 m or more		
Command method	Control method	Position, speed, or torque control with MECHATROLINK-II communication		
	Command input	MECHATROLINK-II command (Motion, data setting, monitoring, or adjustment)		
Function	Gain adjustment	Tuning-less/Advanced auto tuning/One-parameter tuning		
	Communication setting	USB communication, RS-422 communication		
	Torque limit	Internal torque limit, external torque limit, and torque limit by analog command		
	Encoder output	Phase A, B, Z: Line driver output		
	Emergency stop	CN8 Safety function		
	Overtravel	Dynamic brake stop, deceleration to a stop, or free run to a stop at P-OT or N-OT		
Alarm	Alarm signal, MECHATROLINK-II command			
Operating temperature range [°C]		0 to 55 (No freezing)		
Operating humidity range [%RH]		90 or less (No condensation)		
Storage temperature range [°C]		-20 to 85 (No freezing)		
Storage humidity range [%RH]		90 or less (No condensation)		
Insulation resistance [MΩ]		10 MΩ (500 VDC)		
Safety function		STO (IEC 61800-5-2)		
Safety standards*1		EN ISO 13849-1 Category 3 PL d, IEC 61508 SIL2, IEC 62061 SIL CL2, IEC 61800-5-2		
Weight [g]		900		1000

\*1 Refer to the LECYM operation manual for details.

## Specifications

### MECHATROLINK-III Type

Model			LECYU2-V5	LECYU2-V7	LECYU2-V8
Compatible motor capacity [W]			100	200	400
Compatible encoder			Absolute 20-bit encoder (Resolution: 1048576 p/rev)		
Main circuit power supply	Power voltage [V]		Three phase 200 to 230 VAC (50/60 Hz)		
	Allowable voltage fluctuation [V]		Three phase 170 to 253 VAC		
Control power supply	Power voltage [V]		Single phase 200 to 230 VAC (50/60 Hz)		
	Allowable voltage fluctuation [V]		Single phase 170 to 253 VAC		
Power supply capacity (at rated output) [A]			0.91	1.6	2.8
Input circuit			NPN (Sink circuit)/PNP (Source circuit)		
Parallel input (7 inputs)	Number of optional allocations	7 inputs	[Initial allocation] · Homing deceleration switch (/DEC) · External latch (/EXT 1 to 3) · Forward run prohibited (P-OT), reverse run prohibited (N-OT) [Can be allocated by setting the parameters] · Forward external torque limit (/P-CL), reverse external torque limit (/N-CL) Signal allocations can be performed, and positive and negative logic can be changed.		
			Number of fixed allocations	1 output	· Servo alarm (ALM)
Parallel output (4 outputs)	Number of optional allocations	3 outputs	[Initial allocation] · Lock (/BK) [Can be allocated by setting the parameters] · Positioning completion (/COIN) · Speed limit detection (/VLT) · Speed coincidence detection (/V-CMP) · Rotation detection (/TGON) · Warning (/WARN) · Servo ready (/S-RDY) · Near (/NEAR) · Torque limit detection (/CLT) Signal allocations can be performed, and positive and negative logic can be changed.		
MECHATROLINK communication	Communication protocol		MECHATROLINK-III		
	Station address		03H to EFH		
	Transmission speed		100 Mbps		
	Transmission cycle		125 μs, 250 μs, 500 μs, 750 μs, 1 ms to 4 ms (Multiples of 0.5 ms)		
	Number of transmission bytes		16 bytes, 32 bytes, 48 bytes		
	Max. number of stations		62		
	Cable length		Cable length between the stations: 0.5 m or more, 75 m or less		
Command method	Control method		Position, speed, or torque control with MECHATROLINK-III communication		
	Command input		MECHATROLINK-III command (Motion, data setting, monitoring, or adjustment)		
Function	Gain adjustment		Tuning-less/Advanced auto tuning/One-parameter tuning		
	Communication setting		USB communication, RS-422 communication		
	Torque limit		Internal torque limit, external torque limit, and torque limit by analog command		
	Encoder output		Phase A, B, Z: Line driver output		
	Emergency stop		CN8 Safety function		
	Overtravel		Dynamic brake stop, deceleration to a stop, or free run to a stop at P-OT or N-OT		
Alarm		Alarm signal, MECHATROLINK-III command			
Operating temperature range [°C]			0 to 55 (No freezing)		
Operating humidity range [%RH]			90 or less (No condensation)		
Storage temperature range [°C]			-20 to 85 (No freezing)		
Storage humidity range [%RH]			90 or less (No condensation)		
Insulation resistance [MΩ]			10 MΩ (500 VDC)		
Safety function			STO (IEC 61800-5-2)		
Safety standards*1			EN ISO 13849-1 Category 3 PL d, IEC 61508 SIL2, IEC 62061 SIL CL2, IEC 61800-5-2		
Weight [g]			900		1000

\*1 Refer to the LECYU operation manual for details.

## Power Supply Wiring Example: LECY□

■ Three phase 200 V **LECYM2-□**  
**LECYU2-□**

1QF : Molded-case circuit breaker  
1FLT : Noise filter  
1KM : Magnetic contactor (for control power supply)  
2KM : Magnetic contactor (for main circuit power supply)

1Ry : Relay  
1PL : Indicator light  
1SA : Surge absorber  
2SA : Surge absorber  
3SA : Surge absorber  
1D : Flywheel diode

\*1 For the LECY□2-V5, LECY□2-V7, and LECY□2-V8, terminals B2 and B3 are not short-circuited. Do not short-circuit these terminals.

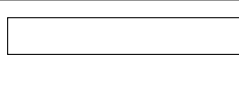

### Main Circuit Power Supply Connector \* Accessory

Terminal name	Function	Details
L1	Main circuit power supply	Connect the main circuit power supply. Single phase 200 to 230 VAC, 50/60 Hz Connection terminal: L1, L2 Three phase 200 to 230 VAC, 50/60 Hz Connection terminal: L1, L2, L3
L2		
L3		
L1C	Control power supply	Connect the control power supply. Single phase 200 to 230 VAC, 50/60 Hz Connection terminal: L1C, L2C
L2C		
B1(+)	External regenerative resistor connection terminal	When the regenerative resistor is required, connect it between terminals B1(+) and B2.
B2		
B3		
⊖1	Main circuit negative terminal	⊖1 and ⊖2 are connected at shipment.
⊖2		

### Motor Connector \* Accessory

Terminal name	Function	Details
U	Servo motor power (U)	Connect to motor cable (U, V, W).
V	Servo motor power (V)	
W	Servo motor power (W)	

### Power Supply Wire Specifications

Item	Specifications
Applicable wire size	L1, L2, L3, L1C, L2C Single wire, Twisted wire, AWG14 (2.0 mm <sup>2</sup> )
Stripped wire length

Specific Product Precautions

## Control Signal Wiring Example: LECYM

\*1  $\overline{\text{---}}$  shows twisted-pair wires.

\*2 The 24 VDC power supply is not included. Use a 24 VDC power supply with double insulation or reinforced insulation.

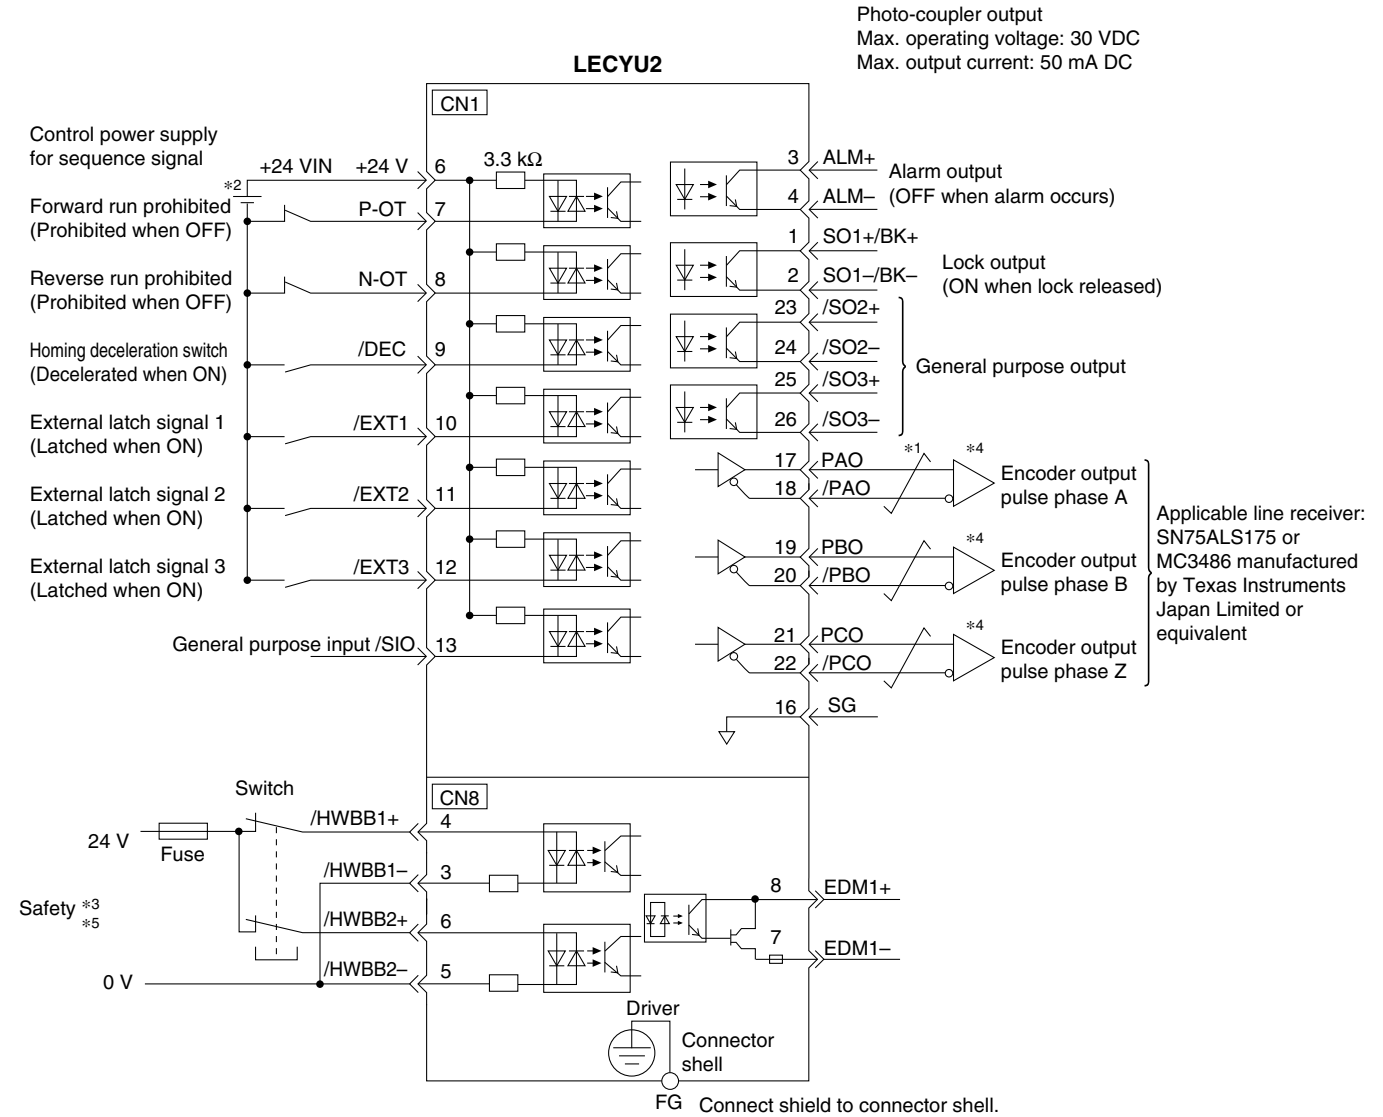

\*3 When using the safety function, a safety function device must be connected to the wiring that is necessary to activate the safety function. Otherwise, the servo motor is not turned ON. When not using the safety function, use the driver with the Safety Jumper Connector (provided as an accessory) inserted into the CN8.

\*4 Always use line receivers to receive the output signals.

\*\* The functions allocated to the input signals /DEC, P-OT, N-OT, /EXT1, /EXT2, and /EXT3, and the output signals /SO1, /SO2, and /SO3 can be changed by setting the parameters.

\*5 It is a safety function equivalent to the STO function (IEC 61800-5-2) using the hard wire base block function (HWBB).

**Control Signal Wiring Example: LECYU**

\*1  $\overline{\text{---}}$  shows twisted-pair wires.  
 \*2 The 24 VDC power supply is not included. Use a 24 VDC power supply with double insulation or reinforced insulation.  
 \*3 When using the safety function, a safety function device must be connected to the wiring that is necessary to activate the safety function. Otherwise, the servo motor is not turned ON. When not using the safety function, use the driver with the Safety Jumper Connector (provided as an accessory) inserted into the CN8.  
 \*4 Always use line receivers to receive the output signals.  
 \*\* The functions allocated to the input signals /DEC, P-OT, N-OT, /EXT1, /EXT2, and /EXT3, and the output signals /SO1, /SO2, and /SO3 can be changed by setting the parameters.

### Setup software (SigmaWin+™) (LECYM/LECYU common)

\* Please download the SigmaWin+™ via our website.  
SigmaWin+™ is a registered trademark or trademark of YASKAWA Electric Corporation.

**Adjustment, waveform display, parameter read/write, and test operation can be performed upon a PC.**

### Compatible PC

When using setup software (SigmaWin+™), use an IBM PC/AT compatible PC that meets the following operating conditions.

### Hardware Requirements

Equipment		Setup software (SigmaWin+™)
PC *1, 2, 3, 4	OS	Windows® XP*5, Windows Vista®, Windows® 7 (32-bit/64-bit)
	Available HD space	350 MB or more (When the software is installed, 400 MB or more is recommended.)
	Communication interface	Use USB port.
Display		XVGA monitor (1024 x 768 or more, "The small font is used.") 256 color or more (65536 color or more is recommended.) Connectable with the PC above
Keyboard		Connectable with the PC above
Mouse		Connectable with the PC above
Printer		Connectable with the PC above
USB cable		LEC-JZ-CVUSB*6
Other		Adobe Reader Ver. 5.0 or higher (* Except Ver. 6.0)

- \*1 Windows, Windows Vista®, Windows® 7 are registered trademarks of Microsoft Corporation in the United States and/or other countries.
- \*2 On some PCs, this software may not run properly.
- \*3 Not compatible with 64-bit Windows® XP and 64-bit Windows Vista®
- \*4 For Windows® XP, please use it by the administrator authority (When installing and using it.).
- \*5 In PC that uses the program to correct the problem of HotfixQ328310, it is likely to fail in the installation. In that case, please use the program to correct the problem of HotfixQ329623.
- \*6 Order USB cable separately.

### Battery (LECYM/LECYU common)

## LEC-JZ-CVBAT

\* JZSP-BA01 manufactured by YASKAWA CONTROLS CO., LTD.

Battery for replacement

Absolute position data is maintained by installing the battery to the battery case of the encoder cable.

Weight: 10 g

\* The LEC-JZ-CVBAT is a single battery that uses lithium metal battery ER3V.

When transporting lithium metal batteries and devices with built-in lithium metal batteries by a method subject to UN regulations, it is necessary to apply measures according to the regulations stipulated in the United Nations Recommendations on the Transport of Dangerous Goods, the Technical Instructions (ICAO-TI) of the International Civil Aviation Organization (ICAO), and the International Maritime Dangerous Goods Code (IMDG CODE) of the International Maritime Organization (IMO). If a customer is transporting products such as shown above, it is necessary to confirm the latest regulations, or the laws and regulations of the country of transport on your own, in order to apply the proper measures. Please contact SMC sales representative for details.

### USB cable (2.5 m)

## LEC-JZ-CVUSB

\* JZSP-CVS06-02-E manufactured by YASKAWA CONTROLS CO., LTD.

Cable for connecting PC and driver when using the setup software (SigmaWin+™)

Do not use any cable other than this cable.

Weight: 150 g

### Cable for safety function device (3 m)

## LEC-JZ-CVSAF

\* JZSP-CVH03-03-E manufactured by YASKAWA CONTROLS CO., LTD.

Cable for connecting the driver and device when using the safety function

Do not use any cable other than this cable.

Weight: 160 g

# LECS□/LECS□-T/LECY□ Series

## Specific Product Precautions 1

Be sure to read this before handling the products. Refer to the back cover for safety instructions. For electric actuator precautions, refer to the “Handling Precautions for SMC Products” and the “Operation Manual” on the SMC website: <https://www.smcworld.com>

### Design / Selection

#### Warning

- 1. Be sure to apply the specified voltage.**  
Otherwise, malfunction or breakage may occur. If the applied voltage is lower than the specified voltage, it is possible that the load will not be able to be moved due to an internal voltage drop of the driver. Please check the operating voltage before use.
- 2. Do not operate the product beyond the specifications.**  
Otherwise, a fire, malfunction, or actuator damage may result. Please check the specifications before use.
- 3. Install an emergency stop circuit.**  
Please install an emergency stop outside of the enclosure so that the system operation can be stopped immediately and the power supply can be intercepted.
- 4. In order to prevent any damage caused by the breakdown or malfunction of the driver and its peripheral devices, a backup system should be established in advance by giving a multiple-layered structure or a fail-safe design to the equipment, etc.**
- 5. If the danger of human injury is expected due to abnormal heat generation, smoking, ignition, etc., of the driver and its peripheral devices, cut off the power supply of the product and the system immediately.**
- 6. The parameters of the driver are set to initial values. Please change the parameters according to the specifications of the customer's equipment before use. Refer to the operation manual for parameter details.**

### Handling

#### Warning

- 1. Do not touch the inside of the driver and its peripheral devices.**  
Doing so may cause an electric shock or damage to the driver.
- 2. Do not perform the operation or setting of the product with wet hands.**  
Doing so may cause an electric shock.
- 3. Products with damage or those missing any components should not be used.**  
An electric shock, fire, or injury may result.
- 4. Use only the specified combination between the electric actuator and the driver.**  
Failure to do so may cause damage to the actuator or the driver.
- 5. Be careful not to be hit by workpieces while the actuator is moving.**  
It may cause an injury.
- 6. Do not connect the power supply or power on the product before confirming the area to which the workpiece moves is safe.**  
The movement of the workpiece may cause an accident.
- 7. Do not touch the product when it is energized and for some time after the power has been disconnected, as it is very hot.**  
Doing so may lead to a burn due to the high temperature.
- 8. Before installation, wiring, and maintenance, the voltage should be checked with a tester 5 minutes after the power supply has been turned off.**  
Otherwise, an electric shock, fire, or injury may result.

### Handling

#### Warning

- 9. Static electricity may cause a malfunction or break the driver. Do not touch the driver while power is supplied.**  
When touching the driver for maintenance, take sufficient measures to eliminate static electricity.
- 10. Do not use the product in an area where dust, powder dust, water, chemicals, or oil is in the air.**  
It will cause failure or malfunction.
- 11. Do not use the product in an area where a magnetic field is generated.**  
It will cause failure or malfunction.
- 12. Do not install the product in an environment containing flammable gas, explosive gas, or corrosive gas.**  
It could lead to fire, explosion, or corrosion.
- 13. Radiant heat from strong heat sources, such as a furnace, direct sunlight, etc., should not be applied to the product.**  
It will cause failure of the driver or its peripheral devices.
- 14. Do not use the product in an environment subject to a temperature cycle.**  
It will cause failure of the driver or its peripheral devices.
- 15. Do not use the product in a place where surges are generated.**  
When there are units that generate a large amount of surge around the product (e.g. solenoid type lifters, high-frequency induction furnaces, motors, etc.), this may cause deterioration or damage to the product's internal circuit. Avoid sources of surge generation and crossed lines.
- 16. Do not install the product in an environment under the effect of vibrations and impacts.**  
It will cause failure or malfunction.
- 17. When a surge-generating load, such as a relay or solenoid valve, is driven directly, use a product that incorporates a surge absorption element.**

### Installation

#### Warning

- 1. Install the driver and its peripheral devices on a fire-proof material.**  
Direct installation on or near a flammable material may cause a fire.
- 2. Do not install the product in a place subject to vibrations and impacts.**  
It will cause failure or malfunction.
- 3. The driver should be mounted on a vertical wall in a vertical direction. Also, be sure not to cover the driver's suction/exhaust ports.**
- 4. Install the driver and its peripheral devices on a flat surface.**  
If the mounting surface is distorted or uneven, an unacceptable force may be added to the housing, etc., causing problems.

# LECS□/LECS□-T/LECY□ Series Specific Product Precautions 2

Be sure to read this before handling the products. Refer to the back cover for safety instructions. For electric actuator precautions, refer to the “Handling Precautions for SMC Products” and the “Operation Manual” on the SMC website: <https://www.smcworld.com>

## Power Supply

### ⚠ Caution

1. Use a power supply that has low noise between lines and between the power and ground.  
In cases where noise is high, an isolation transformer should be used.
2. To prevent lightning surges, appropriate measures should be taken. Ground the surge absorber for lightning separately from the grounding of the driver and its peripheral devices.

## Wiring

### ⚠ Warning

1. The driver will be damaged if a commercial power supply (100/200 V) is added to the driver's servo motor power (U, V, and W). Be sure to check wiring for mistakes when the power supply is turned on.
2. Connect the ends of the U, V, and W wires of the motor cable correctly to the phases (U, V, and W) of the servo motor power. If these wires do not match up, the servo motor cannot be controlled.

## Grounding

### ⚠ Warning

1. For grounding the actuator, connect the copper wire of the actuator to the driver's protective earth (PE) terminal and connect the copper wire of the driver to the earth via the control panel's protective earth (PE) terminal. Do not connect them directly to the control panel's protective earth (PE) terminal.

2. In the unlikely event that a malfunction is caused by the ground, please disconnect it.

## Maintenance

### ⚠ Warning

1. Perform a maintenance and inspection periodically.  
Confirm wiring and screws are not loose.  
Loose screws or wires may cause unintentional malfunction.
2. Conduct an appropriate functional inspection after completing the maintenance and inspection.  
At times where the equipment or machinery does not operate properly, conduct an emergency stop of the system. Otherwise, an unexpected malfunction may occur and it will become impossible to ensure safety. Conduct a test of the emergency stop in order to confirm the safety of the equipment.
3. Do not disassemble, modify, or repair the driver and its peripheral devices.
4. Do not put anything conductive or flammable inside the driver.  
It may cause a fire.
5. Do not conduct an insulation resistance test or withstand voltage test on this product.
6. Ensure sufficient space for maintenance activities.  
Design the system allowing the required space for maintenance and inspection.

\*1 There is a "UL Listed" mark on the AC servo motor driver body.

## Revision History

<b>Edition C</b>	<ul style="list-style-type: none"> <li>* The in-line motor type LEY□□D series has been added.</li> <li>* The guide rod type LEYG series has been added.</li> <li>* The guide rod type/in-line motor type LEYG□□D series has been added.</li> <li>* The LECP1 series programless controller has been added.</li> <li>* A standard cable has been added to the actuator cable types.</li> <li>* The AC servo motor (100/200 W) type LEY□□S series has been added.</li> <li>* The LECSA/LECSB series AC servo motor driver has been added.</li> <li>* Number of pages has been increased from 40 to 96.</li> </ul>	PY
<b>Edition D</b>	<ul style="list-style-type: none"> <li>* Size 40 has been added to the LEY/LEYG series step motor (servo/24 VDC).</li> <li>* Size 63 has been added to the AC servo motor rod type LEY series.</li> <li>* The dust-tight/water-jet-proof specification has been added to the rod type.</li> <li>* Sizes 25 and 32 have been added to the AC servo motor guide rod type LEYG series.</li> <li>* The LECPA series step motor driver has been added.</li> <li>* The LEC-G series gateway unit has been added.</li> <li>* The LECSA/LECSB series AC servo motor driver has been added.</li> <li>* UL-compliant products have been added.</li> <li>* The controller setting kit (LEC-W2) has been changed.</li> <li>* Number of pages has been increased from 96 to 160.</li> </ul>	RP
<b>Edition E</b>	<ul style="list-style-type: none"> <li>* Intermediate strokes have been added to the LEY63.</li> <li>* Normally-closed solid state auto switches have been added.</li> <li>* The JXC series step motor controller has been added.</li> <li>* The controller setting kit has been changed to the communication cable for controller setting (LEC-W2A).</li> <li>* Errors in text have been corrected.</li> <li>* Number of pages has been increased from 160 to 292.</li> </ul>	YR
<b>Edition F</b>	<ul style="list-style-type: none"> <li>* A 750 W specification has been added to the LEY100 series.</li> <li>* A network card type AC servo motor driver has been added to the LECSN-T series.</li> <li>* A dust-tight/water-jet-proof specification (IP65 equivalent/IP67 equivalent) has been added to the LEY-X7 series.</li> <li>* Discontinued products (LECP6 and LECPMJ) have been removed.</li> <li>* Step data input type JXC51/61 series controllers have been added.</li> <li>* A CE/UL-compliance list has been added.</li> <li>* Number of pages has been increased from 292 to 312.</li> </ul>	AP

## Safety Instructions

These safety instructions are intended to prevent hazardous situations and/or equipment damage. These instructions indicate the level of potential hazard with the labels of “**Caution**,” “**Warning**” or “**Danger**.” They are all important notes for safety and must be followed in addition to International Standards (ISO/IEC)\*1), and other safety regulations.

 **Caution:** **Caution** indicates a hazard with a low level of risk which, if not avoided, could result in minor or moderate injury.

 **Warning:** **Warning** indicates a hazard with a medium level of risk which, if not avoided, could result in death or serious injury.

 **Danger :** **Danger** indicates a hazard with a high level of risk which, if not avoided, will result in death or serious injury.

\*1) ISO 4414: Pneumatic fluid power – General rules relating to systems.  
ISO 4413: Hydraulic fluid power – General rules relating to systems.  
IEC 60204-1: Safety of machinery – Electrical equipment of machines.  
(Part 1: General requirements)  
ISO 10218-1: Manipulating industrial robots – Safety.  
etc.

### Warning

#### 1. The compatibility of the product is the responsibility of the person who designs the equipment or decides its specifications.

Since the product specified here is used under various operating conditions, its compatibility with specific equipment must be decided by the person who designs the equipment or decides its specifications based on necessary analysis and test results. The expected performance and safety assurance of the equipment will be the responsibility of the person who has determined its compatibility with the product. This person should also continuously review all specifications of the product referring to its latest catalog information, with a view to giving due consideration to any possibility of equipment failure when configuring the equipment.

#### 2. Only personnel with appropriate training should operate machinery and equipment.

The product specified here may become unsafe if handled incorrectly. The assembly, operation and maintenance of machines or equipment including our products must be performed by an operator who is appropriately trained and experienced.

#### 3. Do not service or attempt to remove product and machinery/equipment until safety is confirmed.

1. The inspection and maintenance of machinery/equipment should only be performed after measures to prevent falling or runaway of the driven objects have been confirmed.
2. When the product is to be removed, confirm that the safety measures as mentioned above are implemented and the power from any appropriate source is cut, and read and understand the specific product precautions of all relevant products carefully.
3. Before machinery/equipment is restarted, take measures to prevent unexpected operation and malfunction.

#### 4. Contact SMC beforehand and take special consideration of safety measures if the product is to be used in any of the following conditions.

1. Conditions and environments outside of the given specifications, or use outdoors or in a place exposed to direct sunlight.
2. Installation on equipment in conjunction with atomic energy, railways, air navigation, space, shipping, vehicles, military, medical treatment, combustion and recreation, or equipment in contact with food and beverages, emergency stop circuits, clutch and brake circuits in press applications, safety equipment or other applications unsuitable for the standard specifications described in the product catalog.
3. An application which could have negative effects on people, property, or animals requiring special safety analysis.
4. Use in an interlock circuit, which requires the provision of double interlock for possible failure by using a mechanical protective function, and periodical checks to confirm proper operation.

### Caution

#### 1. The product is provided for use in manufacturing industries.

The product herein described is basically provided for peaceful use in manufacturing industries.  
If considering using the product in other industries, consult SMC beforehand and exchange specifications or a contract if necessary.  
If anything is unclear, contact your nearest sales branch.

### Limited warranty and Disclaimer/ Compliance Requirements

The product used is subject to the following “Limited warranty and Disclaimer” and “Compliance Requirements”.

Read and accept them before using the product.

#### Limited warranty and Disclaimer

1. The warranty period of the product is 1 year in service or 1.5 years after the product is delivered, whichever is first.\*2)  
Also, the product may have specified durability, running distance or replacement parts. Please consult your nearest sales branch.
2. For any failure or damage reported within the warranty period which is clearly our responsibility, a replacement product or necessary parts will be provided.  
This limited warranty applies only to our product independently, and not to any other damage incurred due to the failure of the product.
3. Prior to using SMC products, please read and understand the warranty terms and disclaimers noted in the specified catalog for the particular products.

##### \*2) Vacuum pads are excluded from this 1 year warranty.

A vacuum pad is a consumable part, so it is warranted for a year after it is delivered.  
Also, even within the warranty period, the wear of a product due to the use of the vacuum pad or failure due to the deterioration of rubber material are not covered by the limited warranty.

#### Compliance Requirements

1. The use of SMC products with production equipment for the manufacture of weapons of mass destruction (WMD) or any other weapon is strictly prohibited.
2. The exports of SMC products or technology from one country to another are governed by the relevant security laws and regulations of the countries involved in the transaction. Prior to the shipment of a SMC product to another country, assure that all local rules governing that export are known and followed.

### Caution

#### SMC products are not intended for use as instruments for legal metrology.

Measurement instruments that SMC manufactures or sells have not been qualified by type approval tests relevant to the metrology (measurement) laws of each country. Therefore, SMC products cannot be used for business or certification ordained by the metrology (measurement) laws of each country.

 **Safety Instructions** Be sure to read the “Handling Precautions for SMC Products” (M-E03-3) and “Operation Manual” before use.
