- * As sizes ø50 and larger cannot be disassembled, the seal cannot be replaced. (For details, refer to the **Web Catalog**.)
- * A rod scraper cannot be replaced independently. It must be sent to the factory for servicing. Please contact SMC separately for how to order it.
- * The seal kit includes a grease pack (10 g). Order with the following part number when only the grease pack is required.
Grease pack for stainless steel cylinders part no.: GR-R-010 (10 g)

⚠ Caution

When disassembling cylinders with bore sizes of ø20 through ø40, grip the double flat part of either the tube cover or the rod cover with a vise and loosen the other side with a wrench or a monkey wrench, etc., and then remove the cover. When retightening, tighten approximately 2 degrees more than the original position. (Cylinders with ø50 or larger bore sizes are tightened with a large tightening torque and cannot be disassembled.)
